Introduction

OVERVIEW OF *RŌMA AETERNA*

In the second book of his work *On Oratorical Education* (*Īnstitūtiō Ōrātōria*), Quintilian (*Mārcus Fabius Quintiliānus*, first century AD) suggests narratives for those beginning their rhetorical education:

> I, in fact, would like [students] to read the best authors—both as first authors and for the rest of their lives, but further still, of those best authors I'd have them read all those most straightforward and particularly lucid: for example, I'd have them read Livy in their boyhood rather than Sallust. Although Sallust is the greater writer of history, one needs to be already advanced in order to understand him. Cicero, as it seems to me at least, is both delightful for those just starting out and is also fairly clear; he can not only advance their understanding but also become a favorite. Next, as Livy advises, I would choose authors based on resemblance of each to Cicero.

> *Ego optimōs quidem et statim et semper, sed tamen eōrum candidissimum quemque et maximē expositum velim, ut Līvium ā puerīs magis quam Sallustium (et hic historiae maior est auctor, ad quem tamen intellegendum iam prōfectū opus sit). Cicerō, ut mihi quidem vidētur, et iūcundus incipientibus quoque et apertus est satis, nec prōdesse tantum sed etiam amārī potest: tum, quem ad modum Līvius praecipit, ut quisque erit Cicerōnī simillimus.*

Hans Ørberg's *RŌMA AETERNA* follows Quintilian's plan. The book begins with Ørberg's own admirable prose (Caps. XXXVI to XL). Cap. XXXVI helps the instructor assess student strengths and weaknesses. This chapter effortlessly brings students back to their Latin after the inevitable break from Latin over summer or winter vacations. It also introduces critical new syntax. Students

first learn, for example, about subordinate clauses in *indirect discourse* in Cap. XXXVI.

Caps. XXXVII–XL offer a prose retelling of the early books of Vergil's (*Pūblius Vergilius Marō*) *Aeneid*. These chapters are a good bridge from Familia Rōmāna to the unadapted selections in Rōma Aeterna. A prose narrative, instead of verse, is prudent: although students are often enticed into reading more Latin through the offer of poetry, without a solid foundation in Latin prose, they will not be able to appreciate the special voice that Latin verse offers. The prose is in part closely modeled on Vergil's language, interspersed with verse excerpts from the *Aeneid*.

Caps. XLI–XLV introduce the Roman historian Livy's (*Titus Līvius*) *ab Urbe Conditā*. Ørberg's adaptation enables the student to become gradually accustomed to Livy's prose style. The Latin grows increasingly less adapted until Cap. XLV.222, after which the student reads unadapted—although not unabridged—Livy. Cap. XLV is the transitional chapter, and, if one chapter is to introduce students to unadapted ancient texts, it is a good place to start.

While the predominant author for Caps. XLI to LI is Livy—either in his own words, Ørberg's adaptation, or the *periochae* (later summaries of the lost books of Livy's history)—we are also introduced to other authors who have contributed to our understanding of Roman history: *Eutropius* (Caps. XLVI and LIII), *Aulus Gellius* (Cap. XLVII), *Cornēlius Nepōs* (Cap. XLIX). While the styles of these writers differ from Livy's, the change from chapter to chapter will not present any obstacle to the reader.

At the end of Cap. LI, however, we are introduced to Sallust (*Sallustius Crīspus*), presented, as Quintilian advised, after the reader has a good amount of experience with Latin prose. Sallust is, as Quintilian warned, more difficult to understand. Some rudimentary remarks, not only about individual style but also about generic expectations, can be found in the section on style at the end of this introduction as well as in the Points of Style sections in individual chapters.

Key Foundations of the Rōma Aeterna Text

Marginalia

The instructor might need to remind (read: hound) students about the *marginalia*, truly a *sine quā nōn* of reading the text as well as an invaluable aid to the mastery of Latin vocabulary. Synonyms in the margins connect new words with familiar ones and encourage students to absorb Latin as a genuine language instead of a lot of unrelated morphemes. The information in the margins also keeps the reader focused on Latin and not English translation.

Grammatica Latīna

The Grammatica Latīna that conclude the chapters in Rōma Aeterna differ from those of Familia Rōmāna. The first Grammatica Latīna section does not occur until Cap. XLVIII, in which it offers a synopsis of verb themes (*verbī themata*) of the principal parts;[1] Cap. XLIX, a synopsis of syncopation (*dē verbīs contractīs*);[2] and Cap. L, *ōrātiō oblīqua et recta*, indirect and direct speech).[3] From Cap. LI onward, the sections offer useful information about the vocabulary formation (*dē vocābulīs faciendīs*):

- prefixes (*praeverbia*, Cap. LI)
- suffixes and verbs from nouns (*suffīxa*, *verba ē nōminibus*, Cap. LII)
- adjectives from nouns (*adiectīva ē nōminibus*, Cap. LIII)
- nouns from verbs (*nōmina ē verbīs*, Cap. LIV)
- feminine abstract nouns from adjectives (*nōmina fēminīna ex adiectīvīs*, Cap. LV)
- inchoative verbs (*verba inchoātīva*, Cap. LVI)

This last Grammatica Latīna section also contains an explanation of the Sapphic stanza, further explained here in the companion; a review of Cap. XXXIV of *Familia Rōmāna* would be helpful to students.

The value of the Grammatica Latīna lies not only in the useful information provided but also in its efficacy in showing students how to talk about Latin *Latīnē*. While the Companion has its own value, moving students toward the target language remains the essential objective of Lingua Latina Per Se Illustrata (LLPSI). The excerpt from Dōnātus's *Ars Minor* in Cap. XXXV of *Familia Rōmāna* affords one model for the target language; the Grammatica Latīna, however, remain the most important resource.

The Companion

Format of the Companion

This book comprises two main parts: Rēs Grammaticae for all chapters, followed by the reading helps, or Auxilia Legendī, which are preceded by an Introduction to the chapter. As in the *Companion to Familia Rōmāna*, a vocabulary concludes each chapter. A full vocabulary concludes the book.

Pars Prīma: Rēs Grammaticae

Students learned a great deal of Latin grammar in Familia Rōmāna. There is still quite a bit to be introduced in Rōma Aeterna. Some of the material fine-tunes what students have already learned; many concepts critical to the under-standing of Latin are introduced here for the first time. The material in each chapter has been organized into five categories (note: not all chapters contain all five categories):

I.   Rēs Grammaticae Novae: new syntax.

II. Rēs Grammaticae Fūsius Explicātae: expansion and refinement of syntax introduced elsewhere.

III. Dēmonstrātiō Verbōrum: explanation of words and phrases at the lexical level.

IV. Recēnsiō: review material.

V.   Points of Style: information about the language of the author under consideration.

Pars Prima and Pars Altera both contain new syntax. Pars Altera puts syntax into a larger context by referring students to what else they have learned else-where about, e.g., *cum* clauses (Cap. XXXVII). Although they will learn in Cap. XXXVII more about *cum* plus the subjunctive (which is "new" syntax), putting this in the context of what they already know about *cum* plus the indic-ative will foster a sense of larger perspective on how Latin works. Categorizing material has been, at times, difficult, and some may disagree with my decisions.

Pars Altera: Introduction and Auxilia Legendī

The introductions to each chapter come from Hans Ørberg. They have been in places altered and/or supplemented. The Auxilia Legendī aim to be faithful to the spirit of the book. Historical and stylistic notes are limited to those that facilitate reading and expedite mastery of the language. Information contained in the marginalia is generally not repeated in the reading helps. In other words, the reading notes are just that: help in reading the text. The commentary is not scholarly and brings in contextual information only where it seemed necessary to understanding what is going on in the Latin text.

   Vocābula can be found at the end of the reading notes for individual chap-ters (as well as a full vocabulary at the end of the book).

Notes on vocabulary presentation:

Nouns

- Gender is given for all 3rd declension nouns; for other declensions (since their gender is fairly regular), gender is given only if other than the norm (e.g., 1st declension masculine) or the noun is plural.

- Nouns that are substantives from the adjective are generally placed with adjectives, with a footnote giving their alternative status as nouns.

Verbs

- The principal parts of 1st and 4th conjugation verbs are quite regular. The full four parts are listed only when they deviate from the norm.

- For compound verbs, the root verb is given when needed to guide the formation of the secondary system (e.g., *circumdare* (< *dare*):

  - ▷ Principal parts will follow the root, with stem changes (e.g., *adigere* from *ad-agere*; *redimere* from *red-emere*).

  - ▷ Principal parts are given for compounds from an unfamiliar root.

  - ▷ An arbitrary exception has been made for the compounds from *cadere* (-*cidere*) and *caedere* (-*cīdere*).

Pacing for *Rōma Aeterna*

Rōma Aeterna was composed as a continuation of *Familia Rōmāna*. Although some readers will want—and have the necessary time—to read the text cover to cover, the companion is designed to facilitate selection. A good deal of repetition in the reading notes is one result: the companion does not take for granted that everyone has read and remembered everything that went before, and the notes will generally reference the chapter (of *Rōma Aeterna* or *Familia Rōmāna*) where a concept is discussed. Since the two parts of *Lingua Latina* (*Familia Rōmāna* and *Rōma Aeterna*) were written sequentially, chapters are referred to by number alone. For example, in the following, XIII.52 means *Familia Rōmāna*, Cap. XIII, line 52:

> *Lūna 'nova' esse dīcitur* (XIII.52): "the moon is said to be 'new.'"

Caps. I–XXXV can be found in part one, *Familia Rōmāna*, while Caps. XXXVI–LV are found in part two, *Rōma Aeterna*.

When the reference is to chapter alone, more clarity is needed, e.g.:

- *dignus* + ablative (Cap. XIX)

- You learned the ablative of comparison in Cap. XXIV.

- *rēgnī rērumque tuārum*: genitive with *oblītōs* (Caps. XXV, XXXII): i.e., Caps. XXV *and* XXXII

References to line numbers in the chapter under review appear without the chapter number. For example, if you are reviewing Cap. XXXVI in this volume, line references to *Rōma Aeterna* Cap. XXXVI will appear as, e.g., "l.105," for line 105 whereas line references to other chapters will include chapter number. For example, *Familia Rōmāna* Cap. XXV, line 88 will appear as "XXV.88" and *Rōma Aeterna* XL, line 50 will appear as "XL.50."

Rōma Aeterna can be approached in several ways. Ideally, the reader will make his or her way through the book at a comfortable pace, absorbing the Latin in the way Ørberg intended. This approach makes the most sense for an independent learner or for homeschooling. At the high school level, *Rōma Aeterna* could provide material for Latin III (Caps. XXXVI–XLV/XLVI) and IV (Caps. XLVI/XLVII–LVI), complementing Latin I and II (*Familia Rōmāna*). Those chapter breaks are somewhat arbitrary, but Cap. XXXVI provides an excellent review to begin the school year, as do either Cap. XLVI (Eutropius) or Cap. XLVII (Aulus Gellius). A two-year reading of *Rōma Aeterna* provides a rigorous program of Latin.

Using *Rōma Aeterna* for Review

In addition to the valuable Pensa at the close of each chapter, *Rōma Aeterna* supplies much material in itself to help students review. Sentences can be chosen and manipulated to remind students of the knowledge that might not be currently active in their minds. Here are some examples, for the sake of review, of different ways of construing a sentence:

> *At puer Ascanius ācrī equō vectus iam eōs praeterit aprum aut leōnem quaerēns.* (Cap. XL.51–53)

- Participle → relative clause

    ▷ *At puer Ascanius, qui ācrī equō vehebatur, iam eōs praeterit aprum aut leōnem quaerēns.*

- Participle → independent clause

  ▷ *At puer Ascanius ācrī equō vectus iam eōs praeterit <u>et</u> aprum aut leōnem <u>quaerit</u>.*

- Participle → causal clause

  ▷ *At puer Ascanius ācrī equō vectus iam eōs praeterit <u>quia</u>* (or *quod, propterea quod*) *aprum aut leōnem <u>quaerit</u>.*

- Participle → purpose (final) clause

  ▷ *At puer Ascanius ācrī equō vectus iam eōs praeterit ut aprum aut leōnem quaerat.*[4]

- Direct statement → indirect statement

  ▷ *Vergilius narrat puer<u>um</u> Ascani<u>um</u> ācrī equō vect<u>um</u> <u>tum</u> eōs <u>praeterīre</u> aprum aut leōnem quaer<u>entem</u>.*

- Direct statement → indirect question

  ▷ *Nescīmus cur puer Ascanius ācrī equō vectus ~~iam~~ eōs <u>praetereat</u> aprum aut leōnem quaerēns.*

- Direct statement → indirect command

  ▷ *Pater Aeneas puer<u>um</u> Ascanium <u>monet</u> <u>nē</u> ācrī equō vectus <u>sē</u> ~~iam~~ <u>praetereat</u> aprum aut leōnem quaerēns.*

  ▷ *Pater Aeneas puer<u>ō</u> Ascani<u>ō</u> <u>imperat</u> <u>nē</u> ācrī equō vectus <u>sē</u> ~~iam~~ <u>praetereat</u> aprum aut leōnem quaerēns.*

Students can be asked to find syntax covered in *Familia Rōmāna*, either singly or in groups.

Abridging *Rōma Aeterna*

Rōma Aeterna is clearly not a book that can be read in one course. For those who must abridge the book, there are a variety of ways in which *Rōma Aeterna* can be adapted. A selection might prove to be most useful for various environments, especially at the college level. The instructor will be able to pick and choose from the great wealth of material suitable for the intermediate level.

 If *Rōma Aeterna* is to be used following *Familia Rōmāna* in a course of unadapted Latin, some important syntax from the early chapters needs to be mastered. The full reading of the early chapters can be omitted, and the com-

panion can be used, in conjunction with the text, to teach the essential grammar. Cap. XXXVII, for example, can be used to review temporal clauses in addition to the new grammar. In teaching new grammar, it is helpful to use the examples in the Companion to go back to the text and read not only the sentence containing the new grammar but the context as well.

The instructor can choose an early chapter featuring necessary syntax as an introduction to the course and to essential grammar not found in Familia Rōmāna. The instructor can manipulate sentences to introduce concepts not found in the chapter. For example, in Cap. XXXVI we read the following about the gates of the temple of Janus (ll.101–105):

> *Illa aedēs duās iānuās vel portās habet, quae tum dēmum clauduntur cum per tōtum imperium populī Rōmānī terrā marīque pāx facta est—id quod per septingentōs annōs inter Rōmulum et Augustum bis tantum ēvenit.*

To demonstrate a few possibilities:

- *cum* circumstantial (Cap. XXXVII): The sentence above, as written, shows *cum* temporal with the indicative. Changed to circumstantial, it could read: *Cum Rōmānī bella gerant, iānuae aedis Iānī patent.*

- Descriptive relative clause (Cap. XXXIX): *Nēmō est quī velit portās aedis Iānī aperīrī.*

- Wishes (Cap. XXXIX): *Utinam pax fiat et portae aedis Iānī claudantur!*

Instead of, or in addition to, manipulating sentences, the instructor could pick out illustrative examples of the grammar to be mastered from the text. Of course, the instructor could just use the Companion to find sentences, but it is more natural to see the sentences in context, perhaps looking at what precedes and follows. For example, the first part of the sentence above could be used to demonstrate *cum* temporal with the indicative:

> *Illa aedēs duās iānuās vel portās habet, quae <u>tum</u> dēmum clauduntur <u>cum</u> per tōtum imperium populī Rōmānī terrā marīque pāx <u>facta</u> <u>est</u>.*

And compared to the following sentences from Cap. XXXVII:

> *Graecī enim, <u>cum</u> urbem vī expugnāre nōn <u>possent</u>, dolō ūsī sunt* (ll.23–24)

> *Trōiānī vērō, <u>cum</u> Graecōs Argōs in patriam suam āvectōs esse*
> *<u>arbitrārentur</u>, tum dēmum post tot annōs portās aperuērunt*
> *atque exīre ausī sunt.* (ll.30–32)

Another approach to abridging chapters uses excerpts from them in class as reading comprehension exercises. For example, Cap. XLI begins:

> *Iam prīmum omnium cōnstat Troiā captā Aenēam domō pro-*
> *fugum prīmō in Macedoniam vēnisse, inde in Siciliam dēlātum*
> *esse, ab Siciliā classe ad Laurentem agrum tenuisse. Ibi ēgressī*
> *Trōiānī, quibus ab immēnsō prope errōre nihil praeter arma*
> *et nāvēs supererat, cum praedam ex agrīs agerent, Latīnus rēx*
> *Aborīginēsque quī tum ea tenēbant loca, ad arcendam vim*
> *advenārum armātī ex urbe atque agrīs concurrunt.*

One way of approaching this passage without translating is to have students respond to questions. Projecting the text on a screen so that all are looking up and looking at it at the same time makes the exercise easier and quicker (and also saves you from seeing only the tops of students' heads). One way of doing this is:

1. Instructor reads aloud, slowly.

2. Student reads aloud, with (minimum) pronunciation correction from instructor.

3. Instructor reads aloud in a natural reading voice (that is, inflected for meaning).

Here is a sampling of questions to give a sense of things the instructor can ask (more examples, of course, can be gleaned from Pensum C):

- *Versū secundō, quid significat "cōnstat?"*
  - ▷ (*īnspice marginālia*)
- *Cur Aenēas profugus est?*
- *Quis Trōiam cēpit?*
  - ▷ (must be remembered from previous chapters)
- *Quo prīmō vēnit Aenēas?*
- *Ad quōs aliōs locōs vēnit Aenēas?*

- *Versū quintō quid significat tenēre? Quod vocābulum subaudītur?*
  - ▷ (*īnspice marginālia*)
- *Quid (versū quintō/sextō)* significat '*immēnsus error*'?
  - ▷ *Idem est ac 'magnum iter,' id est, Trōiānī errābant.*
- *Quid supererat iter/error?*
- *Quid significat 'praeda'?*
- *Quis est Latīnus?*
- *Dīc* (vv. 8–9) '*ad arcendam vim' aliō modō.*
  - ▷ (*īnspice marginālia*)
- *Dīc* (v. 8) '*loca tenēbant' aliō modō.*
  - ▷ e.g., *in illīs locīs habitābant*
- *Advena est nōmen commūne (id est: et masculīnum et feminīnum). De quibus duōbus vocābulīs venit?*
  - ▷ *ad + venīre*
- *Dīc 'virī armātī' aliīs verbīs.*
  - ▷ *virī quī arma gerunt/portant*, etc.

The chapters on Hannibal and the Second Punic War (Caps. XLVIII and XLIX) could be treated as a separate book or combined with the three chapters on the Romans in the East (L–LII). The three chapters on Cicero, with or without additional passages, would make a great reader.

The late Latin writers might be kept on their own or compared to earlier prose. When we have both Livy and the *periochae*, students can learn much about Livy's style by comparing the two—as well as get a sense of how much a tragedy the lost books of Livy presents.

The presentation of history offers a good sweep of the events of the foundation and growth of Rome during the Republic. Rōma Aeterna brings us from the mythological foundations (Aeneas) to Cicero's remarkable ideal of the *rēs pūblica* and his vision of the men who contributed to the state's flourishing. This scope cannot be achieved without abridging several books of Livy and at times focusing on a not particularly lively string of great men and their battles. An additional problem is the reliance on the *periochae* of Livy, the writing style of which is decidedly inferior to that of the historian himself. By presenting those chapters first and adding some extended passages (some of the highlights), the book would accomplish the goal of an overview of history while still engaging students in some interesting narratives. Supplementing the *periochae* in Cap. L with notable passages from Livy (perhaps in English) would enrich the narrative, for example:

Book XXXI.1: Livy on the long narrative of the war with Carthage and the transition to Macedon.

Book XXXI.7: Publius Sulpicius' speech on why the Romans should fight Philip (refers both to Hannibal and Pyrrhus).

Book XXXII.24: Flamininus attacks Elatia.

To the Student: Reading Long sentences

Consider the following sentence (Cap. XXXVI.10–15):

> *Palātium prīmum mūnītum est, sed ea moenia quadrāta,*
> *quibus Rōmulus, prīmus rēx Rōmānōrum, Palātium mūnīvisse*
> *dīcitur iam prīdem periērunt, neque ūlla casa restat ex illā*
> *urbe antīquissimā, quae ā fōrmā moenium 'Rōma quadrāta'*
> *appellābātur, praeter 'casam Rōmulī' strāmentō tēctam.*

What might seem daunting at first becomes simpler with rereading and compartmentalizing. Read through the sentence, taking note of <u>endings</u> and <u>structure markers</u>, such as:

- coordinating conjunctions (*et*, *atque/ac*, *sed*, *neque/nec*, *vel*, etc.)
- subordinating conjunctions (*antquam/postquam*, *cum*, *dum*, *si*, etc.)
- relative pronouns/relative clauses
- prepositional phrases
- words/phrases in apposition

Looking at endings and markers will help you determine the relationship of words to each other and the structure of the sentence. A single underline indicates subject (and its modifiers, including predicate nominatives and adjectives); a double marks the verb; words in **bold** are conjunctions and relative pronouns; parentheses mark prepositional phrases; and brackets mark off relative clauses:

> <u>*Palātium*</u> *prīmum* <u>*mūnītum est*</u>, **sed** <u>*ea*</u> <u>*moenia*</u> <u>*quadrāta*</u>, [**qui-**
> **bus** <u>*Rōmulus*</u>, <u>*prīmus*</u> <u>*rēx*</u> *Rōmānōrum*, *Palātium* <u>*mūnīvisse*</u>
> <u>*dīcitur*</u>] *iam prīdem* <u>*periērunt*</u>, **neque** <u>*ūlla*</u> <u>*casa*</u> <u>*restat*</u> (*ex illā*
> *urbe antīquissimā*), [**quae** (*ā fōrmā moenium*) *'*<u>*Rōma*</u> <u>*quadrāta*</u>*'*
> <u>*appellābātur*</u>], (*praeter 'casam Rōmulī' strāmentō tēctam*).

With practice you will be able to "mark" (parse) sentences in your head as you read. By reading through even a very long and complex sentence carefully several times, you can arrive at its meaning without translating. A few more suggestions:

- Latin sentences are not random—they are designed to move as they do, expressing meaning in the order the author chooses.

- Focus at first on structure and endings, *before* English meaning of the word. Often students will go through and identify vocabulary and then make up a meaning that seems to fit the context.

- Do not fret about relative pronouns that are not nominative or accusative (e.g., *quibus* above—you won't know that it's an ablative until you understand the rest of the clause). It is often impossible to determine what their role in the sentence is until you have reviewed the rest of the clause.

- Do <u>not</u> write out an English translation!

  ▷ Time consuming!

  ▷ You will make mistakes. Once you have written out your translation, it will make sense to you, and you will have a harder time understanding how it can be wrong.

  ▷ You will be tempted to look at your English instead of the Latin.

  ▷ You won't learn Latin by writing out and memorizing translations. You will learn Latin only by continuing to read Latin!

- Do <u>not</u> write the English meaning of a Latin word in your text! Your eye will go to the English, and you will learn nothing.

The following lengthy and complex sentence comes from Cicero's speech in Cap. LIV.56–64:

> *Quī posteā cum māximās aedificāsset ōrnāssetque classēs exercitūsque permagnōs quibuscumque ex gentibus potuisset comparāsset et sē Bosporānīs fīnitimīs suīs bellum īnferre similāret, usque in Hispāniam lēgātōs ac litterās mīsit ad eōs ducēs quibuscum tum bellum gerēbāmus, ut, cum duōbus in locīs disiūnctissimīs māximēque dīversīs ūnō cōnsiliō ā bīnīs hostium cōpiīs bellum terrā marīque gererētur, vōs ancipitī contentiōne districtī dē imperiō dīmicārētis.*

This complex period[5] can be made easier by separating out the subordinate clauses; the following dissection of the period is offered as an example, in which there are parentheses around phrases, brackets around clauses; the subject is underlined once and the verb twice; important reading signals are bolded. The order has been changed to reflect levels of subordination:

- *Quī* **posteā**
  - ▷ **cum** *māximās aedificāsset ōrnāsset**que** classēs exercitūs**que** permagnōs comparāsset*
    - *[quibuscumque (ex gentibus) potuisset]*
  - ▷ **et** *similāret*
    - *sē Bosporānīs fīnitimīs suīs bellum īnferre*
- *usque (in Hispāniam) lēgātōs* **ac** *litterās mīsit*
  - ▷ (*ad eōs ducēs*)
    - *[quibuscum tum bellum gerēbāmus]*
- **ut** *vōs ancipitī contentiōne districtī* (*dē imperiō*) *dīmicārētis*
  - ▷ **cum** (*duōbus in locīs disiūnctissimīs māximē**que** dīversīs*) *ūnō cōnsiliō* (*ā bīnīs hostium cōpiīs*) *bellum* (*terrā mar**īque***) *gererētur.*

Here is a rewritten simplification of the sentence:

> *Mithradātēs maximās classēs aedificāvit ōrnāvitque; exer-citusque permagnōs quibuscumque ex gentibus poterat com-parāvit; simulāvit sē Bosporānīs fīnitimīs suīs bellum īnferre. STYLE

Rōma Aeterna offers chronological glimpses into the history of the Roman Republic. The readings, however, fall into various genres: history (Livy, Sallust), historical epitome (Eutropius, *periochae*), oratory (Cicero), biography (Nepos), political philosophy (Cicero), and miscellany (Aulus Gellius).

---

5.   A period signifies a long, carefully constructed sentence, often marked by several sub-ordinate clauses, that generally does not complete the full thought until it has reached the end.

"Genre" stems from *genus*, "type"; genres are different categories of literature with particular stylistic expectations. The requirements of each genre differ, but each has its foundations in the principles of rhetoric. "Every speech, moreover," wrote Quintilian, "consists of content and words: discovery (*inventiō*) must focus on the matter at hand, expression (*ēlocūtiō*) in the choice of words, arrangement (*conlocātiō*) in both, which memory (*memoria*) holds in its grasp (and) the delivery (*āctiō*) distinguishes."[6] Although Quintilian was writing about oratory, his words are broadly applicable. Each writer devises an argument from his sources, picks what he wants to say (*inventiō*), and arranges the material (*conlocātiō* or *distribūtiō*). Each must then choose the best way of phrasing his thoughts (*ēlocūtio*, which also involves *conlocātiō*). Authors gave public readings of their works, and so, like the orator, the author needed to express himself not only with vocal intonation but also with appropriate gesture. Delivery was physically strenuous.

Despite public readings, some genres are directed more toward a listening audience and others toward readers. Livy's style, for example, is very different from that of Sallust. Quintilian calls Livy's smooth abundance "milky richness" (*illa Līuī lactea ūbertās*). He labels Sallust's style compressed and choppy—"*illa Sallustiāna brevitās et abruptum sermōnis genus*"—a style that would sail over the heads of listeners but be less likely to trip up a reader with plenty of time to digest his meaning ("*quod ōtiōsum fortasse lēctōrem minus fallat, audientem trānsuolat*"). You can notice for yourself the difference between works primarily meant to be heard instead of read when you read Cicero's speech for Pompey in Cap. LIV.

We should look for variation of style within a genre, even within the work of one author. Livy's books, for example, are usually talked about in "decades," referring not to time but to groups of books. Caps. XLI–XLV in your reading come from the first decade (indeed, from the first book) and are considered more poetic in style than the later books. You can decide what that might mean by comparing the styles for yourself.

Livy and Sallust differ in the goal of their history as well. Livy's continuous history begins from the foundation of the city (*ab Urbe Conditā*), while Sallust's history of the war with Jugurtha focuses on a political narrative of Rome's war against Numidia (111–105 BC). In contrast to both, Eutropius's fourth-century *Breviārium Historiae Rōmānae* aims to narrate the greatest amount of history as succinctly as possible (the *periochae* are brief, like the *Breviārium*, but their aim is to summarize Livy's *ab Urbe Conditā*).

6.   *Īnstitūtiō Ōrātōria* 8.preface: *Ōrātiōnem porrō omnem constāre rēbus et verbīs: in rēbus intuendam inventiōnem, in verbīs ēlocūtiōnem, in utrāque conlocātiōnem, quae memoria complecteretur, āctiō commendāret.*

All of our authors received training in rhetoric, sound principles applicable not only to speeches but to any kind of composition. Consider Cicero's statement (a bit fuller than that of Quintilian above) in a youthful work on rhetoric, *dē Inventiōne*: *inventiō* is the "thinking out" of things that are true or very like the truth, which can make the case credible; *dispositiō* is the orderly arrangement of those things that have been "thought out"; *ēlocūtiō* is the adapting of words and sentences to the material as thought out; *memoria* is the mind's solid grasp of the arguments and words pertaining to the material as thought out; *prōnuntiātiō* is the physical adaptation of the body to the voice in accordance with the dignity of the arguments and words.[7]

Sometimes we have other ancient sources with which to compare our texts and thus get some idea of the *inventiō* and *dispositiō* of our authors. For the most part, however, a narrower scope confines our evaluation of prose style: the *dispositiō* of material within a section of a work (What does the author include? What might he have included that he did not? What other ways might he have arranged it?) and the *ēlocūtiō*, or choice and arrangement of words and expression of ideas. As for performance, we have only our imaginations to help us. When reading, consider the arrangement of the material: How does Livy, for example, present episodes from early Roman history for their greatest dramatic effect? What details does he include, and in what order? How does he embellish the narrative? What view of Roman history does his work present?

You know by experience that, although Latin word order is much more fluid than that of English, there are definite patterns. The subject and its modifiers tend to come first (S), then the object and its modifiers (O), while the verb and its modifiers tend to come last (V). Latin word order can express emphasis in a way similar to that of the human voice. The emphatic parts of a sentence are the beginning and the end. A variety of ways of transposing natural word order, known as *hyperbaton* (Greek: ὑπερβατόν) or *trānsgressiō* (Latin), renders Latin flexible and pleasing. As Quintilian says, it's important to find the place in the sentence where words fit most effectively (*Īnstitūtiō Ōrātōria* 8.62).

Writers also made use of various figures of expression that call attention to language by altering accustomed usage. There were many handbooks of figures (*figūrae*, Latin; σχῆμα, Greek). The enumeration and elucidation of figures lie beyond the scope of this introduction, but some of them you can notice without formal training. For example, you will be able to mark in your reading lists

7. *Inventiō est excōgitātiō rērum vērārum aut vērī similium, quae causam probābilem reddant; dispositiō est rērum inventārum in ōrdinem distribūtiō; ēlocūtiō est idōneōrum verbōrum [et sententiārum] ad inventiōnem accommodātiō; memoria est firma animī rērum ac verbōrum ad inventiōnem perceptiō; prōnūntiātiō est ex rērum et verbōrum dignitāte vōcis et corporis moderātiō.*

without conjunctions (asyndeton) or lists with an abundance of conjunctions (polysyndeton).

The best way to determine the prose style of an author is to, first, pay attention to the way each author expresses himself and then compare the mode of one with another. And the best way to know how an author expresses himself is to ask questions. Professor Timothy J. Moore, the John and Penelope Biggs Distinguished Professor of Classics at Washington University in St. Louis, kindly has permitted me to reprint his checklist for considering Latin prose style (below).

Rōma Aeterna gives you a variety of prose styles that will greatly enhance your appreciation of Latin verse: once you are familiar with the way prose authors tend to write, you will be able to see how much word order contributes to the beauty of poetry, whose word choice and word order is more varied than that of prose.

Stylistic Analysis of Latin Prose: A Checklist

I. Morphology and Orthography

- What choices has the author made between alternate forms and spelling (e.g., *ere* or *erunt* in the 3rd plural perfect active indicative; *is* or *es* in the accusative plural 3rd declension)?

- Are any forms or spelling used which you might not expect in a prose author of this period (e.g., *quum* for *cum*, *qui* for *quo*)?

II. Diction

- Are words or phrases used here which are rare elsewhere in this author? in this period? in this genre? in prose? in Latin?

- Are there words or phrases which seem to reflect the formulaic language of law, diplomacy, government, or religion?

- Are there words or phrases which seem archaic, poetic, or colloquial?

- Are any words or phrases repeated in the passage, or is diction deliberately varied?

- To what extent does the author use metaphorical expressions?

- Are any expressions particularly effective in their imagery?

- What words does the author choose to make transitions from one sentence to another?

- Does the author prefer abstract or concrete nouns?

- What choices has the author made between synonyms?

III. Syntax

- What syntactical features stand out (e.g., historical infinitives, impersonal passives, repeated grammatical elements)?

- Which sentences are long, which short?

- How are the longer sentences constructed?

  - ▷ Are clauses strung along paratactically, or hypotactically?

  - ▷ How are clauses subordinated (e.g., with participles, or with conjunctions)?

  - ▷ Which thoughts occur in the main clauses, which in subordinate clauses?

  - ▷ Do the clauses follow one another by an easily comprehensible logic, or must the reader work to piece the sentences together?

  - ▷ Are the sentences "periodic," i.e., longer, carefully constructed sentences whose full meaning is kept somewhat in suspense until the end of the sentence?

  - ▷ How are clauses arranged according to rhythm and length?

  - ▷ Has the author placed the longest clauses last?

  - ▷ Does the author show concern for the rhythm of phrases, especially the last phrase of each sentence (clausula)?

  - ▷ Does the author use pairs, tricola, or other numbers of clauses?

  - ▷ To what extent does the author use parallelism in arranging his clauses?

- Word order

  - ▷ How are words, phrases, and clauses arranged for emphasis? Remember that the first and last positions in the sentence are most emphatic.

  - ▷ What other effects has the author produced through manipulation of the order of words (e.g., juxtaposition of contrasting words, hyperbaton, chiasmus)?

IV. General

- Does the passage provide echoes of previous authors in diction or phraseology? Do these echoes seem to be deliberate or unconscious?

- Has the author said only what is necessary to make his point (*brevitas*), or are unnecessary words, phrases, and sentences added (*copia*)?

- Reported speech

  ▷ Which speeches in the passage are reported indirectly, which directly?

  ▷ To what extent are the syntax and diction of the speeches manipulated to characterize speakers?

- Aside from reported speeches, does the author provide the perspective of anyone besides himself (e.g., through descriptions of reactions)?

- Does the author use any rhetorical tropes (e.g., anaphora, apostrophe, asyndeton, zeugma)?

V. What Is the Effect of All This?

Subordinate Clauses in Indirect Discourse

When an indirect discourse (known as *ōrātiō oblīqua*)[2] contains a subordinate relative clause, the verb in that clause will be in the subjunctive,[3] following the rule you learned in Cap. XXVIII, repeated here.

> If the main verb is <u>primary</u> (present, future, sometimes perfect),[4] the verb in the subordinate subjunctive clause will be either <u>present</u> (incomplete action) or <u>perfect</u> (completed action).

> If the main verb is <u>secondary</u> (imperfect, perfect, pluperfect), the verb in the subordinate subjunctive clause will be either <u>imperfect</u> (incomplete action) or <u>pluperfect</u> (completed action). Secondary sequence is also called historical, that is, referring to the past.

---

1. For an explanation of the line number references convention, see p. xxvi.

2. That is, an indirect statement, which you first learned as the accusative and infinitive construction.

3. The verb can be in the indicative even in indirect statement, when the speaker wishes to stress the factual basis of the clause or when the clause just explains something in the indirect statement (so doesn't really belong to the indirect statement).

4. When the perfect tense emphasizes the current state resulting from the action, it is a primary tense; e.g., *fenestra clausa est*: the window has been closed (secondary) the window is closed (primary).

In table form:

Main Clause Verb(s)	Subordinate Clause Verb(s)	
	Incomplete Action	Completed Action
Primary Tense	Present Subjunctive	Perfect Subjunctive
Secondary Tense	Imperfect Subjunctive	Pluperfect Subjunctive

E.g.:

> [Augustus] glōriātus sit 'marmoream sē relinquere urbem
> quam latericiam accēpisset' (ll.229–230)

Accēpisset is

subjunctive because:

- it is the verb in a subordinate clause in indirect statement introduced by *glōriātus sit.*

pluperfect because:

- the main verb *glōriātus sit* is perfect.
- the action of the subordinate verb (*accēpisset*) is prior (completed) to the action of the main verb.

Dative of Purpose (*datīvus fīnālis*)

Latin can combine two datives, a dative of purpose (*datīvus fīnālis*) and a dative of reference, into a construction called "double dative." Most often the double dative is found with a form of the verb *esse*. In this chapter, we see it with *venīre*:

> [*Castor et Pollux*] *saepius <u>Rōmānīs</u> in proeliīs <u>auxiliō</u> vēnērunt.*
> (ll.139–140)

The dative *auxiliō* shows for what <u>purpose</u> Castor and Pollux have come, and the dative *Rōmānīs* shows the people <u>for</u> <u>whom</u> they have come. *Auxiliō* is one of the words commonly found in the double dative. Some other examples of the double dative are:

> *cui bonō est?*: for whom (*cui*: reference) is it good/an advantage
>   (*bonō*: purpose)?

> *praesidiō exercituī esse*: to be a source of protection (*praesidiō*:
>   purpose) to the army (*exercituī*: reference)

II. Rēs Grammaticae Fūsius Explicātae: Expansion and Refinement of Syntax Introduced Elsewhere

Gerund/Gerundive

You first met the <u>gerund</u>, or verbal noun, in Cap. XXV:

> *Ibi nāvis mea parāta est ad nāvigandum* (XXV.93–94): "for sailing"
>
> *Parāta sum ad fugiendum* (XXV.97)

In addition to *ad* + the accusative of the gerund to express purpose (as above), the gerund is found in the genitive, dative,[5] and as an ablative of cause or, as below, of means:

> *Rōmānī cotīdiē in thermās illās celebrēs lavātum eunt atque ibīdem corpora exercent natandō, currendō, luctandō* (ll.247–249): "…They exercise by swimming, running, wrestling."[6]

You first met the <u>gerundive</u>, or verbal adjective, in Cap. XXXI. There you learned that the gerund<u>ive</u> is a pass<u>ive</u> adjec<u>tive</u> that expresses an action that the noun is suited for or fit for, e.g.:

> *Vīvant omnēs fēminae amandae* (XXXI.172–173): *amandae* here means "lovable," "fit to be loved."

The gerundive can also be joined with a form of the verb "to be," a construction which indicates something that is to be done. This construction, often called the passive periphrastic, can be impersonal (the first example below) and personal (the second example):

> *In summā Sacrā viā īnfrā clīvum Palātīnum est arcus Titī, dē quō mox <u>dīcendum</u> <u>erit</u>* (ll.171–172):
>> *dīcendum est* is impersonal: literally the relative clause means, "about which there <u>will</u> soon <u>have</u> <u>to</u> <u>be</u> <u>a</u> <u>speaking</u>."

---

5.   The gerund is rare in the dative case.

6.   In the example above, *lavātum* is a **SUPINE** (Cap. XXII). *Lavātum eunt* means (literally) "they go for the purpose of washing" or, in better English, "they go to wash."

> *Inter cētera Domitiānī opera memorandum est stadium in campō
> Mārtiō factum* (ll.318–319):
>
>> "Among the rest of Domitian's works, the <u>running</u> <u>track</u>
>> made in the Campus Martius <u>must</u> <u>be</u> <u>mentioned</u>
>> (*stadium memorandum est*)."

We also see the gerundive used in this way—expressing what is to be done to something—when used with the object of certain verbs. In this chapter, we see several examples of the gerundive used with the object of *cūrāre*:

> *Pompēius…theātrum aedificandum cūrāvit* (ll.196–197): Pom-
> pey "attended to a theatre which was to be built" conveys
> roughly the same idea as *Pompeius cūrāvit ut theātrum
> aedificārētur.*
>
> *viam Appiam mūniendam cūrāvit* (l.253)
>
> *novum forum faciendum cūrāvit* (l.325)

In Cap. XXXVII, you'll see the same construction with the verbs *dare* and *offerre*:

> [*Euandrō*] *Faunus…arva colenda dedit.* (ll.12–14)
>
> *Tum subitō māter Venus…fīliō sē videndam obtulit.* (ll.186–187)

Dīcitur and *nārrātur* with Nominative + Infinitive Perfect

In Cap. XIII, you learned that with passive verbs of speaking, hearing, etc.,[7] we find nominative and infinitive instead of accusative and infinitive:

> *Lūna 'nova' esse dīcitur* (XIII.52, "the moon is said to be 'new'")

In this chapter, we find the same construction with the perfect infinitive. The passives *dīcitur* and *nārrātur* with nominative and infinitive perfect state what is reported to have taken place, e.g.:

> *Rōmulus…Palātium mūnīvisse dīcitur* (ll.11–12): "Romulus…is
> said to have fortified the Palatine."
>
> *quī sē…praecipitāvisse nārrātur* (ll.65–66)
>
> *ōlim rēgēs Rōmānī habitāvisse dīcuntur* (ll.117–118)

---

7.   That is, the verbs that will introduce an accusative and infinitive construction.

> *Aedēs Concordiae antīqua eō tempore aedificāta esse dīcitur.*
> (ll.147–148)

> *gēns Iūlia ā Venere orta esse dīcitur* (ll.209–210)

> *Nerō…dīcitur iniisse domesticam scaenam et cecinisse Trōiae*
> *incendium.* (ll.266–269)

The same construction is seen with other verbs that introduce indirect statement:

> *Templum Mārtis Ultōris nōminātum est, quod ille deus mortem*
> *Caesaris ultus esse pūtābatur.* (ll.221–223)

Ablative of Place

Although place where is usually expressed by the ablative with a preposition, in a few phrases in Latin, the preposition *in* is not used. One of these phrases is:

> *terrā marīque* (l.103, "on land and sea")

Ablative of Separation (*ablātīvus sēparātiōnis*)

The ablative of separation[8] is generally found with a preposition. There are many instances, however, when the ablative alone (without a preposition) is used for separation:

> *Mēdus surgere cōnātur, nec vērō sē <u>locō</u> movēre potest.*
> (XVI.140–141)

> *Īnfāns neque <u>somnō</u> neque <u>cibō</u> carēre potest* (XX.5–6)

> *Iūlia dīcit "sē <u>patre</u> <u>suō</u> carēre nōlle."* (XX.140–141)

> *servīs meīs imperābō ut tē <u>agrīs</u> <u>meīs</u> pellant* (XXVII.89)

> *<u>servitūte</u> līberābantur* (XXXII.6)

In this chapter, we find more examples of the ablative of separation without a preposition:

> *…tōta vallis…<u>domibus</u> vacua facta esset* (ll.277–278)

> *Iuppiter, <u>arce</u> <u>suā</u> cum tōtum spectat in orbem* (l.362): "from his
> citadel."

---

8.   Caps. VI, XVI, XX, XXVII, XXXII.

Comparison of Adjectives

In this chapter, we meet adjectives whose comparatives and/or superlatives deviate from the general rule.[9] These forms follow rules as well (which are given only when of practical use):

> *Magnificus, -a, -um:*
>> comparative: *magnificentior* (ll.44, 245)
>> superlative: *magnificentissimus* (l.19)
>
> *vetus* (stem *veter-*):[10]
>> superlative: *veterrimus* (l.100)

Adjectives in *-eus*, *-ius*, and *-uus* (except *-quus)* are compared using *magis* and *māximē*:

> *magis necessārius*
> *māximē idōneus*
> *māximē arduus* (l.27)

III. Dēmonstrātiō Verbōrum: Explanation of Words and Phrases at the Lexical Level

Vēnīre, vēndĕre ‖ perīre, perdĕre

The verb *vēn-īre* ("to be sold") serves as passive of *vēn-dere* ("to sell"). The two verbs are compounds of *īre* and *dare* with *vēnum*, "sale," so *vēnīre*[11] means "to go to sale" or "be sold" and *vēndere* means "to give to sale" or "sell."

> *Nunc autem mercēs in vīcīs et in aliīs forīs vēneunt* (ll.75–76):
>> "Now however, merchandise is sold in the streets (i.e., neighborhoods) and in other squares."
>
> *…bovēs aliaeque pecudēs vēneunt* (ll.177–178): "are sold"

---

9.   Caps. XII, XIII, XVIII (including Rēcēnsiō), XIX, XXIV.

10.   *Vetus* ("old") is a 3rd declension adjective (Cap. XXXI) of one termination (Cap. XIX).

11.   *Vēnīre*, "to sell," is distinguished from *vĕnīre*, "to come," by the long vowel in the present system. (In the perfect system, *vĕnīre* also has a long vowel in the stem [*vēnisse*], but context easily gives the sense.)

You have met another pair of verbs that works the same way: *perdere* (Cap. XXIII) and *perīre* (Cap. XXVII). *Perīre*, "to be destroyed," is the passive of *perdere*, "to destroy":

> *Nōnne tibi satis fuit vestem tuam novam perdere?* (XXIII.72–73)
>
> *Nōlō pecūniam meam perdere!* (XXIII.146–147)
>
> *"Pereat quī nescit amāre! Bis tantō pereat quisquis amāre vetat!"* (XXXI.196–197)
>
> *Nec omnēs īnfantēs expositī pereunt* (XXXI.148)

Fierī potest

The regular way in Latin to say "is possible" is *fierī potest*, literally "it is able to become/happen":[12]

> *tantīs dīvitiīs exōrnāvit ut nihil magnificentius fierī posset* (ll.43–44)
>
> *neque vērō id sine auxiliō deōrum, praecipuē Mārtis, fierī posse arbitrābātur* (l.213)

Both of these sentences are completed by a direct object (*nihil*, *id*), but *fierī posse* can also be completed by a noun clause:

> *fierī potest ut*: "it is possible (that)"
> *non fierī potest ut*: "it is impossible (that)"

1st Declension Dative/Ablative in *-ābus*

In Cap. XIV, you learned that the dative and ablative plural of *duo, duae, duo* is *duōbus, duābus, duōbus*. The ending *-ābus* also distinguishes the gender of two easily confused nouns: *deus/dea* and *fīlius/fīlia*. The ending *-ābus* in dative and ablative plural of *dea* and *fīlia* makes it possible to distinguish between the feminine and masculine:

> *Iūnōnī et Minervae, <u>duābus</u> māximīs <u>deābus</u>* (ll.39–40)
>
> *Sex virginēs Vestālēs ex <u>fīliābus</u> Rōmānōrum illūstrium* (ll.111–112)
>
> *porticus duodecim diīs et <u>deābus</u> cōnsecrāta* (ll.160–161)

---

12.   *Possibilis, possibile* first appears in Quintilian (first century AD) to translate the Greek δυνατόν; it does not, in classical Latin, replace *fierī posse*.

Summus, medius, infimus

The adjectives *summus* ("top of"), *medius* ("middle of"), and *īnfimus* ("bottom of") agree with their noun:

> *medius*
>> *in mediō marī*: "in the middle of the sea"
>> *in mediō forō* (ll.63, 329)

> *summus*
>> *summum Iāniculum* (l.26): "the top of Janiculum"
>> *in summā Arce* (l.53)
>> *in summā Sacrā viā* (l.171)
>> *in summā columnā* (l.336)

> *īnfimus*
>> *in īnfimō Capitōliō* (ll.55–56): "at the foot of the Capitol"
>> *ad īnfimum Argīlētum* (l.100)

IV. Recēnsiō: Review Material

Genitive of Description (*genetīvus quālitātis*)

You met the genitive of quality/description in Cap. XIX. A noun and adjective in the genitive case add a qualifying description, often giving details of number or measurement:

> *Quīntus est puer <u>septem</u> <u>annōrum</u>*. (XIX.33–34)
>
> *adulēscēns <u>vīgintī</u> <u>duōrum</u> <u>annōrum</u> erat* (XIX.39–40)

In this chapter, we meet more examples, also detailing measurement:

> *opus arcuātum <u>passuum</u> <u>sexāgintā</u>* (ll.257–258)
>
> *…habet longitūdinem <u>passuum</u> <u>quadrāgintā</u> <u>sex</u> <u>mīlium</u> <u>quadringentōrum</u> <u>sex</u>* (ll.260–261)

Ut Clauses

The two-letter *ut* offers several interpretative possibilities, three included in this chapter:

Adverb of manner (Cap. IX) (see also *ut…ita*: Cap. XIX)

> *Nec vērō 'arx' nōmen huius montis proprium est, nam aliī quoque montēs arduī nātūrā et opere mūnītī 'arcēs' dīcuntur, **ut** summum Iāniculum, quod trāns Tiberim situm est.* (ll.23–26)

> *Caesar enim, **ut** plērīque prīncipēs Rōmānī, post mortem in deōrum numerō habētur et 'dīvus' vocātur.* (ll.123–124)

> *Hoc templum antīquissimum SENATVS POPVLVSQVE RO-MANVS INCENDIO CONSVMPTVM RESTITVIT, **ut** in fronte īnscrīptum est.* (ll.134–137)

> *Multae viae ex omnibus urbis partibus in forum ferunt, **ut** Argīlētum, Sacra via, Nova via* (ll.166–167)

> *…**ut** versibus nārrat Ovidius* (l.184)

> *…**ut** suprā dictum est* (ll.317–318)

Purpose clauses (Cap. XXVIII)

> *Ad hoc templum imperātor victor post triumphum ascendit, **ut** Iovī Optimō Māximō sacrificium faciat.* (ll.48–50)

> *Multī ōrātōrēs illūstrēs in Rōstra ascendērunt, **ut** ōrātiōnēs ad populum habērent.* (ll.91–93)

Result clauses (Cap. XXIX)

> *Postrēmō Domitiānus templum Iovis Capitōlīnī incendiō cōnsūmptum refēcit atque **tantīs** dīvitiīs exōrnāvit **ut** nihil magnificentius fierī posset* (ll.42–44).

Meter

There is a good amount of original verse in this and the following chapters. You should review Cap. XXXIV before proceeding. Here, to assist you in learning to read two common Latin meters, are some of the lines scanned:

> ll.164–165: dactylic hexameter
>
> *Iūnō, Vēstă, Mĭnērvă, Cĕrēs, Dīānă, Vĕnūs, Mārs,*
> *Mērcŭrĭūs, Iŏvĭ', Nēptūnūs, Vulcānŭs, Ăpōllō.*[13]

> ll.182–183: elegiac couplet

> *cōnstĭtŭītquĕ sĭbī quaē 'Māxĭmă' dīcĭtŭr ārām* (hexameter)
> *hīc ŭbĭ pārs ūrbīs ‖ dē bŏvĕ nōmĕn hăbēt* (pentameter)

V. Points of Style: Information about the Language of the Author under Consideration

Accumulation of Genitives

A genitive can depend on another genitive. A good example can be seen in the expression:

> *cum multitūdine <u>omnis</u> <u>generis</u> <u>pecudum</u> ac <u>ferārum</u>* (ll.286–287)

The genitive of description *omnis generis* qualifies *pecudum ac ferārum*, which are partitive genitives: a great number of farm animal and wild animals (partitive) of every type (quality/description).

---

13. Although *Iūppiter* is the usual nominative, *Iovis* is also occasionally found. At the time that Ennius was writing (turn of the third to the second century BC), the final *s* was often unpronounced if the next word began with a consonant.

Historical Present

In an account of past or "historical" events, the verbs are normally in the past tense or preterite (whether perfect, imperfect, or pluperfect). Occasionally, the present tense (called the "historical present") is used in main clauses to make the description more vivid and dramatic. The tense in dependent clauses is often past (and always past when the conjunction is *cum*). English conversation often employs a vivid present as well, switching from the past to the present for vivid and dramatic narration: "We were finished eating when we heard a noise. So I go outside to see what is happening. And I hear more noises. And then I see…"

The narration of the serpents attacking *Lāocoōn* in line 53 and those following opens with a perfect tense (*turbātī sunt*) but then moves to the historical present: *natant*, *prōspiciunt*, *petunt*, *edunt*, etc. Note that the preterite returns in the dependent clauses, an acknowledgment that the action takes place in the past:[2]

> *Cum terram attigissent…Trōiānōs perterritōs prōspiciunt* (ll.57–58)

> *…tum patrem ipsum, quī miserīs fīliīs auxiliō veniēbat, corripiunt* (ll.60–61)

---

1. For an explanation of the line number references convention, see p. xxvi.

2. The use of secondary tenses (imperfect and pluperfect subjunctive), does not, therefore, break the rule for the Sequence of Tense as outlined in Cap. XXXVI.

Origin (*ablātīvus orīginis*)

The ablative of source or origin is a subset of the ablative of separation.

> *Anchīsā et <u>Venere</u> deā nātus* (l.91): "born 'from' Anchises and Venus"

> *nāte <u>deā</u>* (l.99): "born of/from a goddess"

Origin (*ablātīvus causālis*)

The ablative of cause is used without a preposition, often with verbs of emotion; it is a subset of the ablative of means.[3]

> *īrā permōtus* (l.169): "moved by anger"

II. Rēs Grammaticae Fūsius Explicātae

Temporal Conjunctions

Dum

The conjunction *dum* (first introduced in Cap. X) generally takes the present tense (indicative),[4] even if the main clause is in the preterite:

> *<u>Dum</u> Latīnus in Italiā in pāce diūturnā <u>rēgnat</u>, Trōia seu Īlium, clārissima Asiae urbs, post bellum decem annōrum tandem ā Graecīs <u>capta</u> <u>est</u>.* (ll.21–23)

> *Ita <u>dum</u> populus incertus in contrāriās sententiās <u>dīviditur</u>, Lāocoōn, Neptunī sacerdōs, ab summā arce dēcurrēns cīvēs suōs <u>monuit</u> nē Danaīs cōnfīderent.* (ll.41–43)

> *<u>Dum</u> Lāocoōn ad āram taurum <u>immolat</u>, subitō duo anguēs ingentēs ab īnsulā Tenedō per mare tranquillum ad lītus <u>natant</u>.* (ll.54–56)

> *<u>Dum</u> haec <u>aguntur</u>, Trōiānī sine cūrā <u>dormiēbant</u>.* (l.90)

> *Ergō parte mūrōrum dēstrūctā māchina illa hostibus armātīs plēna magnō labōre in urbem trahitur fūnibus, <u>dum</u> puerī*

---

3.   Cf. Cap. XXVI: the gerund can be used as an ablative of means or emotion: *fessus sum ambulāndō*, XXVI.24.

4.   In Cap. XLI, you will learn that the conjunction *dum* can also take the subjunctive, when it looks toward a future action that it anticipated ("until," "long enough for").

*puellaeque carmina sacra <u>canunt</u> et fūnem manū contingere
    <u>gaudent</u>.* (ll.72–75)

*Quā rē perturbātus <u>dum</u> Aenēās celeriter ē nōtā viā <u>discēdit</u>,
    Creūsa incerta <u>cōnstitit</u> neque marītum aberrantem sequī
    <u>potuit</u>.* (ll.251–253)

*Tālia dīcēns fīxus eōdem locō <u>haerēbat</u>, <u>dum</u> fīlius et parvus
    nepōs omnisque domus multīs cum lacrimīs eī <u>suādent</u> 'nē
    omnēs suōs sēcum perderet'* (ll.199–202)[5]

Ubi

We have already seen *ubi* as a temporal conjunction with the indicative in the combination *ubi prīmum* (= *cum prīmum*, "as soon as"):

<u>Ubi</u> <u>prīmum</u> redēmptus est, ipse nāvēs armāvit.
    (XXXII.175–177)

*sed <u>ubi</u> <u>prīmum</u> equum ligneum in lītore collocātum vīdērunt,
    stupentēs cōnstitērunt et mōlem equī mīrābantur.* (ll.34–36)

Ubi by itself can also mean "when," as we see in this chapter:

*<u>Ubi</u> iam ad antīquam domum patriam pervēnit, Anchīsēs
    pater…ex patriā captā fugere recūsāvit.* (ll.193–195)

*Haec <u>ubi</u> dicta dedit, lacrimantem et multa volentem / dīcere
    dēseruit, tenuēsque recessit in aurās.* (ll.276–277)

Ut

The conjunction *ut* and *ut prīmum* may be used in the same way as *ubi* and *ubi prīmum*:

*Rēx Priamus senex, <u>ut</u> <u>prīmum</u> forēs frāctās et hostēs in mediīs
    aedibus vīdit, manibus īnfīrmīs arma capit.* (ll.150–151)

*Ut Aenēam cōnspexit venientem et arma Trōiāna agnōvit,
    rē incrēdibilī exterrita palluit animusque eam relīquit.*
    (XXXVIII.83–85)

---

5.   In this last example, the verb in the indirect command (*perderet*) is in secondary sequence, even though *suādent* is in the present. The main verb (*haerēbat*) is past, and the sequence follows the main verb (instead of the subordinate *dum* clause).

Priusquam and *antequam*[6]

You first met *priusquam* in Cap. XXXI. There it was used with the future perfect indicative:

> *Profectō eum verberābō atque omnibus modīs cruciābō, sī eum invēnerō <u>priusquam</u> Italiam <u>relīquerit</u>.* (XXXI.63–65)

> *Neque enim mihi fās est rēs sacrās tangere <u>priusquam</u> manūs caede cruentās flūmine vīvō lāverō.* (XXXVII.238–240)

Like *postquam*, however, *priusquam* is often found with the perfect, just like *antequam*:[7]

> *Caesar autem, <u>priusquam</u> ita <u>necātus est</u>, nōn sōlum vetera opera refēcerat, sed etiam nova cōnstituerat.* (XXXVI.204–205)

> *Ergō Mārtī deō templum vōvit <u>priusquam</u> proelium <u>commīsit</u> cum Brūtō et Cassiō.* (XXXVI.213–215)

> *<u>Antequam</u> illae basilicae <u>exstrūctae</u> <u>sunt</u>, tabernae in forō erant…* (XXXVI.72–73)

Priusquam, *antequam*, and *postquam* are often split:

> *Nec <u>prius</u> respexit <u>quam</u> ad tumulum templumque Cereris pervēnit.* (XXXVII.253–255)

> *…tum omnem gregem in silvam ēgit, nec <u>prius</u> dēstitit <u>quam</u> septem ingentia corpora humī iacēbant.* (XXXIX.71–72)

> *Sed velim <u>prius</u> terra mē dēvoret vel Iuppiter mē fulmine percutiat, <u>quam</u> pudōrem solvō aut fidem fallō.*[8] (XL.15–17)

Cum

The conjunction *cum* (Cap. XXIX) is both temporal and causal and merits a fuller explanation than the conjunctions above.

Cum is followed by the **indicative** when it:

> refers to the present or future and means "when" (often almost the same as "if"):

---

6. In Cap. XLII you will learn that *antequam* and *priusquam* also take the subjunctive.

7. Cap. XV. Note that *antequam* and *priusquam* can also take the present tense in positive sentences (i.e., those without a negative).

8. The present tense with *antequam/priusquam* is rare.

> *Cum avis volat, ālae moventur.* (X.15)
>
> *Cum syllabae iunguntur, vocābula fiunt.* (XVIII.29)
>
> *Cum vocābula coniunguntur, sententiae fiunt.*
>   (XVIII.29–30)

refers strictly to "the time when"; you will sometimes find temporal markers in the sentence as well (e.g., *eō tempore*, *tum*, *tunc*, *iam*, etc.):

> *Quī nūper Athēnās vēnerat neque ibi fuerat <u>cum</u> urbs ā
>   rēge Mīnōe expugnāta est.* (XXV.52–53)
>
> *Aedēs Concordiae antīqua <u>eō</u> <u>tempore</u> aedificāta esse
>   dīcitur <u>cum</u> post longam discordiam quae populum
>   Rōmānum dīvīserat in duās factiōnēs.* (XXXVI.147–149)

refers to repeated action (*cum iterātīvum*) and means "when" in the sense of "whenever" (Cap. XXIX):

> *Semper gaudeō <u>cum</u> dē līberīs meīs cōgitō.* (XXIX.47)
>
> *…tū numquam mē salūtābās, <u>cum</u> mē vidēbās*
>   (XIX.99–100)

signals that the focus of the sentence is the *cum* clause, not the main clause; the *cum* clause in this construction, called *cum inversum*, follows the main clause and often marks a sudden occurrence:[9]

> *Tālia exclāmāns omnem domum gemitū complēbat—<u>cum</u>
>   subitō mīrābile prōdigium vīsum est.* (ll.218–219)
>
> *Iam portīs appropinquābant atque salvī esse vidēbantur,
>   <u>cum</u> Anchīsēs per umbram prōspiciēns "Fuge, mī fīlī!"
>   exclāmat.* (ll.248–250)

Cum is followed by the **subjunctive** when it refers to:

the circumstances (*cum* circumstantial): the clause tells us
what took place at the same time as (imperfect) or previous
to (pluperfect) something else, as in this example:

> *<u>Cum</u> iam sōl <u>occidisset</u> et nox obscūra terram <u>tegeret</u>,
>   Trōiānī fessī somnō sē dedērunt.* (ll.83–84)

---

9.   Compare the force of the two English sentences: "When I was reading, the phone rang,"
and "I was reading when the phone rang." In both sentences, the focus of the sentence is on
the phone ringing.

Occidisset shows prior time—the sun <u>had</u> <u>set</u>—while *tegeret* shows the night <u>was</u> <u>covering</u> the earth at the same time as the Trojans went to sleep.

the cause (*cum causāle*): when the *cum* clause explains the reason (can take any tense of the subjunctive):

> *Graecī enim, <u>cum</u> urbem vī expugnāre nōn <u>possent</u>, dolō ūsī sunt.* (ll.23–24)

> *nunc omnis aura, omnis sonus terret, <u>cum</u> pariter fīliō patrīque <u>timeat</u>* (l.247)

concessive/adversative: when *cum* means "although" (often *tamen* is found in the main clause). Otherwise, context will show whether *cum* is adversative.

Noun Clauses of Result

In Cap. XXVII, you learned about subjunctive noun clauses with *verba cūrandī*, such as *facere ut* and *efficere ut*. These clauses are consecutive and explanatory: they grow out of and explain their introductory words. *Mōs est ut* will also introduce a noun clause of result:

> <u>mōs</u> Rōmānōrum <u>est</u> <u>ut</u> mēnse Decembrī diēbus fēstīs quī dīcuntur Sāturnālia servī in convīviīs cum dominīs <u>discumbant</u>. (XXXVII.6–8)

The clause *ut discumbant* explains what the custom (*mōs*) is. Some other examples of phrases that are followed by these clauses are:

> *accidit ut*: "it happens that" (perfect: *accīdit ut*, "it happened that")
> *ēvenit ut*: "it turns out, results that" (perfect: *evēnit ut*, "it turned out that")
> *fit ut*: "it happens that"
> *fierī potest ut*: "it is possible that"

Alternate 2nd Person Singular Ending *-re* = *-ris*

The 2nd person singular passive has an alternate ending *-re* instead of *-ris*. Hecuba ends her summons to Priam to take refuge by the altar with these words:

> *Haec āra tuēbitur omnēs—aut moriēre simul!* (ll.158–159)

The *ē* of *moriēre* is long because *moriēre* is the future tense of the deponent verb *morī*, while *moriĕre* would be the present tense.

Possibilities for a verb ending in *-ēre* (remember to check for contextual clues!):

 All conjugations

  3rd person plural perfect active indicative (alternate ending: see Cap. XXXIX, XLII):

- *conticuēre* (XXXIX.304) = *conticuērunt* (syncopated ending)

 2nd conjugation

  present active infinitive:

- *habēre*: "to have"
- *movēre*: "to move"

  2nd person singular present passive/deponent:

- *habēre*: "you are considered"[10] = *habēris*
- *cōnfitēre*: "you confess" (deponent: *cōnfitērī*) = *cōnfitēris*

  present passive/deponent imperative, singular:

- *cōnfitēre*: "confess!"

 3rd conjugation

  2nd person singular future passive/deponent:

- *sequēre*: "you will follow" = *sequēris*
- *moriēre*: *"you will die"* = *moriēris*
- *amplectēre*: "you will embrace" = *amplectēris*

Possibilities for a verb ending in *-ere* (3rd conjugation)

 present active infinitive:

  īnspicere: "to examine"

  corripere: "to seize"

 2nd person singular present passive/deponent:

  corripere: "you are being seized" = *corriperis*

  sequere: "you are following" = *sequeris*

  moriere: "you are dying" = *morieris*

  amplectere: "you are embracing" = *amplecteris*

---

10. Remember that *habērī* (Cap. XXVIII) often means "be held," "be considered." Cf. XXXVI.30, 125.

present passive/deponent imperative, singular:

> *sequere*: "follow!"
>
> *amplectere*: "embrace!"

Greek Names

1. In *-ās* (e.g., *Aenēās*), most follow the 1st declension in Latin:

acc.	*-am* or *-an*	*Aenēam* (or *Aenēan*)
gen./dat.	*-ae*	*Aenēae*
abl.	*-ā*	*Aenēā*
voc.	*-ā*	*Aenēā*

Most (e.g., *Herculēs*, *Achillēs*, *Ulixēs*—Greek *Hēraklēs*, *Achilleus*, *Odysseus)* follow the 3rd declension:

acc.	*-em* or *-ēn*	*Herculem* (or *Herculēn*)
gen.	*-is*	*Herculis*
dat.	*-ī*	*Herculī*
voc.	*-ē*	*Herculē*

gen./dat.	*–ae*	*Anchīsae*
abl.	*-ā* or *-e*	*Anchīsā* (or *Anchīse*)

Dative with Compound Verbs

Compound verbs (i.e., verbs that consist of a stem and a prefix) often take a dative. This is true of both transitive and intransitive verbs.

Intransitive verbs (like *superesse*, "survive") will take the dative alone:

> *superesse*: *Nōlō* <u>*urbī*</u> <u>*captae*</u> *superesse*, "I refuse to outlive a captured city." (l.198)
>
> *prōdesse*: *Nihil enim* <u>*vīneīs*</u> *magis prōdest quam sōl et calor.* (XXVII.121–122)

praeesse: *Agricola…ipse nōn sum, sed* <u>*multīs*</u> <u>*agricolīs*</u> *praesum.* (XXX.32–33)

deesse: *Certus ac vērus amīcus est quī numquam* <u>*amīcō*</u> <u>*suō*</u> *deest.* (XXXII.115–116)

Transitive verbs (like *circumdare*, "surround") take an accusative (the object of the transitive verb) and a dative:

circumdare: [*anguēs*] <u>*collō*</u> *longa corpora sua* <u>*circumdant*</u> (l.63): "the snakes wrap their long bodies [accusative] around his neck [dative]."[11]

Praeficere[12] ("put *x* [accusative] in charge of *y* [dative]"):

[*Mīlitēs armātī*] <u>*quibus*</u> <u>*praefectī*</u> <u>*erant*</u> *Ulixēs et Pyrrhus.* (ll.26–27)

Pontifex māximus…<u>*cēterīs*</u> <u>*omnibus*</u> <u>*sacerdōtibus*</u> <u>*Rōmānīs*</u> <u>*praefectus*</u> <u>*est*</u>*.* (XXXVI.118–120)

addere: *Si tibi certum est* <u>*Trōiae*</u> <u>*peritūrae*</u> *tē tuōsque* <u>*addere*</u>*.* (XVIII.204–205)

Dative of Interest/Reference

The dative case shows that someone or something has a stake in the sentence. Grammar books have many subcategories for the dative case, but if you keep in mind the idea that the verb concerns or affects the person invoked in the dative case, you can work out the best relationship. For example:

…cum pariter fīliō patrīque timeat (l.247): "…because he fears equally *for* his son and father."

Aeneas is afraid, and his father and son are the people *for whom* he is afraid. Compare Laocoon's words:

Quidquid id est, timeō Danaōs—et dōna ferentēs! (l.49)

In this sentence, *timēre* takes an accusative: Laocoon fears the Greeks; were the case dative (i.e., *timeo Danaīs*), he would fear *for* them.

---

11.   With the ablative, the same idea would be expressed differently: *collum longis corporibus* (ablative of means) *suis circumdant*: "they wrap around his neck with their long bodies."

12.   In the examples from our text, there is no accusative because the verb is passive.

III. Dēmonstrātiō Verbōrum

Iuvāre

Iuvāre can mean "to help," as you have already seen:

> *Diīs iuvantibus spērō eum brevī sānum fore.* (XXXIV.9–10)

When *iuvāre* means "to be of use" and "to please," it is generally used impersonally:

> *Quid iuvat deōs invocāre.* (XXVI.32)
> *Quid iuvat mē lūgēre, ō dulcis coniūnx.* (l.268)
> *Sī pereō, hominum manibus periisse iuvābit.* (XXXVIII.174)
> *Sīc, sīc iuvat īre sub umbrās.* (XL.263)

Verbs Formed from the Adjective *plēnus*

You have already learned (Cap. VII) that the adjective *plēnus* can take either the genitive or the ablative, e.g.:

> *māchina…hostibus armātīs plēna* (ll.72–73)
> *hic saccus plēnus mālōrum est* (VII.43–44)

Verbs formed from *plēnus* can also take a genitive or an ablative, e.g., *complēre* (Cap. XXX), *supplēre* (Cap. XLIII), *implēre* (Cap. XVI):

> *mīlitibus armātīs complēvērunt* (ll.25–26)
> *rēgia tōta hostibus armātīs complētur* (ll.148–149)

Poenās dare

The noun *poena* denotes the penalty paid for an offense; the plural is used in the phrase *poenās dare* (+ dative: "pay the penalty to") which is equal to the passive *pūnīrī* (+ *ab*…"be punished by"), e.g.:

> *servus fugitīvus dominō poenās dat*
>   = *servus fugitīvus ab dominō pūnītur.*

> *'Lāocoontem poenās meritās Minervae dedisse' dīcunt* (l.69)
>   *'poenās Minervae dedisse' = ā Minervā pūnītum esse.*

Fās

The indeclinable neuter *fās* denotes what is right by divine law, the will of the gods; it occurs mainly in the impersonal phrase *fās est* ("it is right/fitting"), which introduces an accusative + infinitive construction like that of indirect discourse.

> *Neque enim mihi <u>fās</u> <u>est</u> rēs sacrās tangere priusquam manūs*
>   *caede cruentās flūmine vīvō lāverō.* (ll.238–240)

> *Nōn sine nūmine deōrum haec ēveniunt, nec <u>fās</u> <u>est</u> tē hinc*
>   *comitem portāre Creūsam.* (ll.268–270)

Dative with the Impersonal *certum*

Certum est = "it is decided" + dative ("by whom"). In the phrase *certum mihi est* + infinitive ("I have decided"), the dative shows who made the decision:

> *Sī <u>tibi</u> certum est Trōiae peritūrae tē tuōsque addere.*
> (ll.204–205)

IV. Recēnsiō

Dative with Adjectives

The same principle (the dative indicating reference) can be seen with some adjectives: many of the Latin adjectives with the dative are coupled with *to* or *for* in English as well.

You are already familiar with the following adjectives that take the dative:

> *amīcus* ("friendly to")
> *inimīcus* ("hostile to")
> *necessārius* ("necessary to/for")
> *nōtus* ("known to")
> *ignōtus* ("unknown to")
> *grātus* ("pleasing to/grateful to")
> *proximus* ("near to/next to")
> *cārus* ("dear to")

In this chapter, we see more examples:

> *mātūrus*: *sōla in rēgiā erat fīlia, nōmine Lāvīnia, iam <u>mātūra</u> <u>virō</u>.* (ll.16–17)
>
> *benignus*: *Minervae, <u>deae</u> <u>Trōiānīs</u> <u>benignae</u>.* (ll.36–37)
>
> *gravis*: *nec <u>mihi</u> <u>grave</u> erit hoc onus.* (ll.233–234)
>
> *sacer*: *In mediō marī Aegaeō est īnsula <u>Apollinī</u> <u>sacra</u>, nōmine Dēlos.* (XXXVIII.18)

Summary of Temporal Conjunctions

Conjunction	Meaning	Usual tense of the indicative[13]
antequam	before	perfect, future perfect
cum prīmum	as soon as	perfect
dum	while	present
postquam	after	perfect
priusquam	before	perfect, future perfect
simul atque	as soon as	perfect
ubi	when	perfect
ubi prīmum	as soon as	perfect
ut	when	perfect
ut prīmum	as soon as	perfect

Alter…alter and *alius…alius*

You first met the idiom *alius…alius* in Cap. X, where you learned that the idiom means "some…others" as in this chapter, where *aliī…aliī…aliī* offers several sets of reactions to the same situation:

> <u>Aliī</u> *eum ut dōnum Minervae, deae Trōiānīs benignae, sacrātum intrā mūrōs dūcī et in arce locārī iubēbant,* <u>aliī</u> *dōnum Graecōrum suspectum in mare praecipitandum et flammīs ūrendum esse cēnsēbant,* <u>aliī</u> *interiōrem equī partem īnspicere volēbant.* (ll.36–40)

---

13.   *antequam*, *priusquam*, and *dum* also take the subjunctive (Cap. XLI: *dum*, and Cap. XLII: *antequam*, *priusquam*).

Alter, *altera*, *alterum* (Cap. XIV) ("one…the other") can be used, as in this chapter, to mean "one another":

> *Ascanium puerum et patrem meum uxōremque <u>alterum</u>*
> *in <u>alterīus</u> <u>sanguine</u> trucīdātōs.* (ll.210–211)

Aeneas does not want to see his son, father, and wife killed, *one in the blood of another*.[14]

Indirect Commands

You encountered *verba postulandī* (verbs that require or command) in Cap. XXVII:

> *Ille graviter gemēns Aenēam <u>monuit</u> 'ut deōs Penātēs urbis*
> *Trōiae <u>caperet</u> atque ex urbe incēnsā <u>fugeret</u>'* (ll.96–98)

> *Hōc audītō Aenēās iuvenēs audācēs, quōs pugnandī cupidōs*
> *videt, paucīs verbīs <u>hortātur</u> <u>ut</u> sē arment <u>et</u> strictīs gladiīs*
> *in media hostium arma moritūrī sē <u>praecipitent</u>.* (ll.115–118)

> *…eīque <u>suāsit</u> ut celeriter domum ad suōs <u>fugeret</u>* (ll.187–188)

> *Lāocoōn, Neptunī sacerdōs, ab summā arce dēcurrēns cīvēs suōs*
> *<u>monuit</u> <u>nē</u> Danaīs <u>cōnfīderent</u>.* (ll.41–42)

These noun clauses, introduced by *ut* or *nē* and completed by the subjunctive (present or imperfect, as the clause represents incomplete action), are signaled by a word of asking, requiring, or demanding. The case depends on the verb used. It is helpful to memorize the constructions as phrases:

- Dative (intransitive verbs): *imperāre eī ut; persuādēre eī ut*

- Ablative + *ab* (the following verbs suggest "seek from"): *quaerere ab eō ut*; *petere ab eō ut*; *postulāre ab eō ut*

- Accusative: *rogāre eum ut*; *ōrāre eum ut*; *monēre eum ut*; *hortārī eum ut*

---

14.   As you learned in Cap. XIV, *alter* refers to one of two options; although three are listed here, it translates "one in the blood of the other."

V. Points of Style

The Latin "sandwich": Latin word order helps you to read phrases for meaning, often enclosing words that go together with a clause in the middle. This creates bookends or, in a different image, a kind of sandwich effect. A new thought does not start until the current one closes.

> *Aliī eum ut* (*dōnum Minervae, deae Trōiānīs benignae,
> sacrātum*) *intrā mūrōs dūcī et in arce locārī iubēbant, aliī*
> (*dōnum Graecōrum suspectum*) *in mare praecipitandum et
> flammīs ūrendum esse cēnsēbant, aliī interiōrem equī partem
> īnspicere volēbant.* (ll.36–40)

Everything between *dōnum* and *sacrātum* belongs to the same thought and forms the subject of *dūcī* and *locārī*; similarly, *Graecōrum* falls between *dōnum* and *suspectum* (the subject of *praecipitandum* and *ūrendum*) because it is part of the same thought.

> <u>*parva*</u> *duōrum fīliōrum* <u>*corpora*</u> *complexī* (l.59)

The object of *complexī* is *parva corpora*; putting *duōrum fīliōrum* between the noun and the adjective facilitates the sense.

> *Ergō* (<u>*parte*</u> *mūrōrum* <u>*dēstrūctā*</u>) (<u>*māchina*</u> <u>*illa*</u> *hostibus armātīs
>   <u>plēna</u>*) *magnō labōre in urbem trahitur fūnibus.* (ll.72–73)

> *Cassandra, fīlia Priamī virgō* (*cui rēs futūrās praedīcentī*) *nēmō
>   umquam crēdēbat.* (l.78)

The relative pronoun and present participle enclose the object of the participle and complete a thought (l.78).

II. Rēs Grammaticae Fūsius Explicātae

Reflexive Pronouns in Indirect Questions

You learned about indirect questions in Cap. XXIX. In indirect questions, as in indirect commands, a reflexive pronoun refers to the subject of the main verb (the person asking):

> *Māter interrogat ʻcūr sē vocet fīlia sua?ʼ* = *Māter:* "*Cūr mē vocat fīlia mea?*"

> *Aeneas…quaesivit ʻquae perīcula sibi vitanda essent?ʼ* (ll.101–103) = *Quae perīcula mihi vitanda sunt?*

Dative of Separation/Disadvantage

The dative of reference when used with verbs that mean "take away" such as *adimere* (l.69), can mean "from":

> …*clipeum, quem <u>cuidam hostī</u> <u>adēmerat</u>*: "the shield, which he had taken away *from* a certain enemy"

---

1.   For an explanation of the line number references convention, see p. xxvi.

III. Dēmonstrātiō Verbōrum

Verbs That Take an Ablative of Means

There are five deponent verbs that are completed by an ablative of means. In Caps. XXVII and XXX, you learned two of them, *ūtī* and *fruī*:

> *Quī arat <u>arātrō</u> ūtitur; quī metit <u>falce</u> ūtitur; quī serit manū suā ūtitur.* (XXVII.20–22)

> *Orontēs…vītā rūsticā nōn fruitur.* (XXX.35)

In this chapter, you find two more deponent verbs with the ablative, *potīrī* ("take possession of") and *vescī* ("feed on"):

> *Polydōrum obtruncāvit et <u>aurō</u> vī <u>potītus</u> <u>est</u>.* (l.14)

> *Helenum, Priamī fīlium, <u>rēgnō</u> Ēpīrī <u>potītum</u> <u>esse</u>* (l.76–77)

> *Helenum <u>Chāoniā</u>, parte Ēpīrī extrēmā, <u>potītum</u> <u>esse</u>* (l.95)

> *Polyphēmus, quī <u>carne</u> et <u>sanguine</u> hominum miserōrum <u>vescitur</u>* (l.181)

The fifth, *fungī* ("discharge," "complete"), you will meet in Cap. XLIII (in a compound, *dēfungī*) and XLIV:

> *Et ille <u>dēfungī</u> <u>proeliō</u> festīnat* (XLIII.106–107).

> *Māiōrem partem aetātis eius quā <u>cīvīlibus</u> <u>officiīs</u> fungantur.* (XLIV.152–153)

Summary:

ūtor, ūtī, ūsum esse	use, enjoy
fruor, fruī, fructum esse	enjoy
fungor, fungī, functum esse	discharge, complete
potior, potīrī, potītum esse	take possession of
vescor, vescī	feed (on), eat

Praestāre

Like *iuvāre* (Cap. XXXVII), *praestāre* can also be used personally and impersonally:

Personally:

> *Officium meum praestābō sīcut cēterī mīlitēs Rōmānī* (XXXIII.80–81): "I will fulfill my duty just as the rest of the Roman soldiers."

> *…ex tribus prīmīs generibus longē praestat…rēgium* (LIV.217–218): "Monarchy is by far the best of the three types."

When used impersonally, *praestāre* means "it is preferable/better":

> *Praestat tōtam Siciliam longō cursū circumīre quam semel Scyllam īnfōrmem vidēre et saxa illa resonantia experīrī.* (ll.118–120)

Verbal Nouns

Instead of *postquam sōl occidit*, you find *post sōlis occāsum* (ll.132–133), and instead of *antequam sōl ortus est*, you find *ante sōlis ortum* (l.163). The sense is the same, but *occāsus, -ūs* and *ortus, -ūs* are 4th declension nouns formed from the supine stems of the verbs *occidere* and *orīrī*. These nouns look like the perfect passive participle; for example, *metus, -ūs* (fear) looks like the participle of *metuere* (to fear).

In this way, many verbal nouns are formed, e.g.:

> *cantus, -ūs < canere*: "singing," "music"
> *cursus, -ūs < currere*: "running," "race," "course"
> *cāsus, -ūs < cadere*: "fall," "chance," "accident"
> *exitus, -ūs < exīre*: "exit," "end"
> *rīsus, -ūs < rīdēre*: "laughter," "laugh"
> *ductus, -ūs < dūcere*: "leadership," "command"
> *gemitus, -ūs < gemere*: "groan"
> *ululātus, -ūs < ululāre*: "howling"
> *lūctus, -ūs < lūgēre*: "grief, mourning"
> *flētus, -ūs < flēre* (l.169): "weeping"
> *versus, -ūs < vertere* ("line," i.e., a "turn" in writing): "verse"

Greek Names in Latin

The Latin ending -*us* (2nd declension) corresponds to Greek -*os* (ος). Usually Greek names in -*os* have -*us* in Latin and follow the 2nd declension. The gender of the following Greek *places* is *feminine*, of the Greek men's *names*, *masculine*:

> *Olympus, -ī* (f.)
> *Rhodus, -ī* (f.)
> *Ēpīrus, -ī* (f.)
> *Daedalus, -ī* (m.)
> *Īcarus, -ī* (m.)
> *Priamus, -ī* (m.)

Sometimes -*os* is retained in Latin, as we have seen in the names of some Greek islands. When the -*os* is retained, the accusative also has the Greek ending -*on*. Note that the gender of these nouns is *feminine*:

> *Samos, -ī* (f.)
> *Chios, -ī* (f.)
> *Lesbos, -ī* (f.)
> *Lēmnos, -ī* (f.)
> *Tenedos, -ī* (f.)
> *Dēlos, -ī* (f.) (l.19)
> *Zacynthos, -ī* (f.) (l.63)

Most Latinized Greek names of islands, towns, and countries ending in -*us* and -*os* are feminine:

> *Dēlō relictā* (l.23)

Greek nouns in Latin may end in -*a* (1st declension), e.g.:

> *Eurōpa*
> *Crēta*
> *Ariadna*
> *Helena*

Or in -ē, e.g.:

> *Samē*
> *Andromachē*

Greek nouns in *-ē* have the following endings:

> genitive in *-ēs*: *Samēs*, *Andromachēs*
> accusative in *-ēn*: *Samēn*, *Andromachēn*
> ablative in *-ē*: *Samē*, *Andromachē*

Prōnōmen -cumque

Adding *-cumque* to *quī, quae,* and *quod* makes the pronoun (or adjective) indefinite:

> *In <u>quāscumque</u> terrās mē abdūcite!* (ll.170–171): "Take me away to whatever lands you want!…to any lands whatever!"

> *<u>Quaecumque</u> es, sīs nōbīs fēlīx* (l.104): "Whoever you are…"

> *<u>Quīcumque</u> es, dīs caelestibus cārus esse vidēris.* (l.143)

Prōnōmen -met

The ending *-met* can be added to personal pronouns for emphasis, e.g.:

> *<u>Egomet</u> vīdī eum in medīo antrō iacentem.* (l.182)

> *Dūrāte, et <u>vōsmet</u> rēbus servāte secundīs!* (XXXIX.86)

> *et ipsa <u>mēmet</u> super eōs iēcissem* (XL.232)

Adjectives with the Genitive

Of adjectives that take the genitive, you know *plēnus* (Cap. VII), *cupidus* (Cap. XXV), and *studiōsus* (Cap. XXVI). Now you find the genitive with:

> *potēns* ("powerful," "having power over," "having control of"):
> *dī maris et terrae tempestātumque potentēs* (l.141)

> *ignārus* ("ignorant of"): *ignārī viae* (l.156)

> *memor* ("remembering," "mindful of"): *memor veteris bellī* (XXXIX.7)

Certiōrem facere/certiōr fierī

The idiom *certiōrem facere/certiōr fierī* means "to inform/to be informed"; some of the common constructions that complete *certiōrem facere aliquem* (*aliquem* = person informed) are:

> absolutely (by itself):
>
>> *mē certiōrem faciet*: "he will inform me."
>
> *dē* + the ablative:
>
>> *patrem suum dē rē <u>certiōrem</u> <u>facit</u>* (l.43): "he informed his father about (*dē* + ablative) the matter."
>
> *alicuius reī* (genitive):
>
>> *certiorem me sui consilii fēcit*: "He informed me of his intention." (Cicero, *Ad Atticum* 9.2)
>
> accusative and infinitive:
>
>> *Iūlia patrem suum <u>certiōrem</u> facit sē domī esse*: "Julia informed her father that she was home."

Remember (Cap. XXVI) that the passive of *facere* is *fierī*:

> *cum ā virō ipsō <u>certior</u> <u>fierī</u> cuperet classe in portū relictā ad urbem prōgrediēbātur.* (l.79)

Relative Clauses with the Subjunctive (To Be Continued in Further Chapters)

There is a good reason why you learned relative clauses so early in your study of Latin (Cap. III): they are ubiquitous in Latin; in order to read Latin well, you might as well get used to them early! In relative clauses, the verb is normally in the indicative, but the subjunctive is used in relative clauses in several circumstances. For example, relative clause can further explain:

> *purpose* (relative clauses of purpose)
> *reason* (relative causal clauses)
> *result or tendency* (relative clauses of result/tendency)

Relative Clauses of Purpose: *Quī = ut is*

You have learned that the meaning of *quī*, *quae*, and *quod* can carry more weight than just "who" or "that." At the beginning of a sentence, *quī* acts as a connective and a demonstrative (*quī = et is,* Cap. XXV):

> *Quī postquam ad rēgīnam adductī sunt, Īlioneus, māximus eōrum, sīc ōrsus est* (l.203) = "And after they…"

---

1. For an explanation of the line number references convention, see p. xxvi.

Quī can also mean *ut is* ("who" = "so that he"); when *quī* = *ut is*, the verb is in the subjunctive, just as it is in "regular" purpose clauses. In the following sentence, for example, *quī* does not describe Achates; it tells us Aeneas's <u>purpose</u> in sending him ahead to the ships:

> *Aenēās autem ad nāvēs praemittit Achātēn, <u>quī</u> Ascaniō haec <u>nūntiet</u> eumque in urbem <u>dūcat</u>.* (ll.263–264)
>   *= ut Ascaniō haec nuntiet…dūcat*

Relative Causal Clauses: *Quī = cum is*

When a relative clause gives the reason (*quī = cum is*) behind the main clause, the verb is in the subjunctive.[2]

> *…dīs caelestibus cārus esse vidēris, quī ad urbem Karthāginem advēneris* (ll.144–145): "…you seem to be dear to the heavenly gods, since you have come to the city of Carthage" (*quī… advēneris = quoniam…advenistī*).

Descriptive Relative Clauses

The subjunctive is also found in a relative clause referring to the general character of the antecedent. Such clauses are also called Generic Clauses, Relative Clauses of Characteristic, and Relative Clauses of Tendency.[3]

This type of clause is especially common with indefinite or negative antecedents, as in Cap. XXXVI.363: *nīl nisi Rōmānum quod tueātur habet.*

Other triggers for generic descriptive clauses:

> *est quī/sunt quī*:
>> *Ille est quī hoc dicit*: "That is the man who is saying this" (states the fact: indicative).
>> *Est quī hoc dīcat*: "There is the kind of man who would say this" (states a tendency: subjunctive).

> *nēmō est quī*:
>> *nēmō est quī hoc dīcat*: "There is no one who would say this."

---

2.   Compare the causal use of *cum*, which also takes the subjunctive (see Cap. XXXVII).

3.   These are originally derived from the potential subjunctive, about which you will learn in Cap. XLI.

Notā bene:

Indirect questions can *look* like a relative clause with the subjunctive. In both examples below, the clauses represent questions:

> *Posterō diē, ut prīmum lūx orta est, pius Aenēās exīre cōnstituit et nova loca explōrāre atque quaerere <u>quī</u> hominēs <u>incolerent</u>.* (ll.92–94): "Aeneas decided…to find out what people lived there" ("What people live here?").

> *Quaecumque es…doceās nōs <u>quō</u> sub caelō et <u>quibus</u> in ōrīs <u>versēmur</u>.* (ll.104–105)

Ut as an Interrogative Adverb

Ut may be used as an interrogative adverb (= *quōmodo*, e.g., *ut valēs*? "how are you?"), chiefly in indirect questions explaining <u>how</u> something has happened— or just stating the fact <u>that</u> it has happened, e.g.:

> *(Aenēās) nārrāvit quae ipse vīderat: ut Graecī Trōiam īnsidiīs cēpissent atque incendissent, ut ipse…fūgisset et…errāvisset* (ll.311–314): "…how the Greeks had taken Troy by artifice and set it afire, how he himself had fled…and wandered."

II. Rēs Grammaticae Fūsius Explicātae

Wishes

The present subjunctive is used to express wishes for the future:

> *Vīvat fortissimus quisque! Vīvant omnēs fēminae amandae!* (XXXI.172–173): We would say, "Long live every very brave man! Long live all lovable women!"

> *Quisquis amat valeat! Pereat quī nescit amāre! Bis tantō pereat quisquis amāre vetat!* (XXXI.196–197)

> *sīs nōbīs fēlīx* (l.104): "May you be propitious to us!"

Wishes are often introduced by *ut* or *utinam*:

> *Utinam aliquandō līber patriam videam!* (XXXII.157)
>
> *Utinam salvī in Graeciam perveniant!* (XXXII.223)
>
> *Utinam nē pīrātae mē…occīdant!* (XXXII.179–180)

The imperfect subjunctive is used to express an unfulfilled wish (one that didn't come true) in the present (as you learned in Cap. XXXIII):

> *Atque utinam rēx ipse…afforet Aenēās!* (ll.227–228)[4]
>> "And I wish that King Aeneas himself…were here" (but he isn't).
>> "Would that King Aeneas himself…were here."

The pluperfect subjunctive indicates a wish that didn't come true in the past (Cap. XXXIII):

> *Utinam ego quoque in campīs Īliacīs animam prō patriā effūdissem!* (ll.36–37)
>> "I wish that I too had poured out my life for my fatherland on the fields of Troy" (but I didn't)."
>> "Would that I had," etc.

In the next chapter (XL), you will see that *velle ut* can also express a wish (or act of will).

Accusative of Exclamation

You learned the accusative of exclamation in *Familia Rōmāna*:

> *Exclāmat magister: "Ō, discipulōs improbōs…!"* (XV.23)
> *Mē miseram!* (XXXIV.74)

---

4.   The imperfect subjunctive of *esse* (i.e.: *essem*, *essēe*, *esset*, etc.) has an alternate form, shown here in the compound *afforet* (= *ad* + *foret*: *forem*, *forme*, *foret*, etc.). *Fore* (without endings) = *futūrum esse* (Cap. XXXIII).

The accusative + infinitive can be used in the same way. The wounded and vindictive goddess Juno, who has seen Minerva sink the ships of Ajax because he raped Cassandra in her temple, exclaims:

> "*Mēne rēgem Teucrōrum ab Italiā āvertere nōn posse?*" (ll.16–17):
> "Am I not able…?!"

Ablative of Respect

You are already familiar with the ablative of respect:

> *Nec modo <u>pede</u>, sed etiam <u>capite</u> aeger est.* (XI.55)
> *Ille vir pessimus <u>tē</u> dignus nōn erat!* (XIX.110)
> *Nympham suam <u>fōrmā</u> pulcherrimam* (ll.25–26)
> *Dīdō rēgīna, <u>fōrmā</u> pulcherrima* (l.193)

The ablative of respect points to the specific point in which the adjective is true. It can also be used with verbs:

> (*Hannibal*) <u>*praestitisse*</u> *cēterōs imperātōrēs <u>prūdentiā</u>* (XLIX.4–5):
> "Hannibal surpassed all other generals in intelligence."

One important use of the ablative of respect is with the supine, familiar to you from Cap. XXII:

> *Nōmen meum nōn est facile <u>dictū</u>* (XXII.43) = "My name
>   is not easy to say."
>
> *mīrābile <u>dictū</u>!* (l.167) = "miraculous to tell about!"

Ablative of Comparison

You learned the ablative of comparison in Cap. XXIV:

> *Nunc pēs dexter māior est <u>pede</u> <u>laevō</u>.* (XXIV.30)
> <u>*dictō*</u> *citius* (l.56): "sooner than spoken"

The ablative of comparison can be used, as in the examples below, as a different way of giving a superlative:

> *Aenēā̲ nēmō fortior fuit* ("no one was braver than Aeneas") =
>   *Aenēās omnium fortissimus fuit.*

> *Aenēās, quō̲ nēmō iūstior fuit nec…fortior = quī omnium
>   iūstissimus fuit et fortissimus.* (ll.210–211)

> *Fāma quā̲ nōn aliud malum ūllum vēlōcius est* (XL.62–63)

III. Dēmonstrātiō Verbōrum

Obviam īre

Obviam (*ob viam*) is an adverb ("toward") frequently used with forms of *īre*:

> *Cui māter Venus in media silvā obviam iit* (ll.96–97)

Ablative with *comitātus*

Comitārī is a deponent verb meaning "to accompany." The participle *comitātus, -a, -um* can be used in a passive sense with the ablative to mean "accompanied by":

> *ipse ūnō̲ Achātē̲ comitātus graditur* (l.95)
> *magnā̲ iuvenum catervā̲ comitāta* (l.194)

II. Rēs Grammaticae Fūsius Explicātae

Impersonal Passive of Intransitive Verbs

Intransitive verbs, like *venīre*, *pugnāre*, and *tacēre*, as you know, are not completed by an accusative direct object. Therefore, they are not normally found in the passive voice, unless, as in the examples below, they are being used impersonally (Cap. XXXIII):

> *Cum complūrēs hōrās…pugnātum esset* (XXXIII.119–121):
> "When there had been fighting for many hours (literally: it had been fought)."

> *Hīc vērō ācerrimē pugnābātur* (XXXVII.135): "But here there was very fierce fighting" (literally: "It was being very vehemently fought").

> *Postquam in altōs montēs ventum est…* (l.50)

The impersonal passive is also found in the gerundive, e.g., the passive periphrastic:

> *Tacendum est* (XXXI.178)

Impersonal Verbs

You have learned (Cap. XXIII) the impersonal verb *pudēre*, one of a small group of verbs (see below for list) that are used impersonally and construed with the accusative and either the genitive or infinitive. In other words, we find:

> 3rd person singular verb + accusative of person concerned
> (or "subject") and either:
>> a genitive of person/thing affected (or "object")
>> an infinitive that completes the thought

With the accusative of person and infinitive:

> *Nōnne tē pudet hoc fēcisse? Profectō mē pudet hoc ā meō fīliō factum esse.* (XXIII.79–80)

> *Nōnne tē pudet pauperī magistrō mercēdem negāre?* (XXIII.138–139)

With the accusative of person and genitive of thing:

> *Puerum pudet factī suī.* (XXIII.82)

Other verbs that follow the pattern of *pudet* are:

> *taedet* (expressing disgust)
>> *Taedet eam vītae* (l.167) = *taedet eam vīvere*: "she is tired of life."
>> *Fēminae Trōiānae, cum eās longī errōris taedēret, nāvēs incendērunt.* (ll.281–282)

> *paenitet* (expressing regret)
>> *nec tē paenitēbit nōbīs auxilium tulisse* (XXXIX.212–213): "it will not cause you regret to have brought us aid."
>> *Numquam, rēgīna…mē paenitēbit tuī meminisse* (*tuī* here is the objective genitive with *meminisse*, not *paenitēbit*) (ll.123–124)
>> *Aenēās plērāsque fēminās, quamquam eās iam factī suī paenitēbat, in Siciliā relīquit…* (ll.283–286)

piget (expressing revulsion or displeasure)

> *Sī vōs piget cōnūbiī inter vōs, in nōs vertite īrās.*
>   (XLII.155–156)

> (see also example under *miseret*)

miseret (expressing pity)[2]

> *mea mater, tuī mē miseret; meī piget*: "My mother, I pity
>   you, I am chagrined at myself" (Cicero, quoting the
>   poet Ennius in *de Divinatione*, Book I.66).

Although we don't find the impersonal *miseret* in our book, we do find the verb *miserērī* ("have pity on").[3] Like *oblīvīscī* (Cap. XXV) and *meminisse* (Cap. XXXII), *miserērī* is followed by an objective genitive:

> "*miserēre meī*" (l.112): "Take pity on me!"

Dubitāre (*nōn dubitō quīn*)

You are accustomed to seeing *dubitāre* used as both an intransitive and a transitive verb:

> *Iūlius, quī Mārcum discipulum pigerrimum esse scit, iam
>   dē verbīs eius <u>dubitāre</u> incipit. Aemilia vērō nihil <u>dubitat</u>,
>   sed omnia crēdit!* (XXI.129–131)

> *Hoc nōn dubitō* (XXV.69)

And with indirect questions:

> *dubitō num haec fābula vēra sit* (XXIX.116–117)
>   original question: *num haec fābula vēra est?*

> *Dubitō num ego tam diū famem ferre possim.* (XXX.45–46)
> *valdē dubitō num pecūniā suā mē redimere velint* (XXXII.98–99)
> *Ego quoque dubitāre coeperam num nūntius vērum dīxisset.*
>   *(XXXIII.112–113)*

---

2. Only the active *misereor, miserērī*, occurs in Familia Rōmāna or Rōma Aeterna, not the impersonal *miseret*.

3. See above on the impersonal use of the active form *miseret*, which also takes the genitive.

In this chapter, you see a different construction, *nōn dubitō + quīn*[4] and an indirect question:

> *Equidem nōn dubitō quīn deā nātus sit* (l.8): "Indeed, I have no doubt that he is born of a goddess."

Taken as separate clauses, you can see how the construction arose:

> *quīn deā nātus sit?*: "why shouldn't he be born of a goddess?"

> *equidem nōn dubitō*: "I am certainly not in doubt."

Summary:

- *Dubitō num* suggests *nōn crēdō*; *num* tells you that the original interrogative (see first example above) was "*num*," expecting a "no" answer.

- *Dubitō an*, like *haud sciō an* and *nesciō an* (XXXII.84), suggests "I am inclined to think." *An* is a disjunctive conjunction, meaning it states or implies two choices ("is the story true or false?"). If we are given only one option instead of two, that is probably the option the speaker thinks is the case, e.g.:

  ▷ *dubitō num haec fābula vēra sit* = "This story isn't true is it?" "I doubt that it is true."

  ▷ *dubitō an haec fābula vēra sit* = "I am inclined to think that it is true."

  ▷ *Nōn dubitō quīn* is equivalent to *crēdō*.

Posse

The subjunctive can be used to signal possibility (as you will learn in Cap. XLI). But because *posse* ("to be able") has the force of possibility in its meaning, we often find it in the indicative where we might expect the subjunctive. So, for example, in the present contrafactual condition in lines 10–12:

> *Nisi certum mihi esset nūllī virō coniugiō mē iungere, postquam prīmus amor mē morte fefellit, huius ūnīus amōrī forsitan succumbere potuī!*

---

4. For *quīn*, see Cap. XXII and below, under adverbs.

We might expect the imperfect subjunctive *possem* (instead of the perfect indicative *potuī*) to complete the contrafactual thought. Because *potuī* means "I could have," it implies "I could have (but in fact I didn't)."

We saw a similar example of this use of *posse* in the indicative instead of subjunctive in Cap. XXIV:

> *Mīror tē crūs nōn frēgisse. Facile os frangere potuistī.* (ll.32–33)

While an English translation would run "I am amazed that you did not break your leg. You could have easily broken a bone," the Latin actually says, "You were able to break a bone." The implication is that, although there was the possibility of breaking a bone in the past, it didn't happen.

Wishes

The Recēnsiō at the end of Cap. XXXIX reviewed wishes. In this chapter, you see another way of expressing a wish: the subjunctive of *velle* with the subjunctive (with or without the conjunction *ut*):

> *Sed velim prius terra mē dēvoret vel Iuppiter mē fulmine percu-tiat, quam pudōrem solvō aut fidem fallō.* (ll.15–17)

Personal Pronouns: Genitives

In Cap. XXIX, you learned that the personal pronouns show two forms for the genitive plural:

> *nostrum*, *vestrum*: partitive
> *nostrī*, *vestrī*: objective

Whether partitive (Cap. XII) or objective (Cap. XXV), we use the same form for the singular: *meī*, *tuī*. You have already seen that the genitive of personal pronouns is used for the partitive:

> *quis <u>vestrum</u>?* "Who <u>of you</u>?"

> …*vīta omnium <u>nostrum</u> servāta est*: "the life of all <u>of us</u>"
>   (XXIX.37–38)

> *nēmō <u>nostrum</u> periit*: "no one <u>of us</u>" (XXIX.39)

But the genitive of the personal pronouns is mostly used in the objective sense:

> *memoriam <u>tuī</u>*: "memory of you" (l.119)
>
> *<u>meī</u>…imāgō*: "an image (i.e., ghost) of me" (l.257)

Remember that instead of a possessive genitive, Latin uses the possessive adjectives *meus, tuus, noster, vester*.

Quīn

The adverb *quīn*:

> With the 2nd person of the present indicative, *quīn* expresses a request or order (= *age, cur nōn*?):
>> *Quīn aperiēs? = aperī*! (XXII.29)

> When followed by an imperative, *quīn* is emphatic (= *cur nōn*?), as when Dido bids herself:
>> *Quīn morere, ut merita es.* (l.197)
>> *Quīn mē admittis*? (XXII.32)

> With *etiam*, *quīn* shows emphasis ("indeed"):
>> *Quīn etiam hībernō tempore classem ōrnās et per mediōs Aquilōnēs nāvigāre properās!* (ll.108–109)
>> *Quīn etiam clāmāre ausus est maestusque 'Creūsam' iterum iterumque vocāvit.* (XXXVII.264–265)

> As a conjunction (meaning "but that, but"), *quīn* occurs after negative expressions of doubt and is followed by the subjunctive, e.g.:
>> *Equidem nōn dubitō quīn deā nātus sit.* (l.8, see above on *dubitāre*)

Dum + the Subjunctive

Cap. XXXVII reviewed the syntax of the conjunction *dum* with the indicative, meaning "when" in the sense of "while." The subjunctive, not the indicative, follows the conjunction *dum* when the clause indicates what is expected or intended. Here it means "when" in the sense of "until," "long enough for":

> *Quid moror? an <u>dum</u> frāter Pygmaliōn mea moenia dēstruat aut Iarbās, rēx Gaetūlōrum, captam mē abdūcat?*: "What am I waiting for? Or (should I wait) until my brother Pygmalion destroys my walls or Iarbas, the king of the Gaetuli, leads me away captured?" (ll.115–117)

> *Moram brevem petit '<u>dum</u> fortūna sē dolēre doceat'*: not "while" but "until" (l.162)

In these examples, *dum* looks toward an anticipated event rather than focusing on an event going on at the same time as another event (as it does with the indicative).

    Dum with the subjunctive can also mean "as long as," "provided that." In this sense, *dum* is frequently accompanied by *modo*: *dummodo*. You will meet this construction in Cap. XLIV:

> *Tanaquīl…oblītaque amōris patriae, <u>dummodo</u> virum honōrātum vidēret* (XLIV.109–111): "Tanaquil…forgetful of her love of fatherland, <u>provided</u> <u>that</u> she might see her husband honored."

III. Dēmonstrātiō Verbōrum

Compounds of *stāre*

At the end of the chapter, you will notice that the principal parts for compounds do not always follow the same pattern of orthography. You will find:

> (*obstō*) *obstāre, ob<u>stiti</u>sse, obstātum*
> (*circumstō*) *circumstāre, circum<u>steti</u>sse*

The difference is in the preposition that compounds the verbs. Disyllabic prepositions, like *circum*, will have a third principal part in *-stetī* while monosyllabic prepositions, like *ob*, will have a third principal part in *-stitī*. These differences stem from natural Latin speech patterns.

IV. Recēnsiō

Locative

Remember that for names of cities, towns, and small islands, as well as for *domus*, *rūs*, and *humus*, instead of *in* + the ablative, Latin uses the locative. A review of the locative endings:

Declension	Singular	Plural	Examples
1st	*ae*	*īs*	*Rōmae, Athēnīs*
2nd	*ī*	*īs*	*Tūsculī, humī*
3rd	*ī, ĕ*	*ibus*	*rūrī, Karthāgine, Gādibus*
4th			*domī*

Interrogative Pronouns in Exclamations

In Cap. VIII, you learned that *quam* used in exclamations means "how." In Cap. XXVI and Cap. XXXVII, you saw that the interrogative pronouns and adjectives beginning with *qu-* may also be used in exclamations:

> "*Ō, quot parvae īnsulae in marī ingentī sunt!*" (XXVI.91–92)

> *Ecce eī in somnō appāruit maestissimus Hector, fīlius Priamī mortuus—sed quālis erat, quantum mūtātus ab illō Hectore quī ex tot proeliīs victor redierat!* (XXXVII.92–94)

This chapter offers more examples:

> "*Quālis hospes tēctīs nostrīs successit, quam nōbilis, quam fortis!…quam ille fātīs iactātus est! Quae bella exhausta nārrābat!*" (ll.7–10)

> "*Quanta erit potentia Poenōrum, quanta glōria tua, soror, si cum duce Trōiānōrum tē coniūnxeris!*" (ll.29–30)

> *Quō tum dolōre Dīdō afficiēbātur…Quōs gemitūs dabat!* (ll.156–157)

V. Points of Style

Understanding Participles

Remember you can adapt the way you interepret participles to fit the way your own language works:

> *Dum…rēx Gaetūlōrum, captam mē abdūcat*:
>> Literally: "Until the king of the Gaetuli leads me, having been captured, away"
>>
>> "Until the king of the Gaetuli leads me away as a captive"
>>
>> "Until the king of the Gaetuli captures me and leads me away"

I. Rēs Grammaticae Novae

Potential Subjunctive (Negative: *nōn*)

Another important use of the independent subjunctive is the **potential subjunctive**. While the volitive subjunctive expresses will and the optative expresses desire, the potential subjunctive denotes possibility (what might or could happen).

Indefinite Potential Subjunctive

The potential subjunctive can be used to make a general statement not tied to any particular person. English generalizes by saying either "one" (e.g., "One needs to see the pyramids to appreciate how big they are") or "you" (e.g., "you really had to be there" means "anyone who was not there wouldn't get it").

The generalizing potential in Latin is chiefly 2nd person singular and imperfect:

> *hīc ubi nunc fora sunt, lintrēs errāre vidērēs* (l.207): "you/one might have seen…"

> [*eōs*] *sēnsisse putārēs* (l.221): "you/one would have thought…"

The imperfect tense above suggests "you would have seen/thought had you been there"; that is, it refers to what might or could have been/happened.

Further uses of the potential subjunctive are introduced in Cap. XLVIII.

II. Rēs Grammaticae Fūsius Explicātae

Subjunctive in Conditions

You have already seen the subjunctive in contrafactual, or unreal, conditions (Cap. XXXIII), referring to the present (imperfect subjunctive) or the past (pluperfect subjunctive):

> *Sī Mercurius essem ālāsque habērem…in Italiam volārem!*
>   (XXXIII.73–75): "If I were Mercury and I had wings,
>   I would fly into Italy!"

> *Sī iam tum hoc intellēxissem, certē patrem audīvissem nec ad*
>   *bellum profectus essem* (XXXIII.181–182): "If I had at that
>   time understood this, I would certainly have listened to my
>   father and I would not have set out for war."

The present subjunctive in a condition is potential and refers to a vague future, what might or could happen. Such conditions are variously labeled "future less vivid," "ideal," and, from their usual English translation, "should-would" conditions:

> *Ō dea, sī ā prīmā orīgine repetēns labōrēs nostrōs nārrem, ante*
>   *vesperum fīnem nōn faciam!* (XXXIX.133–135): "if I should
>   tell…I would not make an end."

III. Dēmonstrātiō Verbōrum

Cōnstat (Impersonal)

In Cap. VIII, you learned one meaning of *cōnstāre*: to cost:

> *Hic ānulus centum nummīs cōnstat.* (VIII.59)

The verb *cōnstāre* can also be used impersonally; *cōnstat* followed by accusative + infinitive states a fact: "it is certain," "it is an established fact that…":

> *cōnstat Trōiā captā Aenēam domō profugum prīmō in Macedo-*
>   *niam vēnisse.* (ll.2–3)

Convenit (Impersonal)

You met *convenit* as "fit" in Cap. VIII:

> *Tanta gemma ad tam parvum ānulum nōn <u>convenit</u>* (VIII.81–82): "Such a big jewel does not fit such a small ring" ("is not suitable for")

> *…sciēbat et tempus quō ipse eōs sustulisset ad id tempus <u>convenīre</u>* (ll.120–121)

Also note the impersonal use of *convenīre* about an agreement between two people:

> *inter frātrēs <u>convēnit</u> ut* (l.145): "it was agreed between the brothers," "the brothers agreed that…"

That which is agreed upon may be the subject of *convenīre*, e.g.:

> *Pāx ita <u>convēnerat</u> ut Etrūscīs Latīnīsque fluvius Albula, quem nunc Tiberim vocant, fīnis esset* (ll.66–68): "peace had been agreed on in such a way that…"

Both of the examples given show the construction as *convenit ut*, but, as is true of many Latin verbs, *convenit* will be found with more than one construction (e.g., accusative and infinitive).

> *lacrimāre puerō Rōmānō nōn convenit* (XV.63–64): "it is not fitting/suitable, for a Roman boy to cry."

4th Declension Verbal Nouns (Continued)

This chapter introduces more 4th declension verbal nouns (see Cap. XXXVIII):

> *discessus < discēdere*
> *adventus < advenīre*
> *partus < parere*
> *vāgītus < vāgīre*

Some 4th declension verbal nouns are found only in the ablative (ablative of cause, Cap. XXXVII) with a genitive or possessive pronoun: for example, *iussū*:

> *iussū rēgis* (l.119)
> *iussū meō*

IV. Recēnsiō: Uses of the Subjunctive

In Independent Clauses

You have already learned several uses for the independent subjunctive.

- Deliberative questions (Cap. XXIX); negative: *nōn*

  > *Quid faciam? Quid spērem?* (XXIX.22–23): "what should I do? What can I hope for?"

  > *Quid facerem?* = "What was I to do?"

- Negative commands (Cap. XXXII); negative: *nē*

  > *Nē timueris! Nē timueritis!!* (XXXII.215, 199 = *nōlī/nōlīte timēre*): "Don't be afraid!"

- Volitive subjunctive:[2] act of will; negative: *nē*

  Hortatory subjunctive (Cap. XXX)

  > *Triclīnium intrēmus!* (XXX.86–87): "Let's go into the dining room!"

  > *Gaudeāmus atque amēmus* (XXXI.173): "Let us rejoice and let us love"

  Jussive subjunctive (Cap. XXXI)

  > *Quisquis fēminās amat, pōculum tollat et bibat mēcum!* (XXXI.176–177): "Whoever loves women, let him lift his cup and drink with me!"

- Optative subjunctive: wish/desire (Cap. XXXI); negative: *nē*

  > *Vīvat fortissimus quisque! Vīvant omnēs fēminae amandae!* (XXXI.172–173)

---

2. Jussive and hortatory are both *volitive* subjunctives; they express an act of will (hortatory in 1st person, jussive in 3rd).

> *Utinam salvī in Graeciam perveniant!* (XXXII.223): "I hope
>   they arrive safe into Greece!"/"May they arrive safe into
>   Greece."

> *Utinam nē pīrātae mē…occīdant!* (XXXII.179–180): "May the
>   pirates not kill me"/"I hope the pirates don't kill me."

> *Utinam ego Rōmae essem!* (XXXIII.67): "I wish I were at Rome"/
>   "Would that I were at Rome."

> *Utinam patrem audīvissem!* (XXXIII.66): "I wish I had listened
>   to my father"/"Would that I had listened to my father."

Rhetorical Questions

In Cap. XXIX, you learned about **deliberative** questions. **Rhetorical** questions are also usually in the subjunctive; the subjunctive here is potential and the assumed answer is "no" or "no one," i.e., "Who could _____?" "No one."

> *Quis enim rem tam veterem prō certō <u>affirmet</u>?* (ll.53–54): "For
>   who could confirm such an old affair for certain?"

> *Quis <u>crēdat</u> puerīs nōn nocuisse feram?* (l.228): "Who would be-
>   lieve that a wild beast did not harm the boys?"

> *Quis genus Aenĕadum, quis Trōiae <u>nesciat</u> urbem*?
>   (XXXIX.219): "Who could not know the family of the Ae-
>   neadii, who could not know the city of Troy?"

Summary of Conditions

Conditions refer to the present, past, or future. When they refer to facts, they take the indicative; otherwise they take the subjunctive. The difference between the indicative and the subjunctive in a condition can be seen in the excerpt from Ovid's *Fāstī* that concludes the book (ll.213–216). When the slaves bring the newborns Romulus and Remus to the bank of the Tiber, one exclaims (ll.397–400):

> *Sī genus <u>arguitur</u> vultū, nisi fallit imāgō,*
>   *nescioquem in vōbīs <u>suspicor</u> esse deum.*

> *At sī quis vestrae deus <u>esset</u> orīginis auctor*
>   *in tam praecipitī tempore <u>ferret</u> opem.*

The first sentence is a statement of fact and uses the indicative: based on their appearance, the slave suspects the children have some sort of divine parentage. In the second (present contrafactual), the slave expresses doubt about the divinity of Romulus and Remus: if they were the children of a god, that god would bring help.

Conditions can be summarized as follows:

Type	Time	Mood and Tense of Conditional Clauses	Translation helps
General	present	present indicative *Sī hunc librum legit, multa cognoscit.*	"is…is" If she is reading this book, she is learning many things.
	past	imperfect or perfect indicative *a. Sī hunc librum lēgit, multa cognōvit.* *b. Sī hunc librum lēgēbat, multa cognoscēbat.*	"was…was" a. If she read this book, she learned many things. b. If she was reading this book, she was learning many things.
	future	future (protasis often future perfect) indicative *a. Sī hunc librum lēgerit, multa cognoscet.* *b. Sī hunc librum leget, multa cognoscet.*	"(present)…will" a. If she reads/will have read this book, she will learn many things. b. If she reads this book, she will learn many things.
Ideal	future	present subjunctive in both *Sī hunc librum legat, multa cognoscat.*	"should…would" If she should read this book, she would learn many things.
Contrary-to-fact	present	imperfect subjunctive *a. Sī hunc librum legeret, multa cognosceret.*	"were…would be" If she were reading this book, she would be learning many things.
	past	pluperfect subjunctive *Sī hunc librum lēgisset, multa cognōvisset.*	"had…would have" If she had read this book, she would have learned many things.

Conditions in *ōrātiō oblīqua* (Indirect Discourse)

In Cap. XXXVI you learned that in indirect discourse the verb in a subordinate clause will be in the subjunctive according to sequence of tense. When conditions are reported, they generally follow this same rule:

- The apodosis (the "then" clause) is a main clause so it changes to subject accusative and verb infinitive.
- The protasis (the "if" clause) is a subordinate clause and the verb goes into the subjunctive.

Sequence of Tense

Main Verb	Subordinate Verb	
	incomplete action	completed action
present & future tense	present subjunctive	perfect subjunctive
past tense	imperfect subjunctive	pluperfect subjunctive

Examples

Let's look at some examples, based on a line from the Roman poet Horace:[3] *Rēx est sī rectē facit*: "he is a king if he behaves correctly."

Indicative Conditions

Present: The tense of the verb in the protasis depends on the main verb:

> *Rēx est sī rectē facit → Putō eum rēgem esse sī rectē faciat.*
> *Rēx est sī rectē facit → Putābam eum rēgem esse sī rectē faceret.*

Past: The tense of the verb in the protasis depends on the main verb.

> *Rēx erat sī rectē fēcit → Putō eum rēgem fuisse sī rectē fēcerit.*
> *Rēx erat sī rectē fēcit → Putābam eum rēgem fuisse sī rectē fēcisset.*

Future:

- Future in both clauses
    > *Rēx erit sī rectē faciet → Putō eum rēgem fore/futūrum esse sī rectē faciat.*
    > *Rēx erit sī rectē faciet → Putābam eum rēgem fore/futūrum esse sī rectē faceret.*

---

3. Horace *Epistles* I.1.59–60: *Rēx eris sī rectē faciēs.*

- Protasis future perfect/apodosis future (Cap. XLI):

    > *Rēx erit sī rectē fēcerit → Putō eum rēgem fore/futūrum esse sī rectē fēcerit.*

    > *Rēx erit sī rectē fēcerit → Putābam eum rēgem fore/futūrum esse sī rectē fēcisset.*

Notā bene: A protasis in the future perfect represents something that will happen before the action in the apodosis (Cap. XXX); in *ōrātiō oblīqua* it becomes:

- perfect subjunctive in primary sequence

- pluperfect subjunctive in secondary sequence

Subjunctive Conditions

Ideal ("should…would"): present subjunctive in both clauses becomes:

> *Rēx sit sī rectē faciat → Putō eum rēgem fore/futūrum esse sī rectē faciat*
>
> *Rēx sit sī rectē faciat → Putābam eum rēgem fore/futūrum esse sī rectē faceret*

Notā bene: In *ōrātiō oblīqua*, future indicative and future ideal conditions look the same.

Contrafactual Present ("were…would be"): imperfect subjunctive in both clauses becomes:

> *Rēx esset sī rectē faceret → Putō eum rēgem futūrum fuisse sī rectē faceret*
>
> *Rēx esset sī rectē faceret → Putābam eum rēgem futūrum fuisse sī rectē faceret*

Contrafactual Past ("were…would be"): pluperfect subjunctive in both clauses becomes:

> *Rēx fuisset sī rectē fēcisset → Putō eum rēgem futūrum fuisse sī rectē fēcisset*
>
> *Rēx fuisset sī rectē fēcisset → Putābam eum rēgem futūrum fuisse sī rectē fēcisset*

Notā bene:

- The form *futūrum fuisse* is used only here: in the apodoses of contrafactual conditions in *ōrātiō oblīqua*.

- The rules for sequence of tense are violated in these conditions:

  ▷ Present contrafactual keeps imperfect subjunctive in the protasis regardless of leading verb.

  ▷ Past contrafactual keeps pluperfect subjunctive in the protasis regardless of leading verb.

- These oddities make recognizing a reported contrafactual condition quite easy.

Iterative Subjunctive: in general conditions, the imperfect and pluperfect subjunctive can be found in the protasis of a condition when the action is habitual or recurrent; the apodosis is indicative, e.g., Cap. LI.199–201:

> *Quem mīlitem extrā ōrdinem dēprehendit, sī Rōmānus esset,*
> *vītibus, sī extrāneus* (sc. *esset*), *virgīs cecīdit.*

V. POINTS OF STYLE

Variātiō (**Variation of Expression**)

The 3rd person plural can be used in a general sense, as *vocant* here:

> …*fluvius Albula, quem nunc Tiberim* <u>*vocant*</u>, *fīnis esset* (ll.66–68):
> "…the river Albula, which they now call the Tiber"

"They (i.e., people) call" (cf. *ut āiunt*, XXIV.61). We do the same in English, e.g., "they say that…" when we don't have anyone in particular in mind. The following are different ways of saying the same thing in Latin:

- *Priōrī Remō auspicium vēnisse dīcitur* (l.147): "The bird sign is said to have come to Remus first" = *Priōrī Remō auspicium vēnisse dicunt*: "They say that the bird sign came to Remus first."

- *quem nunc Tiberim vocant* = *qui nunc Tiberis vocātur* (l.67)

- *Ea…mītis fuisse dīcitur* = *eam mītem fuisse nārrant* (ll.100–101)

- *Aenēam Trōiā vēnisse dīcitur/nārrātur* = *Aenēam Trōiā vēnisse dīcunt/nārrant*

Implied Indirect Discourse/Subjunctive of Reported Reason

Indirect discourse (*ōrātiō oblīqua*) does not always have a clear "signal" telling readers that a sentence is reporting another's words or thoughts. We have already seen many examples of extended indirect discourse and examples where the reader needs to pay attention to the leading verb.

The subjunctive is frequently employed in causal clauses that would other- wise take the indicative to indicate that the writer offers someone else's reason. In other words, the causal clause becomes a virtual indirect statement:

> *Īdem nefāstōs diēs fāstōsque fēcit, quia aliquandō nihil cum populō agī ūtile futūrum esset.* (ll.323–324)

Livy is reporting Numa's reason for dividing the days into *fāstī* and *nefāstī*. Were Livy giving his *own* reason, he would have used the indicative (*futūrum est* or simply *erit*).

Descriptive Relative Clauses (Continued from Cap. XXXIX)

When relative clauses state facts about the antecedent, they are followed by the indicative. But as we have seen with both purpose and result clauses (Cap. XXXIX), *quī* can sometimes be the equivalent of *ut is*. Such clauses describe something about the nature of the antecedent, and, like result clauses, have their origin in the potential subjunctive. Descriptive relative clauses, like result clauses, do not describe a fact, but rather a tendency, quality, or design.

The best way to understand these clauses is to look at examples.

---

1.   For an explanation of the line number references convention, see p. xxvi.

In some relative clauses, the subjunctive indicates result or quality, as in:

> *sōlī centum cīvēs nōbilēs erant quī senātōrēs creārī possent* (l.17, virtually the same as *tam nōbilēs…ut…possent*)

> *Invēnī ratiōnem, Anna, quae mihi reddat eum aut amōre eius mē solvat* (XL.175–177)
>> *not* "a way of thinking that is either returning Aeneas to me or freeing me from love of him"
>> *but* "a way of thinking that could return…or free" (*ratiōnem ut*)

After the adjective *dignus*, such a relative clause is common, as it describes the natural consequence of being worthy (or unworthy: *indignus*) (for natural consequence, see Recēnsiō below):

> *sī rēgem <u>dignum</u> <u>quī</u> secundus ab Rōmulō <u>numerētur</u> creāveritis, auctōrēs fīent* (ll.276–278): "worthy to be numbered second after Romulus"

As you saw in Cap. XXXIX, descriptive relative clauses are especially common after indefinite antecedents:

> *Fuisse crēdō tum quoque aliquōs quī 'rēgem ā patribus interēmptum esse' clam arguerent.* (ll.241–242)

Priusquam/antequam with Subjunctive

You have already learned the temporal conjunctions *postquam*, *antequam*, and *priusquam* with the present or future perfect indicative (Cap. XXXI) and with the perfect indicative (Cap. XXXVII) to express what actually will happen or has happened before the action of the main clause. The conjunctions *priusquam* and *antequam* may be followed by the subjunctive to indicate what is anticipated; there is an element of <u>purpose</u> to the clause.

Prius/ante quam with the

Indicative →

- present/future perfect: what will happen before the action of the main verb

- perfect: what actually *did* happen before the action of the main verb

Subjunctive →

- present (primary sequence) or imperfect (secondary sequence) subjunctive: what *could* happen before the expected or anticipated action of the main verb occurs

Examples:

Fidēnātēs…priusquam (*urbs*) *tam valida esset quam futūra esse vidēbātur, properant bellum facere* (ll.184–186): "The people of Fidenae, before the city could become as strong as it seemed it would be, hasten to make war."

> Note here, as usual, the subjunctive is in secondary sequence because the present *properant* is historical (Cap. XXXVII).

Fidēnātēs, prius paene quam Rōmulus equitēsque quī cum eō erant circumagerent equōs, terga vertērunt atque oppidum repetēbant (ll.201–203): "The people of Fidenae, almost before Romulus and the cavalry who were with him could turn their horses around, turned their backs and were returning to the town."

priusquam forēs portārum oppōnerentur, Rōmānī velut ūnō agmine in oppidum irrūpērunt. (ll.205–206)

Prius igitur quam alter—nec procul aberat—cōnsequī posset, et alterum Cūriātium cōnficit. (XLIII.107–109)

Priusquam inde dīgrederentur, Tullus Mettiō imperat… (XLIII.123)

III. Dēmonstrātiō Verbōrum

Indefinite Pronouns

In addition to the indefinite pronouns *quīcumque*, *quaecumque*, and *quodcumque*, "whoever, whatever" (Cap. XXXVIII), the pronouns *quī-quae-quod/quid* can combine with other words as well to form other indefinite pronouns. These pronouns are variations on a theme and mean essentially the same thing: "whoever/whatever you please/want, anyone/anything":

quīlibet, quaelibet, quodlibet/quidlibet = quī-quae-quod/quid + libet

libet: "it is pleasing"

quīvīs, quaevīs, quodvīs/quidvīs = quī-quae-quod/quid + vīs

vīs: "you will/want"

As with the *-cumque* pronouns, *quīcumque, quaecumque,* and *quodcumque,* only the *quī, quae, quod/quid* declines:

quīlibet homō (l.13): "any person you will" = "anyone at all"

cuilibet fīnitimārum cīvitātum bellō par (ll.21–22): "equal in war to whichever of the neighboring states."

Cum…tum

The conjunctions *cum…tum* join two items, underscoring the second:

Cum vestem purpuream induit, tum līctōrēs duodecim sūmpsit, quī fascēs et secūrēs gerentēs rēgī anteīrent. (ll.6–8)

Movet rēs cum multitūdinem, tum ducēs. (l.160)

IV: Recēnsiō

Result vs. Purpose

- *Purpose* clauses are also called "final" clauses because the clause indicates the *end* (*fīnis*) in sight for the action in the main clause. Purpose clauses are related to the volitive subjunctive (e.g., jussive and hortatory).

- *Result* clauses are also called "consecutive" clauses because the clause indicates what *follows* (*cōnsequī*) either actually or naturally from the action in the main clause. Result clauses come originally from the potential subjunctive (Cap. XLI); the clause states the natural potential of the main clause.

Notice that in purpose and result clauses the sequence is incomplete:

- A present/future tense main verb is followed by a present subjunctive.

- A past tense main verb is followed by an imperfect subjunctive.

Purpose clauses are negated by *nē*; result by *ut nōn*:

	Negative Purpose	**Negative Result**
that…not	*nē*	*ut…nōn*
that…no one	*nē quis*	*ut…nēmo*
that…nothing	*nē quid*	*ut…nihil*
that…never	*nē umquam*	*ut…numquam*

Words that signal result clauses:

tantus, -a, -um	so great	adjective of magnitude, quantity
tālis, tāle	of such a sort	adjective of quality
eius modī	of such a sort	descriptive genitive
tot	so many	adjective of quantity
sīc	in this way	adverb
ita	so, in such a way	adverb
adeō	so far, to such an extent	adverb
tam	so	adverb: only w/adjs. & advs.

A Note on Sequence of Tense in Result Clauses

We tend to think of a result clause as showing something that did happen as a result of the activity in the main clause—e.g., "I studied so hard that I got an A," where "I got an A" is what actually happened. Latin often sees the relationship differently—e.g., "I studied so hard that the natural result was an A." That is, the stress is not on the achievement of the result, but that the result was a natural potential or outgrowth of the activity of the verb or adverb. The leading verb is the *cause* of the *result*. Hence, the sequence in result clauses is usually the same as purpose clauses: uncompleted action.

Look at each of the following examples from this chapter:

> *Ab illō vīribus datīs, tantum valuit urbs Rōma ut in quadrāgintā deinde annōs tūtam pācem habēret* (ll.223–224): "The city grew *so strong* (*tantum valuit*) that the natural consequence was peace."

> *Cum hoc sēnsissent patrēs, populō concēdendum esse cēnsuērunt—ita tamen ut nōn plūs iūris darent quam retinērent* (ll.269–271): "The senators voted to concede *in such a way* (*ita…ut*) that they could retain power."

> *Iam rēs Rōmāna <u>adeō</u> erat <u>valida</u> <u>ut</u> cuilibet fīnitimārum*
> *cīvitātum bellō pār <u>esset</u>* (ll.21–22): "Rome was *so strong*
> (*adeō valida*) that the inevitable outcome was its equality
> in war."

The perfect subjunctive can be used in result clauses when the speaker wishes
to stress the result as something completed, as a fact, e.g. Cap. LI. 7881:

> *Masinissa…adeō…in senectā viguit ut post sextum and*
> *ocōgēsimum annum filium genuerit:* "Masinissa was *so vigorous*
> in his old age that he fathered a son after his 86th year."

Summary of Expressions of Purpose

Latin expresses purpose in a variety of ways:

    1. an *ut/nē*-clause with the subjunctive, e.g.,

- *<u>Ut</u> hominēs agrestēs novum rēgem <u>verērentur</u>, ipse sē augustiōrem fēcit īnsignibus imperiī.* (ll.4–5)

- *<u>nē</u> vāna urbis magnitūdō <u>esset</u>…* (l.10)

- *<u>ut</u> arx potius vī quam dolō capta esse <u>vidērētur</u>* (ll.106–107)

- *<u>ne</u> quis impūne patriam suam <u>prōderet</u>* (l.108)

- *<u>Ut</u> Sabīnī tamen aliquid <u>darētur</u>, cīvēs Rōmānī 'Quirītēs' ā Curibus appellātī sunt.* (l.164)

- *Vēientēs…ēgressī sunt, <u>ut</u> potius aciē <u>certārent</u> quam inclūsī dē tēctīs moenibusque <u>dīmicārent</u>.* (ll.213–215)

- *<u>Nē</u> huic fāmae plēbs <u>crēderet</u>, Proculus Iūlius, senātor nōbilissimus, in contiōnem prōdiit.* (ll.242–243)

- *…putābat itūrōsque ipsōs ad bella, <u>nē</u> rēge absente sacra <u>neglegerentur</u>* (ll.328–329)

- *hīs, <u>ut</u> assiduae templī sacerdōtēs <u>essent</u>, stipendium dē pūblicō statuit* (ll.332–333)

- *Cētera quoque omnia pūblica prīvātaque sacra pontificī mandāvit, <u>ut</u> <u>esset</u> quem plēbs cōnsuleret, <u>nē</u> rītus neglegerentur.* (ll.340–342)

2. a relative clause with subjunctive (where *quī = ut is*, Cap. XXXIX), e.g.,

- *Rōmulus ex cōnsiliō patrum lēgātōs ad vīcīnās gentēs mīsit, <u>quī</u> societātem cōnūbiumque nōvō populō <u>peterent</u>.* (ll.24–26)

- *līctōrēs duodecim sūmpsit, <u>quī</u> fāscēs et secūrēs gerentēs rēgī <u>anteīrent</u>.* (ll.6–7)

- *Rōmulus ex cōnsiliō patrum lēgātōs ad vīcīnās gentēs mīsit, <u>quī</u> societātem cōnūbiumque nōvō populō <u>peterent</u>.* (ll.24–26)

- *Iānum ad īnfimum Argīlētum fēcit, <u>quī</u> apertus bellum, clausus pācem esse <u>indicāret</u>.* (ll.306–307)

3. *Quō* + comparative + subjunctive: relative purpose clause (introduced in Cap. XLIX)

4. the supine in *-um* (accusative) (Caps. XXII, XXXVI), e.g.,

- *Huius fīlia virgō forte aquam <u>petītum</u> extrā moenia <u>ierat</u>.* (ll.103–104)

- *Eā clāde coāctī Vēientēs pācem <u>petītum</u> legātōs Rōmam <u>mittunt</u>.* (ll.219–220)

5. *ad* + gerund/gerundive (Caps. XXVI, XXXVI), e.g.,

- *Hodiē plūs temporis <u>ad</u> <u>nārrandum</u> nōn habeō.* (XXVI.10–11)

- *Haud longum tempus nōbīs reliquum est <u>ad</u> <u>vīvendum</u>.* (XXVI.28)

- *Ūna via nōbīs patet <u>ad</u> <u>fugiendum</u>.* (XXVI.36)

- *signō datō iuventūs Rōmāna <u>ad</u> <u>rapiendās</u> <u>virginēs</u>* (ll.41–42)

- *Inde <u>ad</u> <u>foedus faciendum</u> dūcēs prōdeunt.* (l.161)

- *<u>ad</u> <u>turbandam</u> omnium <u>pācem</u>* (l.346)

- *<u>ad</u> <u>arcendam</u> <u>vim</u>* (XLI.8)

6. *causā, grātiā* + a preceding genitive of gerund/gerundive (Cap. XXVI), e.g.:

- *lēgātōs mīsit pācis petendae causā/grātiā*

- *lēgātōs mīsit pācem petendī causā/grātiā*

7. future participle after verbs of motion:

- *Ille in Italiam trāiēcit bellum cīvīle gestūrus adversus Norbānum et Scīpiōnem cōnsulēs* (LIII.114–116)

V. Points of Style

Perfect Tense 3rd Person Plural

Instead of the ending *-ērunt* in the past perfect (3rd pers. plur.), you sometimes find the older form *-ēre*, both in poetry and in prose. Book II of the *Aeneid* begins *Conticuēre omnēs…* (XXXIX.304). Livy is fond of this form, as the many examples from this chapter show:

> *convēnēre = convēnērunt* (l.34)
> *necāvēre = necāvērunt* (l.106)
> *tenuēre = tenuērunt* (l.114)
> *subiēre = subiērunt* (l.118)
> *restitēre = restitērunt* (l.135)
> *ēripuēre = ēripuērunt* (l.205)
> *rediēre = rediērunt* (l.210)
> *audīvēre = audīvērunt* (l.213)

The alternate form can be very useful for writing verse, as these two lines in the meter of the elegiac couplet from Ovid show:

> *sīc īllae tĭmŭērĕ |vĭrōs sĭnĕ lēgĕ rŭēntēs = illae timuērunt* (l.364,
>   a hexameter line)

> *(raptae) īn tērrām pŏsĭtō ‖ prōcŭbŭērĕ gĕnū = prōcubuērunt*
>   (l.385, a pentameter line)

-um = *-ōrum*

Other archaic forms are *-um* for *-ōrum* in *deum*:

> *pater deum hominumque = pater deōrum hominumque* (l.128)

> *X mīlia sēstertium = mīlia sēstertiōrum*[2]

---

2. Cf. l.32: *X mīlia sēstertium = X mīlia sēstertiōrum*: 10 thousand sesterces. With *mīlia* you will regularly find *sēstertium*, not *sēstertiōrum*.

Perfect Participles

In Ablative Absolute

The perfect participle is a passive form and states what has or had been done (in English rendered by a clause beginning "after…" or "when…" or "because"). Livy often uses an ablative absolute with the perfect participle, and there are thirty examples of ablative absolutes in this chapter alone, e.g.:

> *rēbus dīvīnīs rīte factīs* (l.2)
> *vocātāque ad concilium multitūdine* (l.2)
> *cīvitāte ita auctā* (l.15)
> *plērīsque rogitantibus* (l.29)
> *turbātō per metum lūdicrō* (l.43)
> *duce hostium occīsō* (ll.71–72)

Of Deponent Verbs

Livy also uses the nominative of the perfect participle of deponent verbs (passive form with active meaning) agreeing with the subject in order to tell what someone has or had done (or does/did), e.g.:

> (*Rōmulus*) *ēgressus* (l.192): "Romulus, having gone out"

> *ipse cum parte māiōre atque omnī equitātū profectus* (ll.193–194): "he himself, having set out with the larger part [of the soldiers] and all the cavalry"

> *subitō exortī Rōmānī* (l.199): "the Romans, having suddenly sprung up"

> *persecūtus* (l.217): "having pursued" or "after pursuing"

> *locūtus* (l.251): "after he said [these things]"

> *ausī* (l.287): "daring"

> *deōs…precātus* (l.295): "having invoked the gods," "after he invoked the gods"

> *rēgnō potītus* (l.303): "having gained mastery of the kingdom"

> *ratus* (l.305): perfect participle of *rērī*, "thinking" or "as he thought"

Uti/utī for *ut*

Uti/utī instead of *ut* is found mostly in elevated style, as in the augur's prayer:

> *Iuppiter pater,…<u>uti</u> tū signa nōbīs certa dēclārēs inter eōs fīnēs quōs fēcī.* (ll.298–301)

> *…exercitus inclāmat Cūriātiīs <u>uti</u> opem ferant frātrī* (XLIII.103–104)

> *…Tullus Mettiō imperat <u>uti</u> iuventūtem in armīs habeat* (XLIII.123–124)

II. Rēs Grammaticae Fūsius Explicātae:

Posse, oportēre, dēbēre

You have met the past tense of *posse* with a present infinitive:

> *Miror te crus non fregisse. Facile os frangere potuisti* (XXIV.32–33): "I'm amazed you did not break your leg. You could easily have broken a bone."

Notice that Latin uses the past tense of *posse* with a present infinitive, the marker that shows the action of the verb as ongoing and incomplete (see Cap. XL). This is the usual construction with verbs that show what is fitting, necessary, or possible. We find the same construction at the end of this chapter:

> *Tamen ā frātre indemnātam necārī nōn oportuit.* (ll.353–354)

For such verbs in contrafactual conditions, see Cap. XLVI.

Fore/forem (esse)

The verb *esse* has an alternate imperfect subjunctive:

> *forem = essem*
> *forēs = essēs*
> *foret = esset*
> *forent = essent*

---

1.   For an explanation of the line number references convention, see p. xxvi.

No alternate form is found for *essēmus* and *essētis*.

This form looks a good deal like the alternate future active infinitive, *fore*, which you met in Cap. XXXIII:

> *aciēs spectāculō <u>fore</u> Etrūscīs* (ll.59–60)
> *'ibi imperium <u>fore</u> unde victōria fuerit'* (ll.70–71)

Conditions in *Ōrātiō oblīqua*

In Cap. XXXVI you learned that in indirect discourse the verb in a subordinate clause will be in the subjunctive according to sequence of tense. When conditions are reported, they generally follow this same rule:

- The apodosis (the "then" clause) is a main clause so it changes to subject accusative and verb infinitive.

- The protasis (the "if" clause) is a subordinate clause and the verb goes into the subjunctive.

Sequence of Tense

Main Verb	Subordinate Verb	
	incomplete action	completed action
present & future tense	present subjunctive	perfect subjunctive
past tense	imperfect subjunctive	pluperfect subjunctive

Here we consider the three examples in *ōrātiō oblīqua* from this chapter:

- "Mixed condition" in *ōrātiō oblīqua*: protasis future, apodosis present-perfect, primary sequence (ll.22–25):
  > *Illī prīmum sē pūrgāre cōnantur: 'sē invītōs aliquid quod displiceat Tullō dictūrōs esse: rēs repetītum sē vēnisse; nisi reddantur, bellum indīcere iussōs esse.'*

  > Direct statement: *Invītī aliquid quod displicet Tullō dīcēmus: rēs repetītum vēnimus; nisi reddentur, bellum indīcere iussī sumus.*

  - ▷ *Notā bene*: the future of the protasis comes from context: a present (*redduntur*) would, in *ōrātiō oblīqua*, also go into the present subjunctive.

- Future condition in *ōrātiō oblīqua*, historical present, with the indirect command (*imperat uti…habeat*) in primary sequence to continue the vividness of the historical present, *foret* and *dīgrederentur* in secondary sequence (ll.123–125):

  > *Priusquam inde dīgrederentur, Tullus Mettiō imperat uti iuventūtem in armīs habeat: 'sē eōrum operā ūsūrum, sī bellum cum Vēientibus foret.'*

  > Direct statement: *eōrum operā ūtar, sī bellum cum Vēientibus erit.*

- Protasis of a future condition in *ōrātiō oblīqua,* secondary sequence, with the apodosis implied (ll.328–331):

  > *Iam hominēs eum statum rērum quī sub Numā rēge fuerat dēsīderantēs, ūnam opem aegrīs corporibus relictam esse crēdēbant: sī veniam ā dīs impetrāvissent.*

  > Direct statement: *sī veniam ā dīs impetrāverimus* [*opem aegrīs corporibus habēbimus*: i.e., the apodosis must be supplied from "they believed that one resource was left for their sick bodies"].

Ablative of Degree of Difference

The ablatives *multō* and *paulō* can be used before a comparative to indicate the degree of difference (Cap. XVI), for example, *multō melior*: "much better" ("better by much").

We have already seen *tantus* and *quantus* used alone or as correlatives (Cap. VIII); they are also used as ablatives of degree of difference either alone (*tantō melior:* "so much the better"), or combined with *quantō*:

> *quantō longior, tantō melior* ("the longer the better")

Other correlative ablatives of degree of difference:

> *eō* and *quō*

> *quō propior es, eō magis scīs* (ll.57–58): "to the degree that you are closer, the better you know"

Other examples:

> <u>eō</u> <u>māiōre</u> <u>cum</u> <u>gaudiō</u> *quod prope metum rēs fuerat* (l.117):
>   "with so much the greater joy because the situation had
>   been close to fear"

> *eo magis* (XLIV.143)

Pronoun Change from Direct to Indirect Discourse

When a statement is reported, the perspective changes, just as it does in English.

> Julia: "I'd like to read this book now" = *mihi placet hunc librum*
>   *nunc legere.*

> "She said she would like to read that book at that time (then)" =
>   *dīxit sibi placēre illum librum eō tempore* (*tunc*) *legere.*

Note the shift of pronouns from direct to indirect statement, and vice versa:

> Direct Statement:
>   *"Diī patriī, patria ac parentēs omnēsque cīvēs vestra arma*
>   *nunc, vestrās manūs intuentur."*

> Indirect Statement: *vestra*, *vestrās* changes to *illōrum* (ll.26–28)
>   '*deōs patriōs, patriam ac parentēs omnēsque cīvēs illōrum*
>   *tunc arma, illōrum intuērī manūs!*' (ll.78–80)

> Indirect Statement (ll.124–125)
>   '*sē eōrum operā ūsūrum, sī bellum cum Vēientibus foret*'

> Direct Statement:
>   '*vestrā operā ūtar, sī bellum cum cum Vēientibus erit*'

III. Dēmonstrātiō Verbōrum

Superlatives in *-limus, -a, -um*

In addition to *facilis* and *difficilis* there are four other adjectives that form superlatives in *-limus, -a, -um*:

> *cīvīlī bellō simillimum* (l.30)

facilis, -e	*facilior, facilius*	*facillimus, -a, -um*	easy
difficilis, -e	*difficilior, difficilius*	*difficillimus, -a, -um*	difficult
similis, -e	*similior, similius*	*simillimus, -a, -um*	similar, like (+ dat.)
dissimilis, -e	*dissimilio, dissimilius*	*dissimillimus, -a, -um*	dissimilar, unlike (+ dat.)
gracilis, -e	*gracilior, gracilius*	*gracillimus, -a, -um*	slender
humilis, -e	*humilior, humilius*	*humillimus, -a, -um*	low, lowly (*humus*)

Uter, uterque

You learned the pronouns *uter* and *uterque* in Cap. XIV. Like *neuter* and *alter*, *uter* and *uterque* are used about two things or people taken separately. Normally these pronouns are singular, e.g.:

> *uter…populus* (ll.26–27)
> *utrīusque populī* (l.63)

When plural forms occur, they refer to two groups of persons or things, "both parties." Such plurals are quite common in referring to two contending peoples, e.g.:

> *utrī utrīs imperent* (l.64)
> *cum utrīque suōs adhortārentur* (l.78)
> *utrīque suōs mortuōs sepeliunt* (l.118)
> *cum bellum utrīque summā ope parārent* (l.304)

Utrimque

From *uterque* is formed the adverb *utrimque* ("from/on both sides"). This adverb occurs frequently when fighting is described, e.g.:

> *utrimque lēgātī…missī sunt* (ll.13–14): "envoys were sent from both sides."
>
> *bellum utrimque omnibus vīribus parābatur* (ll.29–30): "war was being prepared on both sides with all their force."
>
> *instrūctī utrimque stābant* (l.51)
>
> *cōnsēderant utrimque prō castrīs duo exercitūs* (ll.81–82)

Velut

Velut (Cap. XXVIII) means "as, as if" and is here used in two different contexts:

Modifying a single word:

> *īnfēstīsque armīs velut aciēs ternī iuvenēs* (ll.84–85): "the young men like (as) a battle line"
>
> *pulvisque velut nūbe omnia implēverat* (ll.278–279): "dust, as if by a cloud, had filled everything"
>
> *Velut* working in similes: *velut captōs relinquerent deōs* (l.285)

Modifying an ablative absolute:

> *velut dīs quoque simul cum patriā relictīs* (l.316)

Rēs repetere

Rēs repetere: to seek reparations or compensation:

> *Utrimque lēgātī eōdem ferē tempore ad rēs repetendās missī sunt.* (ll.13–14)
>
> *Iniūriae et rēs nōn redditae, quae ex foedere repetītae sunt.* (ll.52–54)

IV. Points of Style

Variātiō

For the sake of variation, Latin writers sometimes replace an adjective-noun combination with an abstract noun combined with a genitive. Horatius Senior first refers to *tam dēfōrme spectāculum* (adjective/noun, l.170) and later to *tantā foeditāte suppliciī* (noun + noun, l.178); the description of Mettius's horrifying punishment ends: *āvertēre omnēs ab tantā foeditāte spectāculī oculōs* (noun + noun, l.265).

XLIV: QVADRAGESIMVM QVARTVM: REGES ET REGINAE (Livy)[1]

I. Rēs Grammaticae Novae

Historical Infinitive

In vivid narration, the present indicative is often substituted for the past (Cap. XXXVII). The present infinitive can be employed in the same way, and this historical infinitive also has the force of the indicative (imperfect 3rd person). The subject of the historical infinitive is nominative, not accusative. Livy uses the historical infinitive frequently:

> (Tullia) *alterum Tarquinium <u>admīrārī</u>, 'eum virum esse' <u>dīcere</u> 'ac rēgiō sanguine ortum'; <u>spernere</u> sorōrem quod virō audācī nūpta ipsa audāciā carēret; nūllīs verbōrum contumēliīs <u>parcere</u>. (ll.374–377)*

> *ab scelere ad aliud scelus <u>spectāre</u> mulier. Nec nocte nec interdiū virum conquiēscere <u>patī</u> (ll.383–385)*

> *Hōc muliebrī furōre īnstīnctus Tarquinius <u>circumīre</u> et <u>conciliāre</u> sibi patrēs. <u>Admonēre</u> Tarquiniī Prīscī beneficiī ac prō eō grātiam <u>repetere</u>. <u>Allicere</u> dōnīs iuvenēs. Cum ingentia pollicendō, tum rēgis crīminibus, omnibus locīs <u>crēscere</u>. (ll.402–406)*

Notā bene: Because the historical infinitive has the force of an *imperfect* indicative, subordinate clauses follow secondary, not primary sequence. In the first example above, note:

> *…admīrārī…dīcere…spernere sorōrem quod virō audācī nūpta ipsa audāciā <u>carēret</u>*

---

1. For an explanation of the line number references convention, see p. xxvi.

Historical infinitives (nominative + infinitive: vivid narration) often shift into indirect speech (accusative + infinitive: reported speech). In your text, such shifts are marked by single quotes ('). **Such punctuation is not usual in Latin texts; you'll need to pay attention to the shift**. Study the passage below (383–389):

> *Iam enim ab scelere ad aliud scelus spectāre mulier. Nec nocte nec interdiū virum conquiēscere patī, nē grātuīta praeterita parricīdia essent: 'nōn sibi dēfuisse marītum cum quō tacita servīret—dēfuisse virum quī sē rēgnō dignum esse putāret, quī meminisset sē esse Prīscī Tarquiniī fīlium, quī habēre quam spērāre rēgnum māllet!'*

- *Iam enim ab scelere ad aliud scelus spectāre mulier*:
  - ▷ historical narration: nominative subject + infinitive verb
  - ▷ = *Iam enim ab scelere ad aliud scelus <u>spectābat</u> mulier.*

- *Nec nocte nec interdiū virum conquiēscere patī, nē grātuīta praeterita parricīdia essent*:
  - ▷ historical narration: subject left unstated, followed by a negative purpose clause in secondary sequence (because the historical infinitive represents the imperfect)
  - ▷ = *Nec nocte nec interdiū virum conquiēscere <u>patiebātur</u>, nē grātuīta praeterita parricīdia essent.*

- *'nōn sibi dēfuisse marītum cum quō tacita servīret—dēfuisse virum quī sē rēgnō dignum esse putāret, quī meminisset sē esse Prīscī Tarquiniī fīlium, quī habēre quam spērāre rēgnum māllet!'*:
  - ▷ indirect statement representing what she was saying to her husband, containing:
      a purpose clause (*cum…servīret*)
      three relative clauses of character or tendency (Cap. XXXIX/XLII): not "I lack a husband who thinks…" but "I lack the kind of husband who would think himself worthy of the kingdom."
  - ▷ = (in the original present tense) *'nōn <u>mihi·dēest</u> <u>marītus</u> cum quō tacita <u>serviam</u>—<u>dēest·vir</u> quī sē rēgnō dignum esse putet, quī meminerit sē esse Prīscī Tarquiniī fīlium, quī habēre quam spērāre rēgnum mālit.'*

II. Rēs Grammaticae Fūsius Explicātae

Omission of *esse*

The auxiliary verb *esse* is often omitted in the future infinitive and in the perfect infinitive passive, e.g.:

> *sē…habitūrum* (ll.20–21) = *sē…habitūrum esse*
>
> *in novō populō…futūrum locum* (ll.112–114) = *futūrum esse*
>
> *Tatium…rēgem factum, et Numam…in rēgnum accītum* (148–151) = *factum esse…accītum esse*

In the 3rd person of the perfect passive, *est*, *sunt* are apt to be left out by Livy, e.g.:

> *Aventīnum novae multitūdinī datum* (ll.71–72) = *datum est*
>
> *Quibus…in valle Murciā datae sēdēs. Iāniculum quoque urbī adiectum* (ll.78–79) = *datae sunt…adiectum est*
>
> *totidem centuriae factae. Quīnta classis aucta* (l.324) = *factae sunt…aucta est*

Partitive Genitive with Neuter Pronoun

The partitive genitive may depend on certain neuter pronouns but only in the nominative or accusative, such as *multum* and *paulum* (Cap. XVI), *aliquid, nihil, quid* (Cap. XXIX), e.g.:

> *Mettiō nōn plūs animī erat quam fideī* (XLIII.202)
> *quid reī esset* (ll.266–267)
> *quid hoc…reī est?* (l.424)
> *quidquid agrī* (l.198)

Dative by Attraction

When a dative of possession (Cap. XII) is used with a name (i.e., *nōmen eī est*), the name itself is usually dative, not predicate nominative, because the name has been "attracted to" (or drawn into) the dative of possession. We see two examples in this chapter:

*puerō egentī post avī mortem nātō ab inopiā 'Egeriō' nōmen
datum est* (ll.103–104):[2]

> = *Egerius nōmen datum est*; the dative *'Egeriō'* agrees with
> the dative *puerō*

cui Serviō Tulliō fuit nōmen (l.226)

> = *cui Servius Tullius fuit nōmen*; the dative *Serviō Tulliō*
> agrees with the dative of possession *cui*

Locative/Ablative of Plural Place Names

The name of the Etruscan town *Tarquiniī* is plural. Therefore the ablative
Tarquiniīs can mean both "from Tarquinii" (l.93, ablative of separation) and "at
Tarquinii" (l.95, locative)—context will make it clear. Sometimes for clarity
Livy puts *ab* before a town name, e.g.:

> *cōnsilium migrandī ab Tarquiniīs* (l.111)
> *Nōn…ab Corinthō nec ab Tarquiniīs* (l.391)

III. Dēmonstrātiō Verbōrum

Quam prīmum

As you learned in *Familia Rōmāna* (Cap. XXVII), *quam* + superlative (with or
without *posse*) denotes the highest possible degree. As *prīmum* is the superla-
tive of *prius*, the phrase *quam prīmum* means "as soon as possible":

> *Tarquinius postulābat ut <u>quam</u> <u>prīmum</u> comitia rēgī creandō
> fierent.* (ll.143–144)

Ferre

To describe the "handing down" (or "tradition"), we are accustomed to seeing
dīcitur (Cap. XIII) and *nārrātur* (Cap. XXXVI), in addition to *dīcunt* and
nārrant (Cap. XLI); the verbs *trāditur* ("is handed down," "is reported") and
fertur (= *nārrātur*) are used in the same way:

> *accēpisse id augurium laeta <u>dīcitur</u> Tanaquīl* (l.122)
>
> *ōrātiōnem <u>dīcitur</u> habuisse* (l.146)

---

2.   Egerius was the name given to Lucumo's nephew because he was *egēns* ("indigent").

Foedum inhūmānumque inde <u>trāditur</u> scelus: Tullia per patris corpus carpentum ēgisse <u>fertur</u> (ll.445–447)

caput ārsisse <u>ferunt</u> (ll.226–227)

fāma <u>ferēbat</u> (l.351)

IV. Recēnsiō

Ablative Absolute

The ablative absolute is widely used with the perfect participle (forty examples in this chapter), but it also occurs frequently with the present participle, e.g., when stating during whose reign something happened (Cap. XVI):

Tullō rēgnante (l.13): "while Tullus was reigning"

Ancō rēgnante (l.92)

Spernentibus Etrūscīs (l.108): "when the Etruscans were saying in scorn that…"

ventōque iuvante (l.184): "with the wind helping"

necessitāte iam et ipsā cōgente ultima audēre (l.432): "now that even necessity itself was compelling him to do the most daring things"

Impersonal Passive (Cap. XL): Examples

bellum fierī erat cōnsēnsum (l.50)

aliquamdiū ibi variā victōriā pugnātum est (l.73)

Ad Iāniculum forte ventum erat (l.118)

Prīmō dubiā victōriā, magnā utrimque caede pugnātum est (ll.174–175)

Additae huic classī duae fabrum centuriae, quae sine armīs stipendia facerent (ll.317–318)

ad fīnēs eōrum vēnit unde rēs repetuntur (ll.25–26)

XLV: QVADRAGESIMVM QVINTVM: ROMA LIBERATA (Livy)[1]

II. Rēs Grammaticae Fūsius Explicātae

Gerund/Gerundive

In this chapter there are some examples of the gerund in the genitive or ablative with an object in the accusative:

> *mōrem…senātum cōnsulendī* (l.16): "the custom of consulting the Senate"
>
> *interrogandō exspectandōque respōnsum nūntius fessus* (l.144): "the messenger, tired of asking and waiting for an answer"
>
> *āvertendō noxam* (l.266): "by turning away the guilt"
>
> *auctorque arma capiendī* (l.293): "and who prompted them to take up arms"

In most cases, however, the construction is altered so that the noun is in the genitive or ablative and the verb form, now a gerundive, agrees with the noun as an adjective, e.g.:

> *vēndendā praedā* (ll.94–95) = *vēndendō praedam*
>
> *libīdō Lucrētiae stuprandae* (l.226) = *libīdō Lucrētiam stuprandī*

---

1. For an explanation of the line number references convention, see p. xxvi.

In this chapter we also find the gerundive construction in the dative with the adjective *intentus*:

> *fundāmentīs templī iaciendīs aliīsque urbānīs operibus intentum* (l.100)
>
> *intentus perficiendō templō* (l.160)

Only the gerundive, never the gerund with an object, is found with a preposition (*ad*, *de*, *in*):

> *dē renovandō foedere* (ll.78–79)
>
> *ad forōs in circō faciendōs cloācamque Māximam agendam*[2] (ll.166–167)
>
> *in fossās cloācāsque exhauriendās dēmersae* (ll.311–312): "submerged in the digging of ditches and sewers"

The gerund is, of course, found without objects as well:

> *cupīdō scīscitandī* (l.185): gerund without an object

Supine

As you learned in Cap. XXIII, the accusative supine occurs with verbs of motion like *īre*, *venīre*, and *mittere*:

> *praedātum īret* (l.128)
> *mittit scīscitātum* (ll.138–139)
> *exsulātum…iērunt* (ll.334–335)

In the above examples the verb itself expresses the motion, but motion can also be implied, as in the accusative supine of *nūbēre* in this example:

> *fīliam nūptum dat* (l.24)

Giving one's daughter away to be married includes the sense of her leaving her father's house for her husband's, that is, motion.

---

2. That is, Latin will always have *ad cloacam maximam agendam* (gerundive) and **not** *ad cloacam maximam agendum* (gerund).

Futūrum esse ut/fore ut

In *Familia Romāna* (Cap. XXXII) you learned the future passive infinitive, which is formed from the supine and *īrī* (the present passive infinitive of *īre*):

> *Ego eum nec mūtātum esse nec posthāc mūtātum īrī crēdō*
> (ll.118–119)

Latin writers, however, tend to avoid the future passive infinitive, instead using *futūrum* (*esse*) *ut* or its equivalent, *fore ut*, plus the subjunctive. For example:

> '*brevī futūrum ut ā portīs Gabīnīs sub Rōmāna moenia bellum trānsferātur*' (ll.118–120)

That is, writers often prefer *futūrum ut…bellum trānsferātur* instead of the future passive *bellum translātum īrī*. The same line could have been written with *fore ut*:

> '*fore ut bellum transferātur*'

III. Dēmonstrātiō Verbōrum

Opus est + ablative

The impersonal phrase *opus est* means "there is need of "; the thing needed is in the ablative:

> '*opus esse colloquiō*' (Caps. XLIII, XLVI–XLVII)
>
> *ita factō mātūrātōque opus esse* (l.251): the ablative perfect participles of *fierī* and *mātūrāre* are equivalent to neuter abstract nouns.

Difficulter

The irregular adverb *difficulter* is formed from *difficilis*:

> *Haud difficulter persuāsit Latīnīs…* (ll.79–80)

IV. Recēnsiō

Historical Infinitive (Cap. XLIV): Examples

Notice these further examples of the historical infinitive with subject nominative (see Cap. XLIV):

> *Ibi, cum 'dē aliīs rēbus assentīre sē veteribus Gabīnīs' dīceret, identidem bellī <u>auctor</u> esse et in eō sibi praecipuam prūdentiam <u>assūmere</u>…* (ll.122–124)

> *tum <u>ūniversī</u> Gabīnī Sextum Tarquinium dīvīnitus sibi missum ducem <u>crēdere</u>* (l.133)

> *Apud mīlitēs vērō, cum pariter perīcula obīret ac labōrēs tolerāret praedamque benignē largīrētur, tantā cāritāte <u>esse</u> ut nōn pater Tarquinius potentior Rōmae quam fīlius Gabiīs esset.* (ll.134–137)

> *Suam <u>quisque</u> <u>laudāre</u> mīrīs modīs* (l.211)

> *Cum pavida ex somnō mulier nūllam opem, prope mortem imminentem vidēret, tum <u>Tarquinius</u> <u>fatērī</u> amōrem, <u>ōrāre</u>, <u>miscēre</u> precibus minās, <u>versāre</u> in omnēs partēs muliebrem animam.* (ll.239–242)

Ablative Absolute: Examples

There are several examples of the ablative absolute (Cap. XVI) with the present participle:

> *illō adiuvante* (l.118)

> *sequente nūntiō* (ll.141–142)

> *pōtantibus hīs* (ll.208–209)

> *sōle parante* (l.347)

> *exsecrantibus quācumque incēdēbat invocantibusque parentum Furiās virīs mulieribusque* (ll.325–326): "men and women cursing her wherever she walked and invoking the Furies who avenge parents"

We also find the ablative absolute with

adjectives:

- *īnsciā multitūdine* (l.130)
- *rē imperfectā* (l.144)
- *īnsciō Collātīnō* (l.230)
- *illīs lūctū occupātīs* (l.275)

nouns:

- *auctōribus patribus* (l.8)
- *duce Brūtō* (l.298)

Adjectives with Genitive: Examples

As you learned in Cap. XXV, when a noun or an adjective has a verbal force, the genitive that follows it is called the "objective genitive" (the genitive used as an object). This chapter has several examples:

ignārus respōnsī expersque imperiī (l.190)

īnscia rērum (l.350)

perītus (*perītus ūtilitātis dignitātisque cīvīlis*, LV.448–449)

XLVI: QVADRAGESIMVM SEXTVM: POST REGES EXACTOS (Eutropius)[1]

I. Rēs Grammaticae Novae

Genitive of the Charge

The genitive is used with judicial expressions: accusations, condemnations, and acquitals:

> *Ob quam rem ā dictātōre <u>capitis</u> damnātus* (ll.190–191): "he was condemned with the loss of his head."

II. Rēs Grammaticae Fūsius Explicātae

Indicative in Contrafactual Conditions

Indicative in the apodosis: In Cap. XXIV, you learned that the past tense of *posse* could express what might have happened (but didn't):

> *Miror tē crūs nōn frēgisse. Facile os frangere potuistī.*
> (XXIV.32–33)

Facile os frangere potuistī is a contrafactual statement, even though *posse* is in the indicative: "you could easily have broken a bone (but didn't)." *Oportēre* and *dēbēre* (Cap. XLIII) function the same way. The past tense of the following verbs

> *oportēre*
> *dēbēre*

---

1. For an explanation of the line number references convention, see p. xxvi.

> *posse*
> *necesse esse*
> *opus esse*

implies what was necessary, possible, or due in the past, suggesting lack of fulfillment. Thus, when such verbs are part of a contrafactual condition, they are in the indicative instead of the subjunctive:

> [*Pyrrhus dīxit*] *'sē tōtīus orbis dominum esse <u>potuisse</u>, sī tālēs sibi mīlitēs contigissent.*' (ll.233–234)

In this contrafactual condition in indirect discourse, *potuisse* stands for an original indicative, completely normal for a verb of possibility. This is the usual construction with such verbs, as well as with future participles and gerundives with a past tense of *esse*:

> *Quod sī Rōmae Cn. Pompēius prīvātus esset hōc tempore, tamen ad tantum bellum is erat dēligendus atque mittendus*: "Even if Cn. Pompey were at this time in Rome as a private citizen, he would have to be chosen and sent to such a great war" (XLIV.528–530).

Indicative in the apodosis: If the protasis is negative, the apodosis of a contrafactual condition is in the indicative when the action of the verb is interrupted (imperfect indicative) or when the apodosis seems a forgone conclusion.

In the example below from the reading, the protasis itself is in the indicative:

> *Et <u>subācta</u> Āfrica tunc <u>fuisset</u>, nisi quod tanta famēs <u>erat</u> ut diūtius exercitus exspectāre nōn posset.* (ll.361–362)

Fuisset marks the apodosis of a past contrafactual condition; but *nisi quod* ("except for the fact that") cuts off the possibility of the Romans conquering. *Nisi quod* is followed by the indicative (unless in *ōrātiō oblīqua*): They would have conquered except for the fact that there was a famine.

V. Points of Style

Indirect Commands: Resolutions of the Senate

Resolutions of the Senate are indirect commands expressed by the phrase (*patribus*) *placet* followed by:

> *ut/nē* + subjunctive
>
> > *Et <u>placuit</u> <u>nē</u> imperium longius quam annuum habēret, <u>nē</u> per diūturnitātem potestātis īnsolentiōrēs redderentur, sed cīvīlēs semper essent, quī sē post annum scīrent futūrōs esse prīvātōs* (ll.4–7)
> >
> > <u>*placuerat*</u> *enim '<u>nē</u> quisquam in urbe manēret quī Tarquinius vocārētur.'* (ll.11–13)
>
> or by accusative + infinitive
>
> > *nūllōs placuit fierī* (l.140)
> >
> > *Omnibus igitur patribus placēbat aliquod caput cīvitātis esse* (XLII.260–261)

The Language of Eutropius

The language of Eutropius, writing in the fourth century AD, differs slightly from that of Livy, who lived from the middle of the first century BC to the beginning of the first century AD. The features of his Latin that depart from earlier Latin are noted below.

Tamquam/quasī

In late Latin *tamquam* and *quasī* can introduce clauses of reported reason:

> *tamquam ā senātū atque cōnsulibus premerētur* (ll.49–50)
>
> *quasi praedam male dīvīsisset* (ll.108–109)

Perfect/Pluperfect Passive

The perfect passive is formed with the auxiliary verb *esse* in the present: *laudātus* (*-a*, *-um*) *est/sit*. The pluperfect passive has the auxiliary verb *esse* in the imperfect: *laudātus* (*-a*, *-um*) *erat/esset*. One finds, however, the auxiliary verb in the perfect or pluperfect: *laudātus fuit/fuerit* (perfect passive) *fuerat/*

fuisset. Although using the perfect or pluperfect instead of the present or imperfect is found in all periods of Latin, it is more frequent in later Latin. In Eutropius you find several examples:

>Perfect passive:
>>*Īnfrāctus fuit* instead of *īnfrāctus est* (l.369)

>Pluperfect passive:
>>*fuerat expulsus* (l.17)
>>*datum fuerat* (l.120)
>>*datus fuisset* (l.204)
>>also: ll.197, 350, 362, 394, 437

Other features of later Latin that you'll encounter in Eutropius:

>*diēs* is always feminine (Cap. XIII)
>>*eā diē* (l.282)
>>*ex illā diē* (l.388)

>*ipse* often stands for *is* or *ille*
>>*contrā ipsōs* (l.104)
>>*…quae sub ipsīs agēbant…ipsum Praeneste agressus* (l.136)
>>*triumphusque ipsī dēcrētus* (l.138)
>>*cum ipsīs* (l.197)
>>*plūrima ipsōrum oppida cēpit* (l.205)
>>*contrā ipsum* (l.411)

Some of his numerals are worth noticing:

>*decem et octō* for *duodēvīgintī* (ll.343, 344)
>*octāvō decimō* for *duodēvīcēsimō* (ll.56, 99)
>*quadrāgintā novem* for *ūndēquīnquāgintā* (ll.208–209)

Gerundive for Future Passive Infinitive

In Cap. XLV you learned that *fore ut/fūtūrum esse* is often used instead of the rare future passive infinitive (Cap. XXI). The gerundive can also be used instead of the future infinitive passive.

Thus, the following three constructions (future passive infinitive, *fore ut/futūrum esse ut*, gerundive) are different ways of saying "They undertook the war promising the senate and the people that the whole contest would be fulfilled by them":

> future passive infinitive:
>
>> *bellum…suscēpērunt promittentēs senātuī et populō 'per sē omne certāmen <u>implētum</u> <u>īrī</u>'*

> gerundive instead of future passive infinitive:
>
>> *bellum…suscēpērunt promittentēs senātuī et populō 'per sē omne certāmen implendum* (*esse*)' (l.70)

> *fore ut/futūrum esse ut* instead of future passive infinitive:
>
>> *bellum…suscēpērunt promittentēs senātuī et populō <u>fore</u> <u>ut</u> 'per sē omne certāmen implērētur'*
>
>> *bellum…suscēpērunt promittentēs senātuī et populō <u>futūrum</u> <u>esse</u> <u>ut</u> 'per sē omne certāmen implērētur'*

XLVII: QVADRAGESIMVM SEPTIMVM: GRAECI ET ROMANI (Aulus Gellius)[1]

III. Dēmonstrātiō Verbōrum

Impersonal *cōnstat*

The impersonal verb *cōnstat* (Cap. XLI) is here in the perfect: *cōnstitit*, "it is established/an established fact":

> *inter omnēs ferē scrīptōrēs cōnstitit* (l.18)
>
> *per eās tempestātēs decemvirōs lēgibus scrībundīs creātōs cōnstitit* (ll.60–62)
>
> *Sed eam mulierem tunc ā Tarquiniō dīgressam posteā nusquam locī vīsam cōnstitit* (ll.188–190)

Idioms

Note the following idiomatic expressions:

> The verb *est* can be used with an infinitive to mean "it is possible."
>
>> *Nusquam…scrīptum invenīre est…aut 'mehercle' fēminam dīcere aut…* (ll.202–204): "it is not possible anywhere to find written either a woman saying 'by Hercules' or…"

> The verb *obīre* ("go to meet") combined with the objects *diem* or *mortem* means "to die."
>
>> *quī…mortem obiit* (ll.43–45)
>>
>> *obiit mortis diem* (ll.113–115)

---

1. For an explanation of the line number references convention, see p. xxvi.

Libra/pondus

Libra means

    1. scales, balance (see Cap. XIII, top)

    2. a unit of weight: a Roman pound (327 g)

pondus -eris (neuter) means "weight" and is the word from which we get the English "pound." Although it is a 3rd declension noun, *pondus* has a 2nd declension ablative *pondō* ("in/by weight"), which may be added to *libra,* e.g.:

    decem pondō librae (l.132): "ten pounds by weight"

pondō is often used with the ellipsis of *librae:*

    pondō CXXIII mīlia (Cap. XLVIII.863)

Comparative: "Too"

Gellius begins by saying that he will limit himself to the time before the Second Punic War. So when he comes to mention writers who flourished after this war, he says *prōgressī longius sumus.* Here the comparative *longius* means "too far" (= *nimis longē*).

V. Points of Style

Gerund/Gerundive: Archaic Spelling

The oldest Latin text mentioned by Aulus Gellius is *Leges XII tabulārum*, "The Laws of the Twelve Tables," which were written in 451–449 BC by a board of ten, *Decemvirī lēgibus scribundīs creātī* (l.61; cf. XLVI.88): "a board of ten created for the purpose of writing laws." *Lēgibus scrībundīs* (= *ad lēgēs scrībendās)* is dative of purpose; it is written with the archaic spelling of the gerund/gerundive *scrībundīs* instead of the more common *scrībendīs* (with *-und-* instead of *-end-* in the 3rd and 4th conjugations). This older form can be seen in:

    gerere: gerundum
    eundum from *īre*

The same ending is retained in the old Latin phrase about the purpose of marrying: *līberum* (= *-ōrum) quaerundōrum causā*, "for the sake of acquiring children" (ll.154–155).

Ablative: Examples

Two ablatives related to time occur frequently in this text:

ablātīvus temporis: ablative of time when or within which
note the use of *tempestāte* in addition to *tempore*:

> ▷ *quibus temporibus* (l.8)
>
> ▷ *iīsdem ferē temporibus* (l.19)
>
> ▷ *quā tempestāte* (l.67)
>
> ▷ *iīsdemque fermē tempestātibus* (ll.116–117)

ablātīvus mensūrae an differentiae ablative of (degree of) difference with *ante* and *post* stating "how long before or after," e.g.:

ante/post as prepositions:

> ▷ *annīs post bellum Trōiānum plūs CLX* (ll.22–26)
>
> ▷ *ante Rōmam autem conditam annīs circiter CLX* (ll.22–26)

post as an adverb (= *posteā*):

> ▷ *post…paucīs annīs* (l.52)
>
> ▷ *paucīsque annīs post* (ll.81, 107)
>
> ▷ *aliquot…annīs post* (l.98)
>
> ▷ *post aliquantō* (l.116)
>
> ▷ *post nōn longō tempore* (l.84)
>
> ▷ *brevī post tempore* (l.100)
>
> ▷ *post aliquantō tempore* (l.109)

posteā with:

> ▷ *neque multō posteā* (l.87)
>
> ▷ *neque magnō intervāllō posteā* (l.160)
>
> ▷ *annīs deinde posteā paulō plūribus quam vīgintī* (l.139)[2]

With comparative alone:

> ▷ *aliquantō antīquiōrem* (l.20)

---

2. *paulo* + comparative is another ablative of difference.

Euphemisms

Like other languages Latin has many indirect terms and euphemisms for the idea of dying. Instead of *morī*, we have seen phrases like:

> *occidere*
> *lūcem relinquere*
> *ē vītā excēdere*
> *dēcēdere*
> *exspīrāre*
> *obīre mortem* (l.45)
> *obīre mortis diem* (ll.114–115)
> *vītā fungī* (l.116)

Variātiō

Gellius describes the handing down of historical events in various ways:

> *scrīptum relinquere* (ll.23, 94)
> *(memoriae) trādere* (ll.38, 42)
> *memoriae mandāre* (ll.65, 96–97)
> *prōdere: In antīquīs annālibus memoria super librīs Sibyllīnīs*
>   *haec prōdita est.* (l.171)

I. Rēs Grammaticae Novae

Clauses of Hindering

Verbs of preventing, forbidding, refusing, etc., may be followed by a clause with *nē* or *quōminus* explaining what is being blocked:

> *ea modo ūna causa, nē extemplō trānsīrent flūmen dīrigerentque aciem, tenuerit Rōmānōs; tenēre nē* (ll.432–433): "held them back lest they"
>
> *quōminus = ut eō minus*: literally: "by which (*quō*) the less (*minus*)" = "that not, lest"

These clauses can take *quīn* when negative.

II. Rēs Grammaticae Fūsius Explicātae

Potential Subjunctive (Negative, *nōn*)

You met the potential subjunctive in Cap. XLI. Potential subjunctives refer to what the speaker thinks is possible. The present and perfect subjunctive refers to the future (either the immediate future or futher off), while the imperfect considers what was likely or possible in the past. The following are the most common uses.

---

1. For an explanation of the line number references convention, see p. xxvi.

2nd Person Singular: You learned in Cap. XLI that the generalizing potential in Latin is 2nd person singular:[2]

> *haud facile discernerēs utrum imperātōrī an exercituī cārior esse* (l.48): "you could not easily have decided…"
>
> *variōs vultūs dīgredientium ab nūntiīs cernerēs* (l.365): "you would have seen different expressions on the faces of those walking away from the messengers."

1st Person Singular: The potential subjunctive can be used to express oneself in a cautious or mild way:

> *quaerendum cēnseam* (l.242): "I should think"
>
> *Respondeam Himilcōnī…* (l.648): "I might answer…"
>
> *velim seu Himilcō seu Māgō respondeat…* (l.665): "I would like H. or M. to answer…"
>
> *scīre velim* (l.671): "I would like to know"

The imperfect is also used and expresses an unfulfilled desire in the present[3] particularly in verbs of wishing:

> *vellem eum adesse*: "I would like him to be here" (but he's not)
>
> *mallem crustula quam pānem:* "I would prefer cookies rather than bread" (but this is clearly bread)
>
> *nōllem*
>
> *cuperem*

The potential subjunctive, both present and imperfect, is common in questions.

> Cap. XXIX: deliberative questions:
> > *Quid faciam? Quid spērem?* (XXIX.22–23)
> > *Ō dī bonī! Quid faciāmus* (XXIX.198–199)

---

2.   The examples in Rōma Aeterna are all imperfect, but the present is also found.

3.   Because of something that has not proven to be true. Cf. the apodosis of contrafactual conditions (Cap. XLI) and wishes (Cap. XXXIX, Recēnsiō).

Cap. XLI: Rhetorical Questions:

> *Quis enim rem tam veterem prō certō affirmet?*
>   (XLI.53–54)

The potential subjunctive occurs in all persons and numbers to express what is, in the speaker's opinion, credible:

aliquis dīcat: "someone might say"

aliquis dīxerit: "someone might say"[4]

nīl ego contulerim iūcundō sānus amīco (Horace, *Satires* 1.5.44):
   "While I am in my right mind, I would compare nothing to
   a pleasant friend."

Relative Comparative Clauses:

Descriptive (generic) relative clauses (Caps. XXXIX, XLII) can be found after a comparative, introduced by *quam ut* or *quam quī*.

> *Hannibalī nimis laeta rēs est vīsa <u>māiorque</u> <u>quam</u> <u>ut</u> eam statim capere animō <u>posset</u>* (ll.534–535): "greater than he could grasp with his mind," or "too great to grasp"

IV. Recēnsiō

Fear Clauses

Clauses expressing a fear (Cap. XXXII) that something will or will not happen grew out of two paratactic wishes: "I am afraid! May this not happen!" This statement expresses a fear that it *will* happen = I am afraid that this will happen. When the two independent (paratactic) clauses became subordinated (hypotactic), the original syntax was maintained.

> *Vereor*! *Nē hoc fiat*!: "I am afraid! May this not happen!"

> *Vereor nē hoc fiat*: "I am afraid that this might happen."

> *vereor nē haec quoque laetitia vāna ēvādat* (ll.656–657)

> *Antiochum <u>timor</u> <u>incessit</u> <u>nē</u> quās per imminentia iuga callēs invenīret ad trānsitum Rōmānus.* (L.176–177)

---

4.   There is no difference between the present and the perfect subjunctive: both refer to the future.

Conversely, an expression of fear followed by *ut* suggests something desired that might not happen.

> *Timeō! Ut* (*utinam*) *vincāmus*: "I am afraid! May we be victorious (conquer)" expresses a fear that we will not win. So *timeō ut vincāmus* means "I am afraid that we may not be victorious."

V. Points of Style

Technical Vocabulary: *Referre, cēnsēre, sententia, senātūs cōnsultum*

The verb *referre* can mean that an issue is submitted to the Senate for deliberation, and can be used with an accusative or *dē* + the ablative:

> *rem ad senātum referre* (l.101)
> *dē rē referre* (ll.95–96)

During the debate each senator is asked, *"Quid cēnsēs?"* (Caps. XLIV–XLVI), and he gives his opinion, *sententia*, by answering *"Cēnseō"* followed by the accusative + infinitive with the gerundive:

> *"terrā marīque rem gerendam (esse) cēnseō."*

The final decision of the Senate is called *senātūs cōnsultum*.

Note on Style

The readings in this chapter offer an opportunity to compare the style of Livy with that of other, later authors, albeit in a limited way, since the later authors composed abbreviated histories. For the Battle of Lake Trasumenae, we have the *periochae* of the same event; for the Battle of Cannae, there is the *Breviārium* of Eutropius.

Quō + Comparative + Subjunctive: Relative Purpose Clause

You learned in Cap. XXXIX that *quī* can be the equivalent of *ut is* when a relative clause expresses purpose, e.g.:

> *Ad quem cum lēgātī vēnissent Rōmānī, quī dē eius voluntāte explōrārent darentque operam…* (ll.19–21)

The ablative of the relative pronoun (*quō*) can be the equivalent of *ut eō*. When there is a comparative adjective or adverb within a relative clause of purpose, *quō* is the equivalent of *ut eō*; in the following example, *valentior* triggers *quō = ut eō*:

> [Hannibal] *cupīvit impraesentiārum bellum compōnere, quō valentior posteā congraderētur* (l.112): "in order that he could meet him afterward (so much) the stronger"

Syncopated Forms

In verbs the *-v-* of the perfect is often dropped. These contractions are called syncopated forms. Syncopation can happen:

    1. before *-is-*, e.g.:
        –*āvisse* to *-āsse*
        –*īvisse* to *-iisse/īsse*

    2. before *-er-/-ēr-*, e.g.:
        –*āverat* to *-ārat*
        –*āvērunt* to *-ārunt*

The complete rules are given after the chapter in the section Grammatica Latina.

In Cornelius Nepos there are many examples of such contractions (noted below in the reading helps).

III. Dēmonstrātiō Verbōrum

Dōnum/dōnāre/dōnō dare

Mūnerī dare (l.228) is a dative of purpose (Caps. XXXVI, XL). Like *mūnerī*, *dōnō* can be combined with *dare* in the phrase *dōnō dare* ("to give for the purpose of a gift/to give as a gift"), where *dōnō* is dative of purpose.

From the noun *dōnum* comes the verb *dōnāre* ("to give as a gift," "to bestow"), which is construed either:

> like *dare* with dative and accusative, e.g.,
>> *Mēdus Lȳdiae anulum dōnat.*

> Or with ablative of the thing given and accusative of the recipient, e.g.,
>> *Mēdus Lȳdiam ānulō dōnat* (cf. English "presents her with…")

In this chapter we see the latter construction used in a relative clause of purpose:

> *Lēgātī Kathāginiēnsēs Rōmam vēnērunt, quī…corōnā aureā eōs dōnārent.* (l.129)

Operam dare

Operam dare means "to give attention to something" (+ dative), "to take care to/endeavor to" (+ the subjunctive with *ut, nē*):

> *darentque operam cōnsiliīs clandestīnīs ut*: "they took care by secret counsels to…"

Verba Dare: *verba* here means "just words," so "to give just words, only words" means "to trick, to deceive":

> *Hic, clausus locōrum angustiīs, noctū sine ūllō dētrīmentō exercitūs sē expedīvit, Fabiōque, callidissimō imperātōrī, dēdit verba.* (ll.88–90)

Ūsū venīre means, as in the margins, roughly the same as *ēvenīre*: "to occur in the course of events":

>   *scīlicet verēns nē ūsū venīret quod accidit.* (ll.229–230)

Genitive of Possession: Characteristic

The genitive of possession (Cap. II) can be used as a predicate to suggest a characteristic of somone or something:

> *convīvium īnstruere et lūdōs parāre eiusdem esse* (ll.599–601):
> characteristic of/part of the same person

III. Dēmonstrātiō Verbōrum

Dē vocābulīs faciendīs

When studying Latin vocabulary it is easy to see that a great many words are derived from others. From now on each chapter is followed by a Grammatica Latina section on derivation or word formation (*dē vocābulīs faciendīs*). In Cap. LI this section shows the formation of new verbs by means of prefIxes (in Latin *praeverbia*). Most of these prefixes are prepositions, e.g.:

> *ab-*
> *ad-*
> *de-*
> *con-* = *cum*
> *dis-* denotes separation or dispersal
> *re-* denotes movement back or repetition

Some prefIxes are often changed by assimilation before certain consonants, e.g.:

> *ad-* to *af-* before *f*
> *in-* and *con-* to *im-* and *com-* before *m* and *p*

The addition of a prefix causes a change in the verbal stem:

> *a* to *i* or *e*
> *e* to *i*

---

1.   For an explanation of the line number references convention, see p. xxvi.

For example:

> from *rapere*: *abripere, abreptum*
> from *tenēre*: *retinēre, retentum*

The rules governing the changes are found in lines 339–383; you will need to know them when doing Pensvm A.

V. Points of Style

The language of the inscription at the beginning of the chapter differs considerably from classical Latin; the differences are explained in the margin. Note, e.g.:

> archaic ablative ending *od* which later became *ō*
>> CNAIVOD (*Cnaiuod* = *Gnaeō*)

> diphthongs instead of single vowels:
>> *ei* for *ī*
>>> VIRTVTEI (*virtutei* = *virtutī*)
>>> QVEI (*quei* = *quī*)
>> *ou* for *ū*
>>> LOVCANA (*loucana* = *lūcāna*)
>>> ABDOVCIT (*abdoucit* = *abdūcit*)
>> *ai* for *ae*
>>> AIDILIS (*aidilis* = *aedīlis*)
>>> CNAIVOD (*Cnaiuod* = *Gnaeō*)

LII: ALTERVM ET QVINQVAGESIMVM: IVGVRTHA (Sallust)[1]

III. Dēmonstrātiō Verbōrum

Potīrī

The deponent verb *potīrī* ("become/be master of") usually takes the ablative (Cap. XXXVIII) but it can take the genitive, as it often does in Sallust:

> *fore uti sōlus imperiī Numidiae potīrētur* (l.65)
> *postquam omnis Numidiae potiēbātur* (ll.172–173)

Impersonal *rěferre*

The impersonal verb *rē-ferre rē-tulisse* (as opposed to *rěferre*, Cap. XLVIII) is a compound of *rē* (ablative of *rēs*) and *ferre*: *rē-fert* means "it matters," "it is of importance"; the person to whom it is of importance is expressed by a genitive or by *meā, tuā, suā…* (ablative feminine of passive pronoun agreeing with the *rē* of the verb), e.g.:

> *quid meā rēfert? = quid meā rē fert?*

> *Faciundum eī aliquid quod* <u>illōrum</u> *magis quam* <u>suā</u> <u>rētulisse</u>
>   *vidērētur* (ll.684–685): "he had to do something that would
>   seem to be of more importance to them than to him."

---

Dē vocābulīs faciendīs

The Grammatica Latina sections in this and the following chapters deal with suffixes, i.e., endings used to derive new words:

> verbs from nouns (Cap. LII)
> adjectives from nouns (Cap. LIII)
> nouns from verbs (Cap. LIV)
> nouns from adjectives (Cap. LV)
> inchoative verbs (Cap. LVI)

IV. Recēnsiō

Quam + Superlative: Examples

In this chapter you find several examples of *quam* before a superlative (with or without *potest*) denoting the highest possible degree (Cap. XXVII):

> *quam māximās potest cōpiās armat* (ll.164–165)
> *quam ōcissimē ad prōvinciam accēdat* (l.336)
> *quam occultissimē potest* (l.560)
> *quam māximum silentium habērī iubet* (l.618)
> *quam prīmum* (l.592)

V. Points of Style

Features of Sallust's Latin

Archaisms

There are many archaisms in Sallust's work, e.g.:

> *uti* for *ut* (ll.26, 65 etc.)
> *quīs* for *quibus* (dative/ablative plural, ll.177, 332, 647)
> *foret* for *esset* (ll.285, 597)
> *duum* for *duōrum* (ll.560, 662)
> *huiusce* for *huius* (ll.5, 91, 477, 519)
> *-que…-que* for *et…et* (ll.97, 293, 500, 512, 679)

Other Features of Sallust's Latin:

Sallust's Latin shows a preference for the:

> perfect 3rd person plural original ending *-ēre* to *-ērunt*
> gerund/gerundive *-und* to *-end-*, e.g.:
>> *mittundum, subveniundum* (ll.326, 327)

> ablative rather than genitive of description
>> *decōrā faciē* (l.24)
>>
>> *impigrō atque ācrī ingeniō* (l.53)
>>
>> *placidō ingeniō* (l.253)
>>
>> *animō ingentī* (l.583)

> genitive of description is also found:
>> *gentis paticiae nōbilis* (l.581)

The ablative of separation is used freely without the prepositions *ex, ab, dē*:

> *expellere*: *rēgnō fortūnīsque omnibus*; *Āfricā* (ll.192, 596)
> *ēicere*: *fīnibus* (l.192)
> *ēgredī*: *Cūriā, castrīs, oppidō* (ll.218, 557, 563)
> *prohibēre*: *moenibus* (ll.283–284)
> *dēcēdere*: *Āfricā, Italiā* (ll.246, 313, 366, 432)
> *dēterrēre*: *proeliō* (l.614)

The dative of purpose or final dative, *datīvus fīnālis* (Cap. XXXVI):

> *dōnō dēdit* (l.15)
> *praesidiō missum* (l.653)
> *glōriae fore* (l.33)
> *terrōrī esset* (l.59)
> *gaudiō esse* (l.78)
> *lūdibriō habitus* (l.408)

LIII: QVINQVAGESIMVM TERTIVM: MARIVS ET SVLLA (Evtropivs/Cicero)[1]

II. Rēs Grammaticae Fūsius Explicātae

Locative Ablative

We have seen the ablative (locative) without *in* denoting "place where" in:

> *terrā marīque*
> *eō locō*
> *multīs locīs*

The preposition is often missing in combinations with

> *tōtus:*
> > *tōtō marī* (Cap. LIV.332)[2]
>
> *cūnctus*
> > *cūnctā Asiā et Graeciā* (Caps. LIV, XXXVI)

III. Dēmonstrātiō Verbōrum

Nouns in -*ennium*

Latin has neuter nouns in -*ennium* to denote a number of years:

> *Biennium*: "two years," "a two-year period" (l.344)
>
> *triennium:* "three years," "a three-year period" (*intrā triennium*, l.181)

---

1. For an explanation of the line number references convention, see p. xxvi.

2. *In* with these adjectives is also found: *tōtā in Asiā* (l.358 and LIV.36).

quadriennium: "four years," "a four-year period" (*quadrienniō*, l.45)

quinquennium: "five years," "a five-year period" (l.393)

Nouns in *-duum*

Similarly the noun:

> *bīduum*: "two days"
> *trīduum*: "three days"
> *quadrīduum*: "four days"

The case of these nouns changed over time. Although these nouns were normally in the accusative when describing "how long" something lasts, later a tendency arose to use the ablative instead of the accusative to express time "how long." See Cicero's usage with the accusative:

> *cum essem <u>biennium</u> versātus in causīs…* (l.344)

> *Cum igitur essem in plurīmīs causīs et in prīncipibus patrōnīs quīnquennium ferē versātus…* (l.393)

Eutropius uses both accusative and ablative for temporal duration:

> *Nam post aliquantum nūllōs placuit fierī, et <u>quadriennium</u> in urbe ita flūxit ut potestātēs ibi māiōrēs nōn essent.* (XLVI.141)

> *Praesūmpsērunt tamen tribūnī mīlitārēs cōnsulārī potestāte iterum dignitātem, et <u>triennium</u> persevērāvērunt.* (XLVI.143)

> <u>*Quadrienniō*</u> *cum grāvī tamen calamitāte hoc bellum tractum est* (l.45): "for four years"

> *…Archelāus ipse <u>trīduō</u> nūdus in palūdibus latuit* (l.95): "for three days"

Numerical Adverbs

The form of the adverb from ordinals also changed over time. Classical Latin prefers the accusative ending -*um:*

> *Deinde idem templum <u>iterum</u> et <u>tertium</u> sacrātum est.*
> (XXXVI.40–41)
>> *iterum*: for the second time
>> *tertium*: for the third time
>> *quārtum*: for the fourth time
>> *quīntum*: for the fifth time

The ablative is also used to form adverbs in *ō* from ordinals, a feature found especially in later Latin:

> *secundō*: for the second time (l.10)
> *tertiō*: for the third time (l.12)
> *quārtō*: for the fourth time
> *quīntō*: for the fifth time (l.18)

I. Rēs Grammaticae Novae

Heteroclitic Nouns

While you have met heteroclitic nouns before, the term is first used here. A noun is called heteroclitic if its declension varies. You met the heteroclitic *domus*, whose declension varies between the 2nd and the 4th, in Cap. XIX:

nom.	*domus*	*domūs*
acc.	*domum*	*dom*<u>*ōs*</u>
gen.	*domūs*	*dom*<u>*ōrum*</u> (or *dom*<u>*uum*</u>)
dat.	*domuī*	*domibus*
abl.	*dom*<u>*ō*</u>	*domibus*

Some nouns have declensions in both the 1st and 5th. *Māteria* (Caps. XVIII, XLIII) belongs to the 5th as well as the 1st declension (*māteriēs, -eī* as well as *māteria, -ae*). In this chapter you meet *pecus*, which in the singular means one animal out of a flock or herd and in the plural refers to the herd itself. *Pecus* has both 3rd and 4th declension forms (only attested forms are given):

nom.	*pecus/pecū*	*pecua/pecuda*
gen.	*pecoris*	*pecuum*
dat.	*pecuī*	
acc.		*pecua/pecuda*
abl.	*pecū*	*pecubus*

---

1. For an explanation of the line number references convention, see p. xxvi.

II. Rēs Grammaticae Fūsius Explicātae

Rhetorical Questions

In Cap. XLII, you learned about rhetorical questions, often in the subjunctive but also in the indicative, depending on whether the question is potential (subjunctive) or statement of fact (indicative):

> *Quis igitur hōc homine scientior umquam aut fuit aut esse dēbuit*? (ll.289–290)

There are several rhetorical questions in this speech; they are noted in the *auxilia legendī*.

III. Dēmonstrātiō Verbōrum

Agitur dē, rēs agitur

Agere plays a role in many idiomatic expressions, among which is *rēs agitur* and *agitur dē* plus the ablative: "is at stake, is about":

> *agitur populī Rōmānī glōria* (l.23): "the glory of the Roman people is at stake."
> *agitur salūs sociōrum atque amicōrum* (ll.25–26)
> *aguntur certissima populī Rōmānī vectīgālia* (ll.27–28)
> *aguntur bona multōrum cīvium* (ll.29–30)

Extrēmus

Just like *medius* ("middle of," Cap. XXXIII), *summus* ("top of," Cap. XXXVI), *īnfimus* ("bottom of," Cap. XXXVI), and *prīmus* ("beginning of," Cap. XXXVIII), *extrēmus* can mean "end of."

Cōnsulere + Dative

The verb *cōnsulere* is related to *consilium* and *consul* and, by itself, means "to deliberate, reflect." When *cōnsulere* is used with the accusative, it means "to ask the advice of." With the dative it usually means "take care of, to consult for," as here:

> *bona…quibus est ā vōbīs et ipsōrum causā et reī pūblicae cōnsulendum* (ll.30–31)

LV: QVINQVAGESIMVM QVINTVM: DE RE PVBLICA (Cicero)[1]

II. Rēs Grammaticae Fūsius Explicātae

Velle + Subjunctive

The verb *velle* is often followed by the subjunctive (without *ut/nē*) to express will (as in the first example) or a wish (as in the second):

> *Vīsne igitur hoc prīmum…videāmus…?* (l.31)
>
> *Quam vellem Panaetium nostrum nōbīscum habērēmus!*
>   (ll.35–36 = *utinam…habērēmus!*)

Oportēre, necesse est + Subjunctive

Oportēre (Cap. XVII) and *necesse est* (Cap. X) are impersonal and take an accusative and infinitive construction; they can also be followed by a subjunctive, without *ut*:

> *At tū vērō animum quoque relaxēs oportet* (l.26) = *At tē vērō animum quoque relaxāre oportet.*
>
> *Hīc tū…ostendās oportēbit…* (LVI.46 = *tē ostendere*)
>
> *…vīvendī finem habeat necesse est* (LVI.263–264)
>
> *vel concidat omne caelum omnisque nātūra et cōnsistat necesse est* (LVI.275–276)

---

1.   For an explanation of the line number references convention, see p. xxvi.

Ethical Dative

As you have learned, the dative is often used to show to whom the action in the clause refers; a particular form of the dative of reference, called the "ethical dative," is used only with personal pronouns and signals the particular interest or involvment of the person in the dative:

> *quid enim mihi L. Paulī nepōs…quaerit* (ll.118–120): "Why, I ask you (*mihi*), is the grandson of Lucius Paulus…asking."

The ethical dative is a feature of colloquial speech.

III. Dēmonstrātiō Verbōrum

Semi-deponents

Besides *audēre* (see XXXI.169), a few other verbs are semi-deponent:

> *soleō, solēre, solitum esse* (l.150): "to be accustomed"
>
> *gaudeō, gaudēre, gavīsum esse*: "to rejoice, be glad"
>
> *fīdo, fīdere, fīsum esse* "to trust" (+ dat.)
>
> *cōnfīdo, cōnfīdere, cōnfīsum esse*: "to trust" (+ dat.; LII.345, cōnfīsī)
>
> *diffīdo, diffīdere, diffīsum esse:* "to distrust" (+ dat.)

Placēre, used impersonally, may be semi-deponent:

> *placitum est = placuit* (l.74)
> cf. *placitus,* "pleasing" (XL.24)

LVI: QVINQVAGESIMVM SEXTVM: SOMNIVM SCIPIONIS (Cicero/Horace)[1]

I. Rēs Grammaticae Novae

Epexegetical Genitive

Latin poets sometimes imported Greek syntax, among which is the genitive that explains an adjective (epexegisis = "explanatory"). We find two of these epexegetical infinitives in the first line of Horace's poem:

>*integer vītae* (cf. "integrity")
>*sceleris pūrus* ("pure of crime," "guiltless")

III. Dēmonstrātiō Verbōrum

Quaesō

The verb *quaesō* (1st person singular present indicative) is used in combination with a request or a question: "I ask you," "please (tell me)":

>*Quaesō, pater sānctissimē atque optimē... quid moror in terrīs?*
>(ll.81, 115)

Quaesō can also be used with the subjunctive (= *ōrō ut…*), with or without *ut/nē*:

>*St! quaesō nē mē ē somnō excitētis…* (l.58)

>*…tamen paucīs quaesō sinātis mē cum pūblicā fēlīcitāte*
>   *comparāre eō quō dēbeō animō prīvātam meam fortūnam.*
>   *(l.630)*

---

1.   For an explanation of the line number references convention, see p. xxvi.

Impersonal Verb Interest

The impersonal verb *inter-est,* "it makes a difference," "it is of interest/importance," is construed like *rē-fert* (Cap. LII) with the genitive or with *meā*, *tuā*, *suā*:

> *meā māximē interest tē valēre*
>
> *Quid autem interest ab iīs quī posteā nāscentur sermōnem fore*
>   *dē tē?* (ll.214–215)

In this example we should understand *quid tuā interest*: "Why is it important to you? Why do you care?"

V. Points of Style

Neuter for Adverb

In the last stanza of Horace's poem, the neuter form *dulce* is used as an adverb (= *dulciter*; cf. *facile*).

XXXVI: TRICESIMVM SEXTVM: ROMA AETERNA[1]

I. Ørberg's Introduction

Part II of Lingva Latina Per Se Illvstrata opens with a chapter on the Eternal City, Rōma Aeterna, as it looked in the second century AD. You read about its location on the banks of the Tiber on and around the Seven Hills as well as about the splendid buildings and historic monuments found in the capital of the Roman Empire. The illustrations will give you an idea of what some of these monuments looked like in ancient times. The chapter also gives a sense of the progression of Roman history from the time of the kings (753–510 BC) to the republic (510–31 BC) to the second century AD and concludes with a very useful table coordinating buildings, dates, and historical personages.

Posterity has not been kind to the remains of ancient Rome. Several medieval and Renaissance churches and palaces were built with materials taken from the ruins of ancient temples and public buildings. Nevertheless, some buildings have been preserved because they were transformed into churches. In the forum, for example, the Senate-House, or *Curia*, was rebuilt on the old foundations after a fire in the late third century AD and became a church in the seventh century AD. The original bronze doors adorn the main entrance of St. John Lateran (Rome). The Temple of Faustina, also in the Forum, became a church in the seventh or eighth century AD. The front row of columns of the temple of Saturn is still standing, as are a few columns of the Temple of Vespasian and the Temple of Castor. The temple of Vesta was partly restored in 1930. The other Forum buildings mentioned in this chapter have all but disappeared: all that remains of most of them is their foundations. Despite this, archaeological

explorations and computer-generated reconstructions enable us to envision—and marvel at—the architectural splendors of ancient Rome.

Among the more or less preserved monuments elsewhere in the city that are worthy of mention are: the Flavian Amphitheater, which was later named the Colosseum (completed 80 AD); the Arch of Titus with its reliefs showing Titus's triumph after the capture of Jerusalem in 70 AD; the Pantheon, a round temple with a huge dome (rebuilt during the reign of Emperor Hadrian, 117–38 AD); Trajan's column (completed AD 113), which now bears a statue of Saint Peter; and the tomb of Emperor Hadrian, which was converted into a medieval castle called Castel Sant'Angelo. The best-preserved Roman baths, those of Caracalla and Diocletian, were built in the third century AD, but ruins remain of the *thermae Trāiānī* on the Esquiline Hill above the Colosseum.

Sometimes inscriptions on the monuments give us some information of their origin and function, but it is only by combining the archaeological finds with the frequent references to localities in Rome found in the works of Roman writers that we obtain factual knowledge about the topographical history of Rome. As far as most of the major buildings are concerned, we know both when and by whom they were constructed, and we are familiar with a great many historical events that are connected with the individual monuments.

Be sure to make full use of the maps. In addition to the map of ancient Rome on the inside of the cover of *Rōma Aeterna* and detailed maps of the Forum and its surroundings on pp. 6 and 10. Here you will find all the names of buildings and localities mentioned in the text. The chronological survey on pp. 24–25 provides further support. The acquaintance with ancient Rome that you obtain by studying this chapter will stand you in good stead in later chapters when you come to read about historical events that have taken place in and around the metropolis of the Roman world.

Forum Rōmānum: 58–184

63–65: Livy tells the story of the Lacus Curtius (*ab Urbe Conditā*, 7.6): an enormous chasm mysteriously opened up in the forum; consulting the gods, the seers proclaimed that the spot would have to be consecrated if Rome were to realize its power. The young Marcus Curtius, believing Rome's greatest potential lay in its valor and weapons, armed himself and, astride his horse, leapt into the chasm, making himself a votive offering on behalf of his city.

76: See note on *vēnīre* vs. *vĕnīre* in grammar section above.

88: *verba faciunt*: "make a speech," so too *ōrātiōnēs…habērent* (ll.91–92).

89–91: At the Battle of Antium (modern Anzio on the southwest Italian coastline above Naples) in 338 BC, the Romans took the ships' prows (*rōstra*, named from their visual similarity to a bird's beak) to decorate the speakers' platform.

78: *quō*: adverb of place to which (Cap. XXV); cf. *unde* (l.93): adverb of place from which.

101–103: *Illa aedēs duās iānuās vel portās habet, quae tum dēmum clauduntur cum per tōtum imperium populī Rōmānī terrā marīque pāx facta est*: *cum* here is purely temporal, as shown by the *tum* (Caps. XXIX and XXXVII).

104–105: *bis tantum*: "only twice" (Cap. IV); in fact, Augustus boasted that the gates had been closed three times in his lifetime, for a total of five times.

113: *cūrant nē*: *verba cūrandī* (Cap. XXVII).

117–118: *rēgēs…habitāvisse dīcuntur*: nominative and infinitive with passive verb.

162:            Ennius lived from about 239 to 169 BC. He had a great influ-
                ence on Roman verse; he is sometimes called the Father of
                Latin poetry.

XXXVII: TRICESIMVM SEPTIMVM: TROIA CAPTA (Vergil)[1]

[*Ex Vergiliī Aenēidis librō II, solūtīs versibus*]

I. Ørberg's Introduction

The introductory chapter on the city of Rome is now followed by an account of the history of Rome as told by the Romans themselves. The origins of Rome are lost in conjecture, so here poetic imagination has full scope. From a wish to link the prehistory of Rome with the city that had once fought so bravely against the Greek heroes arose the legend of the Trojan hero *Aeneas*, who after his flight from Troy and seven years' wanderings finally made his way to Latium and there prepared the eventual foundation of Rome.

This theme was treated by the poet Vergil (*Pūblius Vergilius Marō*, 70–19 BC) in his famous poem the *Aeneid* (Latin *Aenēis*). As Vergil tells the story, Aeneas had been chosen by the gods themselves to lay the foundations of the later Roman Empire, as it had been prophesied in divine revelations.

To a certain extent, Vergil had the *Iliad* and the *Odyssey* of Homer as his models. The first six books (*librī*) of the *Aeneid*, in which he tells of Aeneas's wanderings, are related to the *Odyssey*, which deals with the wanderings of Odysseus (Ulysses), and books VII–XII, in which the wars in Latium are described, can be compared with the Trojan War as described in the *Iliad*.

Like its Greek models, the *Aeneid* is written in hexameters, the usual meter for epic poems in Greek and Latin. Although you are not yet able to read Vergil's verses in their original form, Ørberg has composed a prose version based on the wording and style of Vergil, and some important passages (printed in *italics*) have been left unchanged. This prose version of the first part of the *Aeneid*, which takes up the next four chapters, can form the basis for a later study of Vergil. That is, Caps. XXXVII–XL present a prose version of the narrative in *Aeneid* I–IV.

---

1. For an explanation of the line number references convention, see p. xxvi.

Cap. XXXVII corresponds with the second book (*liber secundus*) of the *Aeneid*. It contains a description of the fall of Troy (*Trōia*) and the flight of Aeneas, as told by the hero himself to queen *Dīdō*, who offered him hospitality in Carthage (*Karthāgō* or *Carthāgō*). The chapter begins with a brief mention of the legendary kings of Latium from *Sāturnus* (whose reign was called the "golden age": *'aetās aurea' quae vocātur*) to *Latīnus*. Then we are told how the Greeks succeeded in entering Troy hidden in a huge wooden horse and about the heroic fight of the Trojans against the invaders. When king Priam (*Priamus*) is killed and the battle lost, Aeneas flees from the burning city with his old father *Anchīsēs*, his son *Ascanius*, and his wife *Creūsa*. Creusa gets lost during the flight; the others, however, reach a safe spot outside the city together with many other fugitives.

A note on the reading

On p. 31, you will find two sets of numbers: the line numbers of the frame narrative in Rōma Aeterna and the verse numbers for the six original verses of the *Aeneid*. The numbers in italics indicate verse numbers in the *Aeneid*, Book II. Rōma Aeterna follows this procedure throughout: italicized numbers refer to the line in the *Aeneid*, while plain numbers refer to the line of the chapter's narrative.

XXXVIII: DVODEQVADRAGESIMVM: PIVS AENEAS (Vergil)[1]

[*Ex Vergiliī Aenēidis librō III, solūtīs versibus*]

I. Ørberg's Introduction

This chapter is a prose version of Book III of the *Aeneid*. Aeneas tells the story of his and his companions' dangerous voyage through the Aegean and Ionian Seas to Sicily. At the foot of Mount Etna (*Aetna*), they have a grim encounter with the Cyclops *Polyphēmus*, whom Odysseus (*Ulixēs*) shortly before had blinded. Aeneas ends his report with his father's death and burial during the Trojans' brief sojourn in Sicily as the guests of king *Acestēs*.

In antiquity, navigation was suspended in winter. Aeneas spends the winter building a fleet of twenty ships (*classem vīgintī nāvium*), and he is not ready to sail (*ventīs vēla dare*) until the early summer (*prīmā aestāte*).

On his long journey, Aeneas brought with him the Penates (*dī Penātēs*) of Troy—the name is used to refer to the tutelary gods not only of a household, but also of a city. In a dream, they tell Aeneas to depart from drought-stricken Crete and sail on to Italy, where a brilliant future awaits him and his descendants in a new city.

193–195:   *Vix haec dīxerat, cum ipsum Polyphēmum pāstōrem caecum inter pecudēs suās ambulantem vīdērunt et lītora nōta petentem*: this sentence illustrates the importance of "keep reading, note endings and word groupings." Except for *Vix haec dīxerat, cum…vīdērunt*, all words refer to Polyphemus, modified by an appositive (*pāstōrem caecum*) and two participles (*ambulantem, petentem*). XXXIX: VNDEQVADRAGESIMVM: KARTHAGO (Vergil)[1]

[*Ex Vergiliī Aenēidis librō I, solūtīs versibus*]

I. Ørberg's Introduction

It was the will of the gods that Aeneas should found a new kingdom in Italy, but not all the gods were favorably disposed. The goddess Juno hated all Trojans. The Trojan prince Paris, acting as judge in the beauty contest among the three goddesses Juno, Venus, and Minerva, had wounded her by giving the prize to Venus. Furthermore, she knew that the descendants of the Trojans were destined to destroy her favorite city, Carthage. Therefore, she did her utmost to prevent Aeneas and his companions from reaching their goal. It became a hard undertaking—a huge effort (*mōlis*) in Vergil's words—for Aeneas to lay the foundation of the Roman people:

> *Tantae mōlis erat Rōmānam condere gentem*![2]

When the Trojans leave Sicily, Juno persuades Aeolus, ruler of the winds, to send a violent storm, which scatters the ships and drives them southward to the coast of Africa. Here Aeneas meets his mother, the goddess Venus, who shows him the way to Carthage. This city had just been founded by queen Dido, who had migrated from Tyre (*Tyrus*) in Phoenicia (*Phoenīcē*) after her brother, the king of Tyre, had murdered her husband. Queen Dido gives the exiled Trojans a heroes' welcome in her new city and, deeply infatuated with their gallant commander, she questions him about the fate of Troy and about his adventures. This concludes the first book of the *Aeneid*, which is retold in this chapter.

---

1. For an explanation of the line number references convention, see p. xxvi.
2. *Tantae mōlis* is *genetīvus quālitātis*, genitive of description (Caps. XIX, XXXVI).

II. Auxilia Legendī

Iūnō: 1–26

3:          *Iūnō…dīlēxisse dīcitur*: nominative and accusative with passive
             verb (Cap. XIII)

6:          *ōlim*: can refer to the present as well as the past: "at some time."

7–11:   Core of sentence: (Juno) *Trōiānōs ā Latiō arcēbat*. This core is
             introduced by a subordinate clause: (Juno) *nōndum oblīta erat
             causam* (*īrae ac dolōris*). Although there are no subordinating
             conjunctions, the two participles modifying the implied sub-
             ject supply the subordination: (*id*) *metuēns* and *memor* (*vet-
             eris bellī*)—i.e., because she was afraid and mindful of the war
             (genitive with verbs of remembering and forgetting, Caps.
             XXV, XXXII). A relative clause (*quod ad Trōiam prō cārīs Argīs
             gesserat*) modifies *veteris bellī*; *causam īrae ac dolōris* (the di-
             rect object) is in apposition to *iūdicium Paridis* (the judgment
             of Paris).

16–18:   *Mēne…posse? Nōnne…scelus?*: These reported questions are
             in the accusative and infinitive construction (like regular indi-
             rect statement) because they are rhetorical; that is, Juno isn't
             really asking a question. Rhetorical questions in indirect dis-
             course use the accusative and infinitive construction; genuine
             questions in indirect discourse go into the subjunctive accord-
             ing to sequence of tense.

19:         *dignus* + ablative (Cap. XIX).

20–22:   Although Latin word order is flexible, it is not random. Note
             how the words that go with the participle are grouped with it:
             Tālia animō incēnsō sēcum <u>cōgitāns</u>. Often in a Latin sentence,
             you have to be patient and keep reading to find the word that
             you might expect to come first in English.

26:         *formā pulcherrimam*: ablative of respect; so too at line 193.

Tempestās: 27–90

28:         *ubi haec audīvit*: "when…" (Cap. XXXVII).

35:         *quibus*: dative with *licuit*.

36–37:   *Utinam…effūdissem*: past contrafactual wish (Cap. XXXIII).

41–43:   *trēs…trēs…ūnam*: all with *nāvēs* understood; *in saxa latentia*:
             "onto hidden rocks."

44:   *in puppim*: pure *i*-stem (Cap. XVI).

56:   *dictō citius*: "faster than you could say it."

60:   *quibus*: ablative of means with *scopulōs* as antecedent; we might say every wave is broken *on* the rocks.

65:   *cibō*: ablative with *egentēs.*

77:   *ignārī…malōrum*: objective genitive (Cap. XXV).

78:   *graviōra*: object of the vocative *passī.*

82:   *mittite*: for *omittite*: "send away," "let go of."

83:   *forsan = fors* (*sit*) *an*: *fors* in this expression ("it might happen that" + subjunctive[3]) is used adverbially; *et = etiam*: "even," "also."

87:   *māximīs cūrīs*: ablative of cause with *aeger*; *vultū*: "with his (facial) expression."

90:   *dubiī utrum…crēdant*: indirect question (Cap. XIX).

Venus genetrīx: 91–156

94:   *quaerere quī hominēs incolerent*: indirect question (Cap. XIX).

96:   *cui*: dative with *obviam iit* ("whom she went to meet"); remember forms of *quī* at the beginning of a sentence = *et is*; therefore, *cui = et eī* (Cap. XXV).

101:   *quam tē appellem?*: deliberative subjunctive: "how should I address you"—Aeneas can see by her appearance that she is no ordinary mortal, perhaps not mortal at all (Cap. XIX).

103:   *forsitan ipsa Diāna sīs*: "perhaps you are Diana herself." For *forsitan*, see note on line 83.

104:   *sīs nōbīs fēlix et doceās…*: hortatory subjunctive (Cap. XXX); the hortatory subjunctive in the 2nd person ("please be… please teach us") is not common but is found in poetry and prohibitions (*nē* + perfect subjunctive).[4]

109–111:   *tālī honōre…dignam*: *dignus, -a, -um* + ablative of respect (Cap. XIX); *nōbīs mōs est…gestāre et…vēnārī*: *mōs est* can be followed by the infinitive, in addition to *ut* + subjunctive (Cap. XLIV; Cap. XXXVII, note to lines 6–7).

---

3. In poetry and in later Latin, *forsitan* and *forsan* can take the indicative.

4. 2nd person hortatory subjunctive is also found with indefinite subjects and in early Latin.

118:          *multa simulāns*: "feigning many things (to be true which aren't)" (*simulāre*: pretend something *is* which *is not*; *dissimulāre*: pretend that something *is not* which *is*).

122:          *suāsit ut…excēderet*: indirect command (Cap. XXVII).

128:          *opēs, -um* (f. pl.): resources, wealth (Cap. XXXIV).

133–135:   *Ō dea, sī ā prīmā orīgine repetēns labōrēs nostrōs nārrem, ante vesperam fīnem nōn faciam!*: ideal ("should-would") condition (Cap. XXXIII, XLI).

137–138:   *sum pius Aenēās*: *pius* means "dutiful," one distinguished by *pietās*, "dutiful conduct"; while it has religious overtones (dutiful conduct to the gods), it is also secular and includes conduct to others and to the state.

144:          *vidēris*: "you seem" + nominative and infinitive; *quī…advēneris*: perfect subjunctive in a relative causal clause ("because").

151:          *quid*: "why."

152:          *dextrās*: sc. *manūs*.

154:          *nē quis…posset*: negative purpose clause (Cap. XXVIII).

Dīdō rēgīna: 157–268

167:          *mīrābile dictū*: *dictū* is ablative (respect) of the supine (Cap. XXII).

171–172:   *rēbus suīs…cōnfīdere*: compound intransitive verb with the dative (Cap. XXXVII).

176:          *nostrī labōris*: genitive with *plēna*.

177:          *En*: interjection "look, there is Priam"; *laudī*: dative of possession; *sunt…sua praemia laudī*: "renown/glory has its own rewards."

186:          *aurō*: ablative of price (Cap. VIII).

189:          *manūs inermēs*: *inermis = sine armīs*.

195–196:   *Quālis…tālis*: a simile: "just like…so too."

199–200:   *quōsdam sociōs*: *quīdam*: certain companions (Cap. XXVIII).

204–205:   *tē ōrāmus nē*: indirect command; *nōn vēnimus ut*: purpose clause.

206:      *victīs*: dative of possession.

209:      *nostrum*: partitive genitive with *paucōs.*

210:      *quō*: ablative of comparison with *iūstior* (Cap. XXIV).

211–213: mixed condition: the protasis (*quem sī dī vīvum servant*) is present subjunctive ideal ("should"), while the double apodosis (*referet, nec paenitēbit)* is future indicative ("more vivid").

219:      *Quis genus Aenĕadum, quis Trōiae nesciat urbem?* ("Who would not know the family of the sons of Aeneas, who would not know the city of Troy?"): rhetorical question (the answer to "who doesn't know" is "no one"), part of the potential subjunctive (Cap. XLI).

221:      *adeō*: modifies *obtūnsa.*

227–228: *utinam…afforet*: see footnote 4 in this chapter and Cap. XLIII.

237:      *Aenēās…deō similis*: *similis* takes either the dative, as here, or the genitive (XLII.327–328).

240–244: Reading help: vocative (*Ō rēgīna*) followed by two relative clauses, "you who" (*quae sola…miserāta es, quae…recipis*) and the main clause (*grātiās…nōn possumus*) and a wish (*dī… ferant*).

252:      *tēctīs nostrīs*: dative with intransitive *succēdite.*

253–254: i.e., *similis fortūna voluit mē quoque iactātam cōnsistere hāc terrā.*

255:      *nōn ignāra malī*: objective genitive (Cap. XXV); *miserīs*: dative with intransitive *succurrere.*

256:      *haec memorāns*: *memorāre* sounds like our "remember," but it always involves speech: i.e., "mention," "remind of," "speak about."

263–264: *praemittit…quī…nūntiet…dūcat*: relative clause of purpose.

Cupīdō: 269–316

270–272: *cōnsilia…ut Cupīdō…veniat atque…incendat*: noun clause giving the content of Venus's plans (*cōnsilia*); *prō*: "in the place of"; *dictō…pāret*: dative with intransitive *pārēre*; the perfect passive participle *dictō* can be thought of as a condensed clause: "what she has said."

280–281:   *puerō tuendō incenditur*: ablative of means of the gerundive (Caps. XXXI, XXXVI).

304:          *conticuēre = conticuērunt* (Cap. XXXVI).

307–308:   *amor…cognōscere…et…audīre*: complementary infinitives (instead of the objective genitive of the gerund or gerundive) is poetical.

311–314:   *ut Graecī Trōiam īnsidiīs cēpissent atque incendissent, ut ipse cum patre et fīliō ex urbe flagrantī fūgisset et fātō pulsus per maria errāvisset*: *ut* = how; both *ut* clauses are indirect questions subordinate to *nārrāvit quae ipse vīderat* and are thus in the subjunctive according to sequence of tense.

XL: QVADRAGESIMVM:
INFELIX DIDO (Vergil)[1]

[*Ex Vergiliī Aenēidis librō IV, solūtīs versibus*]

I. Ørberg's Introduction

The main focus of Book IV of the *Aeneid* is the love story of Dido and Aeneas. After the death of her husband, Dido swore never to contract a new marriage (*coniugium*), but now she tells her sister Anna that she has fallen in love with her noble guest. Anna urges her to forget her dead husband and obey the dictates of love. During a hunting expedition, Dido and Aeneas seek shelter from the storm in a cave, where they are united by the design of Juno. The queen begins a relationship with Aeneas that she calls *coniugium*.

The rumor of this affair spreads rapidly among men and gods. When Jupiter hears that Aeneas is about to forget his divine mission, he sends Mercury to order him to sail: "*Nāviget!*"[2] Aeneas makes secret preparations for departure, but Dido suspects mischief and begs him not to leave her. When he tries to explain that he is destined by the gods to seek a new homeland in Italy, she flies into a rage, and after violent reproaches and threats, she retires without waiting for his reply. Aeneas makes his ships ready for sea, and when neither threats nor entreaties have any effect, Dido sees no alternative but to seek death. She tells her sister to build a pyre in the palace yard on the pretext of wanting to burn everything that reminds her of her faithless husband: his weapons, his clothes, his portrait, and their conjugal bed. By night, while Dido lies sleepless in her palace, Mercury orders Aeneas to put to sea at once, and at dawn the queen sees the Trojan fleet leaving the harbor. She heaps reproaches on herself and invokes the Furies to take revenge on Aeneas and his descendants. Then she mounts the pyre, draws Aeneas' sword, and throws herself on it. Her last words on the pyre, taken from the close of the fourth book (verses 651–660), can be read on p. 80.

1. For an explanation of the line number references convention, see p. xxvi.

2. Jussive subjunctive (Cap. XXXI).

Books V and VI of the *Aeneid* are here treated summarily. From Carthage the Trojans sail to Sicily, and Aeneas celebrates the anniversary of his father's death with sacrifices and games. Meanwhile the Trojan women set fire to the ships, but a rainstorm sent by Jupiter extinguishes the fire. Aeneas punishes the women by leaving most of them in Sicily when he sails on to Italy. In Campania he visits the Sibyl at Cumae. She takes him to the underworld, where he sees his dead father, who shows him the great Romans of the future from Romulus to Augustus. He ends with the famous words about the destiny of the Roman as ruler of the world:

> *Tū regere imperiō populōs, Rōmāne, mementō.*[3]
> *Hae tibi erunt artēs: pācisque impōnere mōrem,*
> *parcere subiectīs et dēbellāre superbōs.*

Livy's history of Rome, *ab Urbe Conditā*, picks up the narrative of Roman history in the next chapter with Aeneas' struggles in Italy, treated by Vergil in Books VII–XII of the *Aeneid*.

XLI: VNVM ET QVADRAGESIMVM: ORIGINES (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librō I.1–7, nōnnūllīs mūtātīs et praetermissīs*]

I. ØRBERG'S INTRODUCTION

This and the following four chapters present the early history of Rome as recorded in the first "book" of the great Roman historian Livy (*Titus Līvius*), who lived in the time of Emperor Augustus (59 BC–AD 17). In 142 "books," Livy treated the history of Rome from the foundation of the city—hence the title of his work *ab Urbe Conditā*—down to his own time. Of this voluminous work, only 35 books have survived. These books cover the earliest period until 293 BC (books I–X), the Second Punic War, 218–201 BC (books XXI–XXX), and the subsequent period until 167 BC (books XXXI–XLV). We know the content of the lost books in broad outline through ancient summaries, called *periochae* (περιοχαί).

Livy's first book deals with the foundation of Rome and the seven Roman kings from *Rōmulus* to *Tarquinius Superbus*, who was expelled from Rome in 509 BC. In Cap. XLI, Livy's prose has been somewhat abridged and simplified, but even here many passages stand unaltered as Livy wrote them 2,000 years ago. In the following chapters, the text gets closer and closer to the original, and from XLV.22, the text is abridged, but otherwise unchanged.

Livy's account has been supplemented with excerpts from Ovid (*Ovidius*), especially from the didactic poem *Fāstī*, in which he goes through the Roman calendar and relates the legends connected with particular dates (e.g., the founding of Rome on April 21st).

What the Romans related about the origin of their city has little to do with reality. Livy is fully aware of this, but his delight in the old legends is unmistakable. In his preface, he says that if any people has the right to trace its origin to the war god Mars (the father of Romulus), it is the Roman people.

---

1. For an explanation of the line number references convention, see p. xxvi.

Livy begins his history with the arrival of Aeneas in Latium. He made peace with king *Latīnus*, who gave him his daughter *Lāvīnia* in marriage. This provoked war with the neighboring king Turnus, who was engaged to marry Lavinia. Turnus allied himself with the Etruscans (*Etrūscī*), but he was defeated by Aeneas. Ascanius, the son of Aeneas, founded the city of Alba Longa and became the first of a line of Alban kings. One of these kings, Numitor, was dethroned by his brother *Amūlius*. When Numitor's daughter Rea Silvia bore twins, Amulius ordered them to be exposed in the Tiber, but the boys, Romulus and Remus, drifted ashore. When they were found, a she-wolf was nursing them. Once grown, they killed Amulius and resolved to found a new city on the Tiber. An omen taken from the observation of the flight of birds (*auspicium*) seemed to favor Romulus, so he founded the city on the Palatine Hill. When Remus ridiculed his brother's work by leaping over the new walls, Romulus killed him. Finally, Livy tells the story of Hercules killing *Cācus* for robbing his cattle. This story explains the origin of the ancient *Āra Māxima* and the worship of the Greek god Hercules (Greek *Hēraklēs*) in Rome (see XXXVI.178–183).

As a supplement to Livy's account of Romulus and Remus, you read the passage in Ovid's *Fāstī* (383–418), in which the poet relates the story of the exposure of the twins and their miraculous rescue.

II. Auxilia Legendī

Trōiānī et Latīnī: 1–48

5–6:   *quibus*: dative with *superesse; nihil praeter arma et nāvēs superat*: *nihil* is subject of *superesse* (Cap. XVIII: "survive").

9:    *ad arcendam vim*: *ad* + accusative of gerund/gerundive to express purpose (Caps. XXXIII, XXXVI).

10:    *signum pugnandī*: objective genitive (Cap. XXV).

12–14:   the indirect questions ("*quī mortālēs essent, unde profectī quidve quaerentēs in agrum Laurentem exiissent?*") are introduced by the participle *interrogātus*.

24:    *brevī = brevī tempore* (cf. Cap. XXXVI.217).

28:    *molestē patiēns*: both here and at line 152 (*molestē ferret*), the expression approximates our "taking it badly."

28–29:   *advenam sibi praelātum esse*: the accusative and infinitive construction is used in implied indirect statement, which is very common. Turnus declared war because he took it badly (*molestē patiēns*) <u>that</u> a stranger had been preferred to him.

32–34:   *ut…conciliāret*: purpose clause with *utramque…appellāvit*, not result with *ita*.

38–39:   *minimē laetus…orīgine*: ablative of cause (Cap. XXXVI).

41–46:   *Aenēās, quamquam tanta…erat ut…implēvisset*: concessive clause (*quamquam*) introducing a result clause (*tanta…ut… implēvisset*); *opibus*: ablative of respect (Caps. XI, XXXIX).

47:      *quod*: antecedent is *proelium*.

Alba condita: 49–68

52:      *incolume < incolumis, -e*: "unharmed, safe" (Cap. XXXIII).

53–54:   *quis…affirmet*? Potential subjunctive in a rhetorical question; *hicine*: interrogative particle = *hicne.*

61:      *ferē*: adv. "approximately" (Cap. XXXIII).

62–66:   Reading practice: The core of this long sentence is: *opēs Latīnōrum crēverant. Tantum* provokes the result clause (*ut…ausī sint*); further elaborating the thought is the ablative absolute (*māximē vīctīs Etrūscīs*) and the circumstances under which one might expect the Latins to be threatened—when Aeneas died and Lavinia ruled as regent for Ascanius (*nē morte quidem Aenēae nec deinde inter rēgnum muliebre et Ascaniī pueritiam*).

66–68:   *Pāx <u>ita</u> convēnerat <u>ut</u> Etrūscīs Latīnīsque fluvius Albula, quem nunc Tiberim vocant, fīnis <u>esset</u>*: result clause (Cap. XXXVII).

Rōmulus et Remus: 69–137

74–76:   Supply *ortus est* with all the noun/ablative of source combinations.

84:      *Plūs…vīs potuit*: *posse* alone means "have ability/power," so "force had more power."

XXXVI: subordinate clauses in indirect statement have their verbs in the subjunctive according to sequence of tense).

124–127:   *Eōdem tempore Numitor…suspicābatur*: the main clause is actually just a subject, verb, and time marker; *suspicābatur* is completed by an accusative and infinitive in indirect statement (*nepōtēs suōs servātōs esse*); Numitor's reasoning is fleshed out by a *cum* clause (*cum…frātrēs*) and an ablative of means of the gerund with objects (*comparandō…*).

XLII: ALTERVM ET QVADRAGESIMVM: BELLVM ET PAX (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librō I. 8–21, nōnnūllīs mūtātīs et praetermissīs*]

I. Ørberg's Introduction

Once Romulus had secured his reign with laws and symbols of power, he increased the number of inhabitants by opening a place of refuge, called an *asȳlum* (from Greek ἄσυλον, sanctuary), for all kinds of immigrants. There was an influx of men of low rank, slaves as well as free men. The next problem for king Romulus was how to get wives for his new inhabitants. The neighboring peoples were contemptuous of the Romans and banned intermarriage (*cōnūbium*) with them. But Romulus devised a ploy: he invited Rome's neighbors with their families to games in Rome, and in the middle of the show, he gave a sign to the Roman men to carry off all the marriageable young women.

This outrage brought about Rome's first war with her neighbors. In the ensuing battle with the *Caenīnēnsēs*, Romulus distinguished himself by killing the enemy king and carrying his armor to the Capitol as an offering to *Iuppiter Feretrius*, to whom he vowed a temple. His most dangerous opponents, however, were the Sabines (*Sabīnī*). With the help of the treacherous *Tarpēia*, they managed to take the Capitol, the citadel of Rome, and from there they put the Roman army to flight; but Jupiter stayed the flight of the Romans when Romulus vowed him a temple at the foot of the Palatine Hill—the *templum Iovis Statōris* (XXXVI.172; *Stator* comes from *sistere* and can mean "Stayer").

During the renewed struggle, the Sabine women threw themselves between the opposing armies and persuaded their fathers and husbands to make peace. Romulus entered into an alliance with *Tatius*, the king of the Sabines. After a few years of joint rule, king Tatius was killed in a riot. This caused Romulus little regret. He also waged successful wars with *Fidēnae*, whose army he ambushed, and with the Etruscan city of *Vēiī*.

1. For an explanation of the line number references convention, see p. xxvi.

Legend has it that Romulus suddenly disappeared in a violent storm while he was mustering his troops in the *Campus Mārtius*. The senators told the suspicious soldiers that he had been carried off to heaven and deified.

After a short *interrēgnum*, the Sabine *Numa Pompilius* was chosen king of Rome, and his election was confirmed by *auspicia*. Unlike his warlike predecessor, Numa entered upon peaceful reforms. He built the shrine of Janus (*Iānus*) and had it closed as a sign that Rome was at peace (XXXVI.99–107). He rectified the calendar, giving the year twelve months instead of ten, and organized the worship of the gods.

In the first book of his poem *Ars amātōria*, Ovid tells the story of the Rape of the Sabine Women (as an illustration of what a dangerous place the theater is for young women). And in the *Fāstī* (III.215–228), Ovid tells us how the same women, clasping their babies, rush between the warring Romans and Sabines.

Livy makes use of the legendary history of Rome in his attempt to explain the origin of a great many political and religious institutions. He recounts that Romulus established a bodyguard of twelve *līctōrēs* as an explanation of the attendants who preceded the Roman consuls and other magistrates bearing the symbols of power, *fascēs* (rods) and *secūrēs* (axes). Romulus is also said to have instituted the offering of *spolia opīma* ("choice spoils"), i.e., the spoils taken by a Roman general from the enemy leader he had killed in battle, to *Iuppiter Feretrius* at his temple on the Capitoline. Several religious institutions are ascribed to the pious king Numa. An augur confirmed his election by *auspicia*, divination from the observation of birds; he founded new priesthoods, including the *virginēs Vestālēs*, priestesses of Vesta (XXXVI.111–115), the *Saliī*, priests of Mars, and the *pontificēs*, who were in control of religious matters in Rome. The term *interrēgnum* was still used in Republican times about a period when Rome had no consuls.

II. Auxilia Legendī

Fascēs et secūrēs: insignia imperiī: 1–19

7–8:   *quī fascēs et secūrēs gerentēs <u>rēgī</u> anteīrent*: *rēgī* is dative with the compound verb *anteīrent* (Cap. XXXVII).

Sabīnae raptae: 20–55

21:        *cuilibet < quīlibet*: see indefinite pronouns (above).

27–28:   *tantam…mōlem:* a *mōles* is literally a huge, heavy mass, but it is used metaphorically (as here) for a huge power, great might.

29–30:   The indirect question (*num…aperuissent*) proceeds from the ablative absolute (*plērīsque rogitantibus*). Only women of ill repute would be in need of asylum, hence the Romans' anger (*aegrē passī sunt*).

30–31:   *Id Rōmānī iuvenēs <u>aegrē</u> <u>passī</u> <u>sunt</u>*: cf. *molestē patī* (Cap. XLI).

34–35:   *studiō etiam videndae novae urbis*: objective genitive of the gerundive with *studiō* (Cap. XXV).

39:            *brevī = brevī tempore* (Cap. XXV).

40:            *eō*: "to that place" (adv.).

82:            *bīna*: distributive adjective (Cap. XXX) with *spolia opīma*; *tantum*: adverb.

83–84:   Note Latin's fondness for "sandwiching" modifying words: *fortūna id decus adipīscendī*: the gerund (*adipīscendī*) is genitive depending on the noun *fortūna*, and the object of *adipīscendī* lies between them (*adipīscī, adeptum esse*: "arrive at, get, gain").

91–92:   *ōrant* introduces an indirect command (*ut…accipiat*) followed by an indirect statement. What they said was "*dā veniam*" (becomes indirect command); *ita rēs Rōmānae coalēscere concordiā possunt* becomes accusative and infinitive construction.

XLIII: QVADRAGESIMVM TERTIVM: ROMA ET ALBA (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librō I. 22–31, nōnnūllīs mūtātīs et praetermissīs*]

I. Ørberg's Introduction

The third Roman king, *Tullus Hostīlius*, was warlike, unlike his predecessor. He soon found a pretext for declaring war on Alba Longa, but before the decisive battle, his Alban opponent, *Mettius Fūfētius*—under the influence of the danger threatening them both from the Etruscans—proposed that they should settle their dispute with a minimum of bloodshed. There happened to be triplets in both armies, and it was agreed that the three Roman triplets, the *Horātiī*, should fight with the three Albans, the *Cūriātiī*. Livy gives a dramatic description of this triple combat. After the first violent clashes, only one Roman remained alive and unhurt facing three Albans who were more or less wounded. Horatius, the Roman soldier, seeing that he had no chance of holding his own against the other three, took to flight so as to separate his opponents, and with the wounded Albans following him at varying distances, he turned around and killed them one by one.

The triumphant Horatius then returned at the head of the jubilant Roman army, but in front of the Porta Capena, he met his sister, who was betrothed to one of the Curiatii. Seeing her fiancé's coat on her brother's shoulder she burst into tears, whereupon Horatius ran his sword through his unpatriotic sister.

According to the law, Horatius should have paid with his own life for this crime, but when the *duumvirī* appointed by the king had condemned him to the gallows for *perduelliō* (properly "high treason"—here in a wider sense), he at once appealed (*prōvocāvit*) to the people. In the subsequent trial (*iūdicium*), he was acquitted, not least because his father defended him. Horatius' father even declared that his daughter had been justly killed!

Livy gives a dramatic description of this triple combat. After the first violent clashes, only one Roman remained alive and unhurt facing three Albans who were more or less wounded. Horatius, the Roman soldier, seeing that he had no chance of holding his own against the other three, took to flight so as to separate his opponents, and with the wounded Albans following him at varying distances, he turned around and killed them one by one.

The triumphant Horatius then returned at the head of the jubilant Roman army, but in front of the Porta Capena, he met his sister, who was betrothed to one of the Curiatii. Seeing her fiancé's coat on her brother's shoulder she burst into tears, whereupon Horatius ran his sword through his unpatriotic sister.

Mettius, who was now subject to Rome, planned treason against his new masters. During a joint battle against the towns of Fidenae and Veii, he moved his army away from the Romans, ready to join the enemy if they got the upper hand. But the Romans were victorious without Alban support, and Tullus took revenge. Mettius was put to death in a horrible way, and Alba Longa was destroyed and all its inhabitants moved to Rome. The population of Rome was doubled, and Mount Caelius was incorporated into the city. King Tullus Hostilius erected the first senate-house, which was named the *Cūria Hostīlia* (it was pulled down by Julius Caesar, see XXXVI.82–84 and 96–98).

Tullus also waged a successful war against the Sabines. Soon afterward Rome was afflicted with the plague. When the king himself fell ill, he at last began worshiping the gods, but did not perform the religious rites properly. Jupiter struck him with lightning.

The chapter ends with a short extract from the earliest work of M. Tullius Cicerō, written about 85 BC. It is the beginning of a textbook of rhetoric, *dē Inventiōne*, about the art of finding or devising the arguments and subject matter of a speech. Here he takes the trial of Horatius as an example of a difficult case, summarizing arguments on both sides.

XL and grammar section above).

XLIV: QVADRAGESIMVM QVARTVM: REGES ET REGINAE (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librō I. 32–48, nōnnūllīs mūtātīs et praetermissīs*]

I. Ørberg's Introduction

This chapter deals with the three kings *Ancus Mārcius*, *Tarquinius Prīscus*, and *Servius Tullius*. Tarquinius' arrogant queen *Tanaquīl* and Servius' cruel daughter *Tullia*, who became the last queen in Rome, also play important roles in Livy's narrative of Rome's earliest years.

King Ancus Marcius, who was of a peaceful disposition like Numa, found himself compelled to declare war on the Latins (*Latīnī*) when they had made a raid on Roman territory and refused to return the spoils appropriated in the raid. This event gives Livy an occasion to quote the old rules of law (the *iūs fētiāle*) that were followed when restoration or compensation was demanded from the enemy (*rēs repetere*). If the demand was denied, war was declared. The Senate had to be consulted: each of the senators was asked his opinion, "*Quid cēnsēs?*" (this consultation was called *sententiam rogāre*). War was declared by an envoy, a *fētiālis*, who threw a bloody lance with an iron tip into the enemy's territory and recited the formula for war.

Ancus conquered a couple of neighboring towns, moved their inhabitants to Rome, and settled them on the Aventine Hill. He is said to have built the prison, the *Carcer*, north of the Forum (XXXVI.154), and the first bridge over the Tiber, the *pōns Sublicius* ("the pile bridge" from *sublica*, "stake" or "pile").

Meanwhile *Lucumō*, a rich and powerful man from the Etruscan city of *Tarquiniī*, had moved to Rome in search of fortune with his ambitious wife *Tanaquīl*. On their way, an extraordinary augury had confirmed their expectation of a glorious future: an eagle carried off Lucumo's cap and put it back on his head. In Rome, Lucumo, who called himself *Lūcius Tarquinius Prīscus*, won the favor of king Ancus. At the king's death, he became guardian of his two

minor sons. Before the election of the new king, he sent the sons away and so was chosen king of Rome.

King Tarquinius waged successful wars against the Latins and conquered several of their cities. After doubling his cavalry from 900 to 1,800 men, he defeated the Sabines and forced them to surrender the city of *Collātia*, where the king's nephew *Egerius* was made commander. In this connection, Livy quotes the old formula pronounced at the surrender of a defeated enemy.

After reigning for thirty-eight years, Tarquinius was murdered by order of Ancus's two slighted sons. At the instigation of Tarquinius's widow Tanaquil, the dead king's son-in-law *Servius Tullius* set himself up as king of Rome. This had been portended when, as a little boy, he was found asleep with a flame burning around his head.

King Servius Tullius has been credited with an important administrative reform: he divided the Roman people and the Roman army into five classes on the basis of a statement of each citizen's property (*cēnsus*). The classes were divided into centuries (*centuriae*), 193 in all. In the popular assembly, the *comitia centuriāta*, which enacted laws and elected magistrates, votes were taken by century, giving the wealthier citizens the majority.

Tarquinius Priscus's sons, *Lūcius* and *Arrūns*, refused to recognize their brother-in-law as lawful king. To appease them, Servius gave them his two daughters in marriage, but the couples were unevenly matched. Soon the more hot-tempered of the two, Tullia,[2] allied herself with the similarly disposed Lucius, and they had the other two put away. Tullia urged her new husband to seize power. He broke into the Senate-house and spoke out against the king. When king Servius appeared and protested against his son-in-law's usurpation, he was thrown out and soon after murdered.

Lucius's wife, the ferocious Tullia, was the first to salute her husband as the new king. When she was on her way home, her coachman suddenly stopped the carriage because he found the road blocked by the murdered king's body, but Tullia seized the reins and drove the carriage over her dead father.

The last reading, from book VI of Ovid's *Fāstī*, describes the crimes which began the reign of the last Roman king.

2.   Roman daughters were traditionally given the feminine form of the family's *gentīlicium* (family name), hence *Horātia* in Cap. XLIII and the two women named *Tullia* in this chapter.

II. Auxilia Legendī

Iūs fētiāle: 1–90

2: *rēs*: i.e., the state; *omnium*: dependent on *prīmum*, "first of all."

7–8: *et…et*: "both…and"; *avītae glōriae*: genitive with *memor* (cf. *oblivīscī*, Cap. XXV).

9: *omnium prīmum*: "first of all"; *ut*: "as."

10–12: *cīvibus…cupidīs, fīnitimīs cīvitātibus*: datives with *spēs facta est*; *in avī mōrēs atque īnsititūta rēgem abitūrum esse*: *abīre* + *in* = "be changed into."

15–17: *repetentibus rēs Rōmānīs*: dative with *respōnsum reddunt*; *ratī* (from *rērī*) is the subject of *reddunt* (and introduces the indirect statement that precedes it).

18–19: *Medium erat in Ancō ingenium, et Numae et Rōmulī memor*: *medium ingenium*, "a moderate disposition"; *rēgnō*: dative with *necessāriam*.

20: *Cum…tum*: "both…and" (Cap. XLII).

23–24: *iūs fētiāle*: The *Fētiālēs* were a college of priests who were consulted on matters of war and peace. Ancus is credited with writing the procedure through which war is declared (*bellum indīcitur*) and goods stolen in war demanded back (*rēs repetuntur*).

29: *sit*: jussive subjunctive (Cap. XLI).

31: *dēdī*: present passive infinitive of *dēdere*, "be surrendered."

32: *sīveris*: perfect subjunctive of *sinere*, *sīvisse*, *situm*, synonym of *patī* and *ferre* (Cicero uses the three in a row: *nōn feram, nōn sinam, nōn patiar*); mixed condition: if I am (now), you should never allow.

39: *māiōrēs nātū = patrēs*: *nātū* is a verbal noun from the verb *nāscī* ("to be born") and an ablative of respect (Cap. XXXIII); *adipīscāmur*: indirect question (Caps. XXIX, XXXIX).

43–48: The king's speeches and the legal formula that follows (ll.53–60) preserve for us a flavor of the archaic and legal language of the Romans. Note the archaic *duellum* (l.47) instead of *bellum*. The king's initial question (ll.43–47) contains two strings of three verbs: *dedērunt, solvērunt, fēcērunt*, a list immediately repeated in *darī, solvī, fierī*. The Senate's response contains another triad, *cēnseō itaque cōnsentiō cōnscīscōque* (ll.47–48), all three of

which are repeated in the same order in the formula for declaring war (l.57). The present infinitive *fierī* is the subject of the verb *oportuit*; for the present infinitive with a verb of propriety or necessity, see Cap. XLIII, note to lines 353–354.

49–50:   *in sententiam īre*: Romans voted by separating themselves into two groups: the "yays" and the "nays." This method of expressing their opinion "with their feet" accounts for the verb of motion *īre*.

51–53:   *Fierī solēbat ut…dīceret:* noun clause of result (Cap. XXXVII).

64–65:   *dēmandātā cūrā*: ablative absolute; *sacrōrum*: objective genitive; *flāminibus sacerdōtibusque aliīs*: indirect object with *dēmandāre.*

72–73:   *Postrēmō omnī bellō Latīnō Medulliam compulsō*: i.e., the war is driven to Medullia. The accusative shows the movement of the troops to Medullia.

74:    *urbs tūta mūnītiōnibus praesidiōque validō fīrmāta*: a pair of ideas placed in exactly opposite order; *urbs* here is modified by two adjectives (*tūta*, *fīrmāta*), which are in turn qualified by two ablatives of means. The order is adjective (*tūta*), noun (*mūnītiōnibus*), noun/adjective (*praesidiōque validō*), adjective (*fīrmāta*); the chiasmus's order is ABBA.

76:    *ingentī praedā potēns*: ablative of respect (cf. ll.92–93: *dīvitiīs potēns*).

81:    *in Tiberī*: pure *i*-stem (Cap. XVI).

84–85:   *ad terrōrem crēscentis audāciae*: objective genitive (Cap. XXV).

Lucumō et Tanaquīl: 91–139

94–95:   *cupīdine…ac spē magnī honōris*: ablatives of cause with an objective genitive.

102:    *ventrem ferre*: as the margins state, this equals *gravida esse*, i.e., to be pregnant.

105–106:   *Cui cum dīvitiae iam animōs facerent, auxit uxor eius Tanaquīl*: understand *animōs* ("courage") also with *auxit*. When used in the plural, *animus* frequently means "spirit, courage," but can also mean, as here, "too much spirit," i.e., *superbia*.

108–109:   *exsule advenā ortum*: "an exile descended from a foreigner," in apposition to *Lucumōnem*, giving the words of the Etruscans' scorn (*spernentibus*).

109–111:   *Tanaquīl…oblītaque amōris patriae, <u>dummodo</u> virum honōrā-
             tum vidēret*: *dummodo* + the subjunctive, "as long as, provided
             that" (Cap. XL).

112–114:   *"in novō populō, <u>ubi</u> <u>omnis</u> <u>repentīna</u> <u>atque</u> <u>ex</u> <u>virtūte</u> <u>nōbilitās</u>
             <u>sit</u>, futūrum locum fortī ac strēnuō virō"*: subordinate clause
             in *ōrātiō oblīqua* (Cap. XXXVI) = direct discourse: *"in novō
             populō, ubi omnis repentīna atque ex virtūte nōbilitās <u>est</u>, <u>erit</u>
             <u>locus</u> fortī ac strēnuō virō."*

114–116:   *Facile persuādet Lucumōnī ut cupidō honōrum et cui Tarquiniī
             māterna tantum patria esset*: although this looks like an indi-
             rect command, it is not; it's a causal clause: "she easily per-
             suaded Lucumo because he was…and for him…"; *māterna
             tantum patria*: his fatherland only on his mother's side (his
             mother was from Tarquinia, his father from Corinth, l.97).

118–120:   *ventum erat* = *vēnērunt* (Cap. XL); *eī…sedentī…aufert*: "took
             away from," dative of reference with verbs of depriving, such
             as here, with *aufert* (cf. XXXVIII.69).

121:         *aptē*: "fitly," "rightly," "snugly."

122–123:   *perītus, -a, -um* + objective genitive (*caelestium prōdigiōrum*).

125:         *nūntiam* in apposition to *eam ālitem*: "came as a messenger."

127:         *dīvīnitus*: adverb, "by divine providence."

134–135:   *beneficiīsque quōs poterat sibi conciliandō* = *eōs quōs poterat
             beneficiīs sibi conciliat.*

136:         *brevī*: sc. *tempore.*

137–138:   *bellō domīque* = *domī mīlitiaeque* (l.154; cf. l.42).

L. Tarquinius Prīscus rēx: 140–223

             dive (= *ad rēgem creandum*).

145:         *vēnātum*: supine (Caps. XXII, XLV).

147–148:   *"Sē nōn rem novam petere, quia duo iam peregrīnī Rōmae rēgnā-
             vissent"*: subordinate clause in *ōrātiō oblīqua* (Cap. XXXVI) =
             direct discourse: *nōn rem novam <u>petō</u>, quia duo iam peregrīnī
             Rōmae <u>rēgnāvērunt</u>.*

147–156:   Tarquinius Priscus's speech is reported, that is, in *ōrātiō oblīqua*.

152–154:   *quā cīvīlibus officiīs fungantur hominēs*: subordinate clause in indirect discourse (Cap. XXXVI) = direct discourse: *quā*: ablative of time when (refers to *aetas*); *fungantur*: *fungī* + ablative of means (Cap. XXXVIII); *quam*: comparison with *māiōrem partem* (accusative of duration of time, Cap. XIII).

154–155:   *sub haud spernendō magistrō = sub magistrō quī haud spernendus est.*

160:        *centum in patrēs lēgit*: *patrēs = senātōrēs.*

164–165:   *praedāque inde māiōre quam spērāverat revectā*: ablative absolute containing a relative clause of comparison.

XLV: QVADRAGESIMVM QVINTVM: ROMA LIBERATA (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librō I. 49–60, nōnnūllīs mūtātīs et omissīs*]

I. Ørberg's Introduction

Rome's last king, *Lucius Tarquinius*, surnamed *Superbus* (*cui Superbō cognōmen datum est*), was a cruel tyrant who stopped at nothing to strengthen and expand his power. When the Latin *Turnus* dared to oppose him, the king had a large quantity of arms secretly hidden in Turnus' house; this was used as evidence in a false accusation of subversive activities, and he was condemned to death by his own countrymen. In this way, the Latins were pacified.

The city of *Gabiī* continued to defy Roman power. Unable to take the city by force, Tarquinius devised a plan to seize it by treachery. His youngest son Sextus came to Gabii pretending to have escaped from his cruel father and succeeded in winning the confidence of the inhabitants to such a degree that they chose him as their leader in the war with Rome. He now sent a messenger to his father asking how to make the most of his new power. Tarquinius gave no straightforward answer to the messenger, but while walking with him in his garden, he struck off the heads of the tallest poppies with his walking stick. When Sextus heard about this, he realized what his father wanted him to do: he killed or banished all the prominent Gabians and then delivered the defenseless city to the Roman king!

After telling the story of the oracle which promised *Brūtus* supremacy in Rome because he alone understood its hidden meaning, Livy proceeds to tell the dramatic events which led to the expulsion of the royal family from Rome.

During the siege of the city of *Ardea*, the king's three sons and *Collātīnus*, son of the king's cousin Egerius, started a quarrel about whose wife was the most virtuous. To decide the matter, they paid unannounced visits to their wives. Sextus Tarquinius became infatuated with the winner, Collatinus's beautiful

wife *Lucrētia*, whom they found spinning wool in her home in Collatia. A few days later Sextus went to Collatia, entered Lucretia's chamber sword in hand, woke the sleeping woman, and raped her. After his departure, Lucretia sent for her husband and her father, who arrived together with Brutus. She told them what she had suffered, demanded vengeance, and thrust a knife into her heart. Brutus grasped the bloody knife and swore that he would drive out the king and his family from Rome. The people and the army sided with Brutus, the king was banished with his wife and his three sons, and Brutus and Collatinus are elected the first Roman consuls by the popular assembly (the *comitia centuriāta*). This event is dated to the year 509 BC.

This chapter ends with Ovid's description of these events in the second book of his *Fāstī*. You have now finished an adapted narrative of Livy's first book. In the text that you have been reading, departures from the original have become less and less noticeable, and from line 222 in this chapter (*Muliebris certāminis laus*…), the text is unchanged. From now on, all the passages from Roman authors are presented unchanged—apart from omissions.

II. Auxilia Legendī

Tarquinius Superbus: 1–25

12–13:   *…<u>unde</u> nihil aliud quam praedam spērāre <u>posset</u>*: adverbial final (purpose) clause.

15–19:   *<u>Hic</u> enim rēgum <u>prīmus</u> trāditum ā priōribus mōrem dē omnibus rēbus senātum cōnsulendī <u>solvit</u>, domesticīs cōnsiliīs rem pūblicam <u>administrāvit</u>*: *rēgum*: genitive with *prīmus*; *mōrem*: direct object of *solvit*, modified by *trāditum*; *cōnsulendī*: objective gentive dependent on *mōrem*; *senātum*: object of *cōnsulendī*; *domestica cōnsilia*: i.e., instead of resolutions by the senate.

24:         *fīliam nūptum dat*: supine, see grammar section above.

Turnus Herdōnius: 26–89

27:　　　　　　*diē certā*: although often masculine, *diēs* is sometimes femi-
　　　　　　　nine in the singular when refering to an established time, as
　　　　　　　here.

29–30:　　　　*agere dē* + ablative: "negotiate about" (a frequent expression
　　　　　　　with several shades of meaning).

31:　　　　　　*antequam sōl occideret*: subjunctive with anticipatory *ante-
　　　　　　　quam* (Cap. XLII).

33–34:　　　　*invehere in* + accusative: "attack (with words)," "inveigh
　　　　　　　against."

35–36:　　　　*Quicquam*: used only in negative clauses (Cap. XXVI).

37–38:　　　　Note that the subjunctives (*indīxerit*, etc.) violate sequence of
　　　　　　　tense (Caps. XXXIII, XXXVI). Since the leading verb is plu-
　　　　　　　perfect (*erat invectus*). The primary sequence of the *ōrātiō
　　　　　　　oblīqua* represents the speech as more immediate and forceful.

40:　　　　　　*exsulātum eant*: supine with verbs of motion (Cap. XXII,
　　　　　　　XXXVI, grammar section above).

41–42:　　　　*portendī*: passive infinitive of *portendere*, in passive means
　　　　　　　"threaten" + dative; *sī sē audiant, domum omnēs inde abitūrōs*:
　　　　　　　future condition in *ōrātiō oblīqua* (Cap. XLIII): "*sī mē audiētis,
　　　　　　　domum omnēs hinc abībitis.*"

46:　　　　　　*id temporis*: partitive genitive with a neuter pronoun: "at this
　　　　　　　point in time" (Caps. XVI, XXIX).

52–53:　　　　…*ut eundem terrōrem quō cīvium animōs domī oppresserat
　　　　　　　Latīnīs iniceret*: "so that he might keep the spirits of the citi-
　　　　　　　zens at home down *with the same terror (as the one) with
　　　　　　　which…*"

55:　　　　　　*hospitium*: "inn, lodging place."

59:　　　　　　*salūtī sibi atque illīs fuisse*: double dative: "had been (to) the
　　　　　　　salvation of…"; *salūs*, like *auxilium*, *bonum*, and *praesidium*,
　　　　　　　can be used in the dative to express purpose or tendency
　　　　　　　(Cap. XXXVI).

62–63:　　　　*id verumne an falsum sit*: indirect question.

66–67:   *eō*: adverb "to that place" (cf. l.299)*; ventum est*: impersonal passive of intransitive verb (Cap. XL).

69:     *cāritāte dominī*: ablative of cause (Cap. XXXVII) with an objective genitive (Cap. XXV).

70:     *enimverō = enim + verō:* "surely, truly" (when *enim* is combined with *verō*, it comes first in its clause, unlike *enim* alone, which comes second; see Cap. X).

76–78:   *Revocātīs deinde ad concilium Latīnīs, Tarquinius prīmum eōs collaudāvit 'quod Turnum prō manifēstō scelere meritā poenā <u>affēcissent</u>'*: subjunctive in a clause of reported reason, reporting the reason why Tarquin praised the Latins. Were Livy giving his *own* reason, he would have used *affēcerant* (Cap. XLII).

78–79:   *ēgit dē renovandō foedere*: see on *agere dē* above (ll.29–30).

81–82:   *capita nōminis Latīnī*: just like our "heads of state," the heads (leaders) of the Latin league.

87–88:   *Tarquinius miscuit manipulōs ex Latīnīs Rōmānīsque, ut ex bīnīs singulōs faceret bīnōsque ex singulīs*: i.e., each maniple was made up half of Romans and half of Latins (*bīnōs ex singulīs*), and thus the two sides, the Romans and the Latins, were mixed into one (*singulōs ex bīnīs*).

Gabiī dolō captī: 90–167

92:     *quīn* (Cap. XL).

94–95:   *cum vēndendā praedā quadrāgintā talenta argentī fēcisset*: take *quadrāgintā* with *talenta*, not *praedā vēndendā*; *praedā vēndendā* is an ablative of means.

98:     *vī adortus < adorior, adorīrī*: "attack (by force)."

102–103:   *ex compositō*: "according to plan"; *Gabios*: accusative of place to which; *patris in sē saevitiam nōn tolerandam*: a summary of

the complaint (*querēns*) that is detailed in the extended *ōrātiō oblīqua* that follows (ll.104–114).

106–108:   *sē…ēlāpsum*: accusative subject (with participial modifier) of *crēdidisse*; these two "sandwich" the further indirect statement: *nihil…hostēs L. Tarquiniī* (Cap. XXXVI).

108–114:   *quod sī apud eōs supplicibus locus nōn sit, pererrātūrum sē omne Latium, Volscōsque sē inde et Aequōs et Hernicōs petītūrum*: condition in *ōrātiō oblīqua*; *quod sī*: "but if," a common connective that always refers to what has just preceded; *dōnec*: "until," the original mood is obscured in *ōrātiō oblīqua*, but it would have been anticipatory subjunctive (Cap. XL); <u>*quī… sciant et…parātī sint*</u>: relative clause of characteristic.

115–117:   *quālis…, quālis…, tālis…<u>esset</u>*: subordinate clauses in *ōrātiō oblīqua* (Cap. XXXVI) secondary sequence with the historical present <u>*mīrantur*</u> (Cap. XXXVII).

118:          *futūrum ut*: see grammar section above.

123–126:   *quod…nōvisset scīretque*: see above: subjunctive of reported reason; *superbiam rēgiam*: royal arrogance, i.e., "the arrogance of the king."

126–129:   *ita cum sēnsim*: *cum* conjunction; *sēnsim*: "little by little"; *cum prōmptissimīs iuvenum*: *cum* preposition + ablative; *praedātum*: supine (so too *scīscitātum*, l.138); *dictīs…aptīs*: ablative absolute.

130:          *īnsciā multitūdine quid agerētur*: indirect question dependent on the *īnsciā* of the ablative absolute.

131:          *quibus*: antecedent: *proelia* (l.130); *esset*: subjunctive as part of the *cum* clause.

135–136:   *tantā cāritāte esse ut*: ablative of description (Cap. XXXII) followed by a result clause.

138–139:   *scīscitātum*: supine of purpose.

140:          *huic* nūntō: dative with *respōnsum est*; *dubiae fideī*: genitive of description (Cap. XXXVI).

142–144:   *papāver, -eris* (*n.*): the poppy flower; *interrogandō exspectandōque*: ablative of gerund (ablative of cause) dependent on *fessus*; *ut rē imperfectā*: "as his business remained unaccomplished."

145–146:   *quae dīxerit ipse quaeque vīderit*: perfect subjunctives in indirect questions.

157–159:   *negōtia*: antecedent of *quorum; ut…relinqueret*: substantive clause of result (Cap. XXXVII) dependent on *negōtia* (*quōrum*).

162–167:   Reading help: *mīlitiae*: "dative" (i.e., added to their military service); *sē…suīs*: indirect statement with *indignābātur*; sentence markers: *minus…quam; minōra* (with *opera*) *…māiōris* (genitive of description with *labōris*); *opera speciē minōra, sed labōris aliquantō māiōris*: tasks smaller in appearance (*speciē*, abl. of respect) but of much more (*aliquantō*, abl. of degree of difference); *ad*: take with both accusative gerundive phrases (*faciendōs…agendam*).

Respōnsum ōrāculī: 168–195

187:     *ferunt*: i.e., *fāma est, trāditur.*

188:     *vestrum prīmus*: partitive gentive of *vōs* (Cap. XXIX).

189–193:   *ut…esset*: purpose clause; *Ignārus respōnsī, expers imperiī*: objective gentives (Cap. XXV).

XLVI: QVADRAGESIMVM SEXTVM: POST REGES EXACTOS (Evtropivs)[1]

[*Ex Eutropiī Brevrāriō ab urbe conditā* I.9–III.6]

I. Ørberg's Introduction

The Roman historian Eutropius was commissioned by the Emperor *Valens* (AD 364–378) to write an abstract of Roman history, *Breviārium ab urbe conditā*. In his dedication to the Emperor Valens, Eutropius gives his goals for the *Breviārium*:

> *ab urbe conditā ad nostram memoriam, quae in negōtiīs vel bellicīs vel cīvīlibus ēminēbant, per ordinem temporum brevī narrātiōne collēgī*

Eutropius gives a brief outline (*brevī narrātiōne*), chronologically arranged (*per ordinem temporum*), of the outstanding (*ēminēbant*) events of Roman miltiary (*negōtiīs bellicīs*) and domestic (*negōtiīs cīvīlibus*) history from the founding of the city (*ab urbe conditā*) to his own time (*ad nostram memoriam*). He follows Livy for the early part of his work. Comparing the sentence structure of the two authors offers an exercise useful for your understanding of Latin.

Eutropius' style is extremely concise, lacking in literary merit, but nonetheless a model of clarity. The extract in this chapter covers the time from the expulsion of the Kings to the outbreak of the Second Punic War in 218 BC. Eutropius has based this part of his history on a summary of Livy, and his main interest is the feats of arms (*rēs gestae*) of the Romans. He mentions in passing the civil strife (*sēditiō*) between the patricians (the Senate) and the plebeians (*plēbēiī* or *plēbs*, "the common people"), which led to the election of tribunes of the people (*tribūnī plēbis*) charged with the protection of the people against the consuls and senators.

Roman Expansion

In this period of her history, Rome conquered all of Italy south of the Apennines and made war on the great naval power of Carthage. They first subdued various neighboring peoples, including the northern Etruscans. Camillus captured their southernmost city, Veii, in 396 BC. A few years later, Gauls from northern Italy descended on Rome. The Roman army was defeated on the banks of the *Allia*, a tributary of the Tiber, and the Gauls occupied the city except for the Capitoline (390 BC). After a long siege, Camillus, "the second founder of Rome," rescued the Romans.

In the following years, the Romans repulsed new Gallic attacks. After this, Rome's most dangerous enemies were the Samnites, who were defeated after long wars, and the Greeks in southern Italy. The Romans met with stubborn resistance from the city of Tarentum, whose Greek inhabitants appealed to king Pyrrhus of Epirus for help (280 BC). After some costly victories (hence the phrase "Pyrrhic victory"[2]), the king retired to Sicily. When he returned to the mainland, the Romans, who were now the undisputed masters of Italy south of the Apennines, defeated him.

First Punic War

The conquest of southern Italy led to war with Carthage, the great power of the Western Mediterranean. The First Punic War lasted from 264–241 (the Carthaginians, *Carthāginiēnsēs*, coming from Phoenicia, are also called *Poenī*, adjective *Pūnicus, -a, -um*). *Gāius Duīlius* led a large Roman fleet to victory over the Carthaginians in 260. The war continued with varying success on land and at sea. The Carthaginians took prisoner in Africa the Roman general Regulus. He was then sent to Rome with orders to persuade his countrymen to make peace with Carthage; instead he urged the Romans to fight on. He returned to Carthage, where he died under torture. In 241, a decisive sea battle was fought between the Roman and Carthaginian fleets of 300 and 400 ships respectively. The Romans were victorious, and the Carthaginians had to make peace and abandon Sicily.

Continued Expansion

In the following years, the Romans also conquered Sardinia and Corsica, and in northern Italy, they captured *Mediolānum* (Milan) from the Gauls. The victorious general *Mārcellus* killed the Gallic commander and carried his armor, the *spolia opīma*, in triumph to the Capitoline.

2.   Plutarch, *Life of Pyrrhus*, 21: "If we win one more battle against the Romans, we will be completely destroyed."

The chapter concludes with a quotation from book VI of the *Aeneid*: Anchises in the netherworld describing the triumphant Marcellus to Aeneas.

Roman Chronology

Roman chronology took the foundation of Rome as its point of departure. Dates are given in ordinal numbers (*annō, -ēsimō*) followed by *ab urbe conditā* (or *urbis conditae*, abbreviated *a.u.c.* or *u.c.*), e.g., *anno ducentēsimō quadrāgēsimō quīntō ab urbe conditā* (*annō CCXV a.u.c.*), "in the year 245 after the foundation of the city."

- *Annō trecentēsimō et quīntō decimō ab urbe conditā* (85)
- *Annō trecentēsimō sexāgēsimō quīntō ab urbe conditā* (95)
- *Annō trecentēsimō et alterō ab urbe conditā* (125)
- *Annō urbis conditā quadringentēsimō octōgēsimō prīmō* (288)
- *Annō quadringentēsimō septuāgēsimō septimō* (299)

The modem chronology "*annō Dominī*" (AD) dates only from the sixth century. The year 754 after the foundation of the city (*ab urbe conditā*) is the first year after the traditional birth of Christ (*post Christum nātum*).[3] After 509 BC (the year the kings were expelled from Rome), dates are sometimes given with the words *post rēgēs exāctōs* (or *ab expulsīs rēgibus*), "after the expulsion of the kings":

- *annō prīmō ab expulsīs rēgibus* (8)
- *tertiō annō post rēgēs exāctōs* (35, cf. 41, 48)
- *octāvō decimō annō postquam rēgēs ēiectī erant* (46: a variation on the phrase)

Another, very common way of marking the year is with the names of the two consuls in the ablative absolute, e.g.:

- *K. Fabiō et T. Vergīiō cōnsulibus* (67)
- *L. Genūciō et Q. Servīliō cōnsulibus* (145, cf. 194, etc.)
- *Ap. Claudiō (et) M. Fulviō cōnsulibus* (308, 264 BC)

---

3.   Scholars dispute the date of Christ's birth.

To convert a Roman date to our system of dating:

- BC dates: subtract the Roman date from 753 (the year 245 *a.u.c.* is 509 BC)

- AD dates: subtract 753 from the Roman date

In the margin, dates are given a.C. = ante *Chrīstum*, BC (and p.C. = *post Chrīstum*, AD).

Roman Republican Government

In *Lingua Latina: Indices*, there is a list of Roman consuls with dates (*a.c.* and *u.c.*). After the list of consuls, there is a list of the triumphs of Roman generals beginning with Romulus' triumph over the *Caenīnēnsēs*. Such lists, called the *Fāstī cōnsulārēs* and *triumphālēs*, were set up on marble tablets in the Forum; several fragments of them have been found.

The consuls had no less authority than the kings, but the Romans tried to protect themselves against abuse of power by every year electing not one, but two new consuls. Only when the security of the State (*rēs pūblica*) was seriously endangered did they appoint a *dictātor*, who was given supreme power for a period of six months together with his subordinate, the *magister equitum* (see lines 43–47, 80, 100, 104, 185). Under the consuls, all important decisions were made in consultation with the Senate, whose members (called *senātōrēs* or *patrēs*) were the heads of the noble patrician families. The consuls and other magistrates were elected from their number.

Consuls et dictātōrēs: 1–123

2:          *hinc*: from this time.

3–4:   *hāc causā creātī ut* + a substantive causal clause introduced by a conditional protasis referring to the future; sequence is secondary: *coercēret* is incomplete action, as befits both the purpose clause and the condition; *voluisset* is pluperfect because the action of "wanting" is prior to that of "constraining."

4, 11–12: *placuit nē*; *placuerat enim nē*: *placēre* in the past tenses means "it is (*placuit*) was (*placuerat*) decided, resolved" + a noun clause of the resolution.

11:         *Tarquiniō Collātīnō*: dative of disadvantage with *sublāta est* (< *tollere*); dignitās: "rank," "honorable place in society" (cf. l.43).

14:    *locō ipsīus*: "in his place."

21:    *dēfēnsōrem pudīcitiae suae*: because he avenged Tarquin's violation of Lucretia, thus becoming a symbolic defender of female chastity.

31:    *secundō quoque annō*: "also in the second year": i.e., *quŏque* (also) not *quōque* (from *quisque*), which would have meant "every second year" (Cap. XX).

45:    *dictātōr*: magistrate elected for a six-month (maximum) emergency term; the dictator was *magister populī* ("master of the infantry"); *Magister Equitum* ("master of the cavalry"), second in command to the dictator.

48:    *sēditiō*: "insurrection, sedition."

49–50:   *tamquam* (reported reason: see grammar section); *ipse*: i.e., *populus.*

51:    *per quōs*: relative clause of purpose (Cap. XXXIX).

54:    *Coriolī, Coriolōrum*: town in Latium.

57–58:   *Cn. Marcius*: usually referred to as *Coriolānus*, an honorific cognomen he earned fighting the city; *Volscōrum cīvitātem*: in apposition to *Coriolōs.*

60:    *mīliārium*: the emperor Augustus set up the *mīliārium aureum* ("golden milestone") in the forum to mark the end point of all military roads. Distances from this point to other places were given in terms of the milestones leading from this first one (but at the time referred to, *mīliārium = mille passūs*).

61–64:   *oppugnātūrus*: future participle for a pluperfect subjunctive in a past contracfactual condition = *oppugnāvisset*, protasis *vēnissent*: Coriolanus was intending to attack, if his mother and wife had not come; the future participle gives the sense that Corolianus was on the point of, he would have, had his mother and wife not come.

64–66:   *quī…esset*: descriptive (potential) relative clause with *secundus*; the descriptive relative clause is frequent with words such as *ūnus*, *sōlus* (*quī*) (Caps. XXXIX, XLIV).

71–72:   *quī…dēbērent*: descriptive relative clause (Caps. XXXIX, XLIV); *singulī*: "each of whom," "each individually."

82–83:   *in opere et arāns*: later Latin likes phrases that are not parallel (i.e., here we have a prepositional phrase linked with a present participle); *toga praetexta*: a toga fringed with a purple stripe was worn by higher magistrates; here the *toga praetexta* stands for the office of *dictātor* that Cincinnatus was about to assume. It was also worn by free-born children until they came of age for the toga of manhood (*toga virīlis*).

88:        *decemvirī*: this board of ten men codified the laws of Rome and had them inscribed on twelve bronze tablets, known as the "twelve tables" (*XII tabulae*).

90:        *stipendia*: both a year of military service (in the plural) and the pay or salary (in singular), whence we get "stipend."

98:        *urbī*: dative with *vīcīnae*; Rome is "<u>the</u> city."

108–109:   *eī*: *Camillō*; *quasi…dīvīsisset*: reported reason (see grammar section).

114:        *quicquam*: used only in negative clauses (Cap. XXVI); subject of *potuit*.

115–116:   *nē obsidērent*: purpose clause initiated by the ablative absolute *acceptō aurō*.

117–118:   *Gallīs superventum est*: impersonal passive; *supervenīre*: "overtake," "fall upon."

121:        *triumphāns*: the elaborate celebratory parade for victorious Roman generals, the Triumph, wound its way through the city, ending in the forum (see Cap. XXXVI: *Ad hoc templum imperātor victor post triumphum ascendit, ut Iovī Optimō Māximō sacrificium faciat, dum ducēs hostium, quī in triumphō ante currum imperātōris ductī sunt, ad supplicium trāduntur*, i.e., they were killed).

Post urbem captam: 124–180

126:        *prīmō* sc. *annō*.

140:        *post aliquantum* (sc: *tempus*); *nūllōs* (*tribūnōs*) *placuit fierī*: *placuit nūllōs* (*tribūnōs*) *fierī*.

151–152:   *sublātō torque aureō collōque suō impositō*: "doubled" ablative absolute: *torque aureō sublātō* (*et*) *impositō*; *collō suō*: dative with *impositō*; *Toquātī*: note that Titus Manlius had, before defeating the Gaul in single combat, only two names, the *prae-*

nōmen (*Titus*) and *gentilīcium* (*Mānlius*); *Torquātus* becomes his *cognōmen* and is passed on to his descendants; so too with *Corvīnus* (l.171).

158:    *mīlitēs praestāre*: cities conquered by Rome had to furnish (*praestāre*) soldiers for the Roman army.

160:    *quī modus…efficiēbat*: "and this measure yielded 60,000 or more armed men."

161:    *parvīs adhūc Rōmānīs rēbus*: concessive = *cum rēs Rōmānae adhūc parvae essent.*

166:    *eī = Valeriō.*

164–171:   *Marcus Valerius* becomes *Marcus Valerius Corvīnus*: see note on lines 151–152.

178:    *in Rōstrīs*: see XXXVI.87–91: *Ante Comitium est locus superior ex quō ōrātōrēs verba faciunt ad populum. 'Rōstra' nōmen est huius locī, quia rōstrīs nāvium captārum ōrnātur 'rōstrum' enim vocantur eae hastae ferreae quae ē prōrā nāvis longae ēminent velut rōstrum avis.*

Samnītēs: 181–214

183–184:   *Samnītăs*: Greek names in the 3rd declension plural often retain the *-ăs* ending (instead of ēs); cf. ll.189, 205, 207.

188:    *nē sē absente pugnāret*: indirect command.

190–191:   *capitis damnātus*: the genitive is used with judicial expressions: accusations, condemnations (such as here), and acquitals; he was condemned with the loss of his head; "*quod sē vetante pugnāsset*": subjunctive of reported reason (implied *ōrātiō oblīqua*) (Cap. XLII).

195–196:   *sub iugum*: the illustration in your text is a bit misleading. The "yoke" under which the Roman soldiers were forced to pass was made by making an arch of three spears, two uprights, and a third as a transverse bar.

196–197:   *pax solūta est*: the army had been coerced into making peace, which is legal only when ratified by the Senate; it was therefore revoked.

200:    *aquam Appiam indūxit*: Appius Claudius had built the first of the great Roman aquaducts (*aquaeductus*), known as the *Aqua*

Claudia, from his *gentīlicium*, while the road he had built is called the *Via Appia*.

204:            *lēgātus datus fuisset*: "had been given to him (*eī*) as a lieutenant."

Pyrrhus: 215–305

216:            *quia…fēcissent*: subjunctive of reported reason (Cap. XLII).

224:            *dūcī, ostendī…dīmittī*: all present passive infinitives with *iussit* (l.223).

225:            *quaecumque ā Rōmānīs agerentur*: subjunctive for a subordinate clause in implied indirect statement (Cap. XLII).

226:            *cum iam fugeret*: when he was beginning to flee; *iam* with the imperfect shows an action as just starting.

230:            *adversō vulnere*: the soldiers were killed while standing their ground and fighting, not running away; hence their wounds were in front, not in their backs.

232–233:   *sē tōtīus orbis dominum esse potuisse, sī tālēs sibi mīlitēs contigissent*: past contrafactual condition in *ōrātiō oblīqua*; *posse* is in the infinitive instead of the subjunctive (see Cap. XLIII, grammar section on *posse, oportēre, dēbēre*).

238:            *terrōre exercitūs*: ablative of cause (Cap. XXXVII) and objective genitive (Cap. XXV).

255:            *bīnōrum hostium*: distributive numbers (Cap. XXX): to regain their former status, each had to bring back the armor (*spolia*) stripped from two slain enemy soldiers.

266:            *Tarentum*: accusative of place to which (so too line 281).

267:            *interiectō annō*: "after the lapse of a year," "the second year later."

269:            *vīcīna castra*: i.e., two camps near each other.

273–274:   *quae…spopondisset*: subordinate clause in *ōrātiō oblīqua*: *iussit…*(*ea*) *dīcī quae…*

275:            *difficilius*: comparative of the adverb.

289:            *vēnēre = vēnērunt* (cf. l.292: *commōvēre*).

Bellum Pūnicum prīmum: 306–430

314: *in fidem acceptae*: taken under the protection of Rome.

328: *plūrimum possent*: "were extremely powerful."

334: *in marī pugnātum* (*est*): impersonal passive.

361–362: *Et subācta Āfrica tunc fuisset, nisi quod tanta famēs erat ut diūtius exercitus exspectāre nōn posset*: *fuisset* marks the apodosis of a past contrafactual condition; the indicative protasis *nisi quod* ("except for the fact that") cuts off the possibility of the Romans conquering (they would have conquered except for the fact that there was a famine).

369: *neque in aliquō animus hīs infrāctus fuit*: "nor in anyone was courage unboken by these events."

388: *nihil quasi Rōmānus ēgit*: "did not act at all like a Roman," i.e., behaved as if he enjoyed none of the rights of being a Roman citizen.

392: *tantī*: genitive of value (Cap. XXIX).

395: *nūllus admīsit*: "no one granted an audience to."

414: *Lilybaeum*: modern Marsala.

418: *īnfīnītum*: "an endless supply."

Iānus iterum clausus: 431–473

439: *modius trīticī*: the *modius* is the standard Roman measure for grain; *trīticum, -ī* is wheat.

445: *Rōmānīs*: with *pārēre*, not *condiciōnibus*.

451: *iīs*: dative with *contigerat*.

459: *prō Rōmānīs cōnsēnsit*: "united on the side of the Romans."

462: *per cōnsulem tantum*: adverb, not adjective: "by the consul alone."

472: *stīpitī*: dative with compound *imposita*.

Spolia Opima Tertia (Aenēis VI.855–856): 475–477

477: *super-ēminēre*: "be conspicious beyond all others."

XLVII: QVADRAGESIMVM SEPTIMVM: GRAECI ET ROMANI (Avlvs Gellivs)[1]

I. Ørberg's Introduction

This chapter is taken from a collection of essays (*commentāriī*) written by *Aulus Gellius* about AD 150 and published in twenty books under the title *Noctēs Atticae*. The collection comprises his gleanings from years of reading and jotting down bits that intrigued him—a habit that was not peculiar to Gellius. The preface explains his decision to name his collection *Attic Nights*:

> …quoniam longinquīs per hiemem noctibus in agrō, sīcuti dīxī, terrae Atticae commentātiōnēs hāsce lūdere ac facere exorsī sumus…

Lūdere is important here: the *Attic Nights* represent the intellectual leisure time of a second-century AD member of the Roman elite. The essays cover a great variety of subjects (linguistic, philosophical, legal, literary, etc.) based on his extensive reading of Greek and Latin authors, whom he often quotes. Aulus Gellius has preserved many passages from lost works. The initial *commentārius* presents a chronological comparison of famous Greeks and Romans. Aulus Gellius observes that the illustrious Greek statesmen, philosophers, and poets lived long before Rome became a great power, and that Greek art and literature flourished long before the first Roman literary works appeared.

Most of the works of early Roman authors mentioned here are lost, except for some fragments, but twenty comedies by *Plautus* and six by *Terentius* (Terence) have been preserved. We also have a treatise *de Agrī Cultūrā* by *Catō*, which is the oldest surviving prose work in Latin.

Two short pieces from the same collection follow: one contains the story of the origin of the *Sibylline Books* (*librī Sibyllīnī*), the other some observations on

the different oaths uttered by men and women (observations which are con-
firmed by usage in the comedies of Plautus and Terence).

II. Auxilia Legendī

Graeci et Rōmānī (Ex Aulī Gelliī 'Noctium Atticārum' librō XVII capitulum XXI): 1–165

412:   *ut…habērēmus, nē…dīcerēmus*: two purpose clauses introduce the sentence before we get to the main verb (*excerpēbamus*); *cōnspectum < cōnspectus, -ūs*: "a view, survey"; *incōnspectum < incōnspectus, -a, -um*: "indiscreet, imprudent," clearly a pun; *chronicī = χρονικά*: the Greek version of *annāle*: chronological records of important events; *quibus temporibus flōruissent… nōbilēs īnsignēsque…fuissent*: indirect questions. Gellius is making notes (*excerpēbamus*) from the *chronicī* so his readers know the answer to when illustrious Greeks and Romans were in their prime (*flōruissent*).

15:   *dē pluribus* (*hominibus*)…*coniectūra fierī/coniectūram facere*: "make a conjecture, an inference about many others."

73–74:   *quibus*: ablative of comparison, *nātū*, ablative of respect, both with *posterior*.

75:        *quibusdam temporibus iīsdem vixērunt*: there's no easy way around this clumsy phrase; "at certain times (i.e., not all of their lives) they lived at the same time," or, literally: "they lived at certain same times" = *iīsdem ferē temporibus*.

80:        *Athēniēnsibus*: dative with *praepositī sunt*.

83:        *Camillus*: XLVI.104, etc.

XXXVII); *quod…comperissent…habēre*: subjunctive of reported reason (Cap. XLI); *grātiā*: with preceding genitive "for the sake of"; *argentum factum*: "wrought silver, silver plate"; there were sumptuary laws at Rome putting a limit on luxury.

164–165:   *longius*: the comparative can mean "too," as here: "too long"; *bellum Poenōrum secundum*; cf. the beginning of the chapter; Gellius tells us his intention is to write about distinguished Greeks and Romans from the time of the founding of the city to the Second Punic War.

Librī Sibyllīnī (Ex Aulī Gelliī 'Noctium Atticārum' librō I capitulum XIX): 166–193

XLVIII: DVODEQVINQVAGESIMVM: BELLVM PVNICVM SECVNDVM (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librīs XXI–XXX*]

I. Ørberg's Introduction

This long chapter contains extensive excerpts from Livy's description of the Second Punic War (218–201 BC), as well as selections from the *periochae*, or summaries, of Livy's history (as well as a selection from Eutropius). The outstanding Carthaginian leader in this war was *Hannibal*, who had sworn life-long hostility to Rome.

The direct cause of the war was Hannibal's attack on the Spanish city of *Saguntum*, Rome's ally. On hearing that the city had fallen after a heroic defense, the Romans immediately declared war on Carthage (218 BC). Hannibal then led a large army from Spain across the Pyrenees and the Alps to northern Italy, where he defeated the Romans in two battles. The following year he marched south across the Apennines and ambushed a Roman army at Lake Trasimene (*lacus Trasumennus*). After these serious reverses the Romans appointed *Fabius Māximus* dictator. Fabius harassed Hannibal's army but avoided open battle. In 216, the consuls *Terentius Varrō* and *Aemilius Paulus* took the field against Hannibal at *Cannae*. Although numerically superior, the Romans suffered a shattering defeat: Aemilius Paulus was killed along with 50,000 Romans. After this, the greater part of southern Italy went over to Hannibal.

Meanwhile the Romans defeated Hannibal's brother *Hasdrubal* in Spain and in the following years, fought with some success in Italy. Hasdrubal crossed the Alps with a new army to join forces with his brother but was defeated and killed (207 BC). When the young Roman general *P. Cornēlius Scīpiō* succeeded in moving the war from Spain to Africa, the Carthaginians were forced to recall Hannibal. After his defeat at *Zama* in 202 Carthage was forced to make peace with Rome on severe terms.

1. For an explanation of the line number references convention, see p. xxvi.

In this chapter you read—with omissions, but no other changes—Livy's accounts of the siege of Saguntum and the declaration of war (from book 21), of the battle of Lake Trasimene and its repercussions in Rome (from book 22), of the battle of Cannae and the effect of the news in Carthage (from books 22 and 23), and finally of the recall of Hannibal and the conclusion of peace (from book 30). The summarizing passages in between are from the extant ancient abstracts (*Periochae*, περιοχαί) of Livy's history supplemented with a passage from Eutropius. *Periochae* of all except two of Livy's 142 books survive (written not by Livy, but sometime around the fourth century AD).

XLIX: VNDEQVINQVAGESIMVM: HANNIBAL (Nepos)[1]

[*Ex Cornēliī Nepōtis librō 'dē Excellentibus Ducibus Exterārum Gentium'*]

I. Ørberg's Introduction

Cornēlius Nepōs (ca. 100–ca. 25 BC) wrote a chronicle of world history, of which only fragments survive quoted by Aulus Gellius (see Cap. XLVII, ll.25 and 37) as well as a collection of biographies, *dē virīs illūstribus*. From this collection, we still have the book dealing with foreign generals. The last biography in the book is that of *Hannibal*, which is reproduced in this chapter.

Cornelius Nepos is not a very reliable historian. With your knowledge of events, you can detect some inaccuracies in his report: he has Hannibal march on Rome immediately after the battle of Cannae and then tells of events that took place the previous year.

Nepos, however, is not writing history, but biography, and his narrative is very different from that of Livy.

From Nepos we learn what Hannibal did after his defeat at Zama. Under his competent leadership, Carthage soon recovered, but when the Romans demanded his surrender, he took refuge with king *Antiochus III* of Syria. Hannibal encouraged the king to invade Italy, but Antiochus only sent an army to Greece, where he was beaten by the Romans (see next chapter). Hannibal fled to Crete and from there to king *Prūsiās* of *Bīthynia*. A delegation was sent from Rome to demand his surrender, but Hannibal escaped this humiliation by taking poison (183 or 182 BC).

The concluding text is Livy's account of a conversation, which Scipio is said to have had with Hannibal at Ephesus. The conversation presents an interesting, albeit fanciful, portrait of the two great generals.

               ablative of description or quality; adjectives which mark
               equality or similarity often take *atque* or its shortened form *ac*;

147–148:   *Hōs Hannibal ratus suī exposcendī grātiā missōs*: *ratus…missōs*: compressed indirect statement dependent on the participle ratus (from *reor, rērī*: "think"); *grātiā*: just like *causā* (Cap. XXVI);

grātiā in the ablative can take a preceding genitive to mean "for the sake of, in order to"; *suī* is the genitive of the reflexive pronoun *sē* (cf. *meī* and *tuī* as genitives of *ego* and *tū*) (Cap. XXIX) = *ratus hōs…missōs esse ut sē exposcerent.*

148–149:   *senātus darētur*: *senātum dare* + dative: "give someone an opportunity to address the Senate."

149–150:   *clam <-> palam.*

151–152:   *nāvēs…quae eum comprehenderent sī possent cōnsequī, mīsērunt*: both a relative clause of purpose (Cap. XXXIX), "sent ships to," and conditional (future condition in secondary sequence), "to seize him if they could catch him"; *pūblicārunt = pūblicāvērunt*: "confiscate."

153:    *iūdicārunt = iūdicāvērunt.*

154–156:   *sī…voluisset…dīmicāsset (= dīmicāvisset)*: past contrafactual condition.

158:    *vidēbat…nūllā dēseruit in rē*: subject is Hannibal (i.e., Hannibal continued to support Antiochus even though the latter was a disappointment); *praefuit*: subject is Antiochus.

159:    *iīsque*: ablative of means referring to the ships (and their military crew).

162:    *suī*: sc. *mīlitēs*, his own soldiers.

163–164:   *verēns nē*: fear clause (Caps. XXXII, XLVIII); *accidisset…sī suī fēcisset potestātem*: past contrafactual condition; "*potestātem suī facere*": to create an opportunity (for others) to have access to oneself; *suī* is the genitive of the reflexive pronoun *sē* (cf. l.148; Cap. XXIX).

165:    *ut…cōnsīderāret*: purpose; *quō sē cōnferret*: indirect question.

166–167:   *in magnō sē fore…nisi quid prōvidisset*: future condition in *ōrātiō oblīqua*, secondary sequence; in direct speech: *in magnō perīculō erō, nisi quid prōvīderō.*

170:    *plumbum, -ī*: "lead"; *summās*: sc. *amphorās.*

172–173:   *simulāns sē suās fortūnās illōrum fideī crēdere*: the change in pronouns reflects a shift in locution. What Hannibal said (direct statement) was "*meās fortūnās vestrae fideī crēdō*"; in *ōrātiō oblīqua*, the pronouns shift (see Cap. XLIII on pronoun changes): "I entrust my fortunes to your honesty," becomes in

reported speech, "he entrusted his fortunes to the honesty of those men." But in Nepos's narrative, "those men" (*illōrum*) are represented as "these men, the ones I was just writing about" (*hīs…inductīs*).

177: *īnscientibus iīs*: ablative absolute; *tolleret…dūceret*: sc. as object *amphorās*.

181–182: *eōdem animō*: ablative of description; *neque aliud quicquam… quam*: "nothing other than."

183: *quem*: i.e., *Prūsiam*.

188: *quō magis cupiēbat*: *quō = et eō*: "and therefore, for this reason."

189–190: *quem sī <u>remōvisset</u>, faciliōra sibi cētera <u>fore</u> arbitrābātur*: condition in *ōrātiō oblīqua* in secondary sequence (Cap. XLIII); the direct statement would have been: "*sī eum remōverō, faciliōra mhi cētera erunt*"; *fore = futūrum esse*, the future infinitive of *esse*; *remōvisset* represents a future perfect indicative in secondary sequence (see summary of conditions).

191: *tālem iniit ratiōnem*: *inīre ratiōnem*: "to reckon, calculate"; "hit on the following plan."

193: *classe…erant dēcrētūrī*: "they were intending to contend by naval battle"; *erat pugnandum*: impersonal passive of the passive periphrastic with an intransitive verb (Cap. XL).

199–200: *praecipit…quem sī aut cēpissent aut interfēcissent, magnō iīs… praemiō fore*: condition in *ōrātiō oblīqua* (Cap. XLIII), dependent on a historical present (Cap. XXXVII), hence the secondary sequence; the direct statement would have been: *eum sī aut cēperitis aut interfēceritis, magnō vobis praemiō erit*.

202: *Bithȳniī*: Prusias (as the marginal note to l.180 in your text points out) was king of Bithynia.

208: *concitārunt = concitāvērunt*.

210: *quid potissimum*: "what most of all," i.e., the snakes or the enemy ships.

215: *accidit…ut…cēnārent*: noun clause of result (Cap. XXXVII).

219–221: *quī Hannibale vīvō numquam sē sine īnsidiīs futūrōs exīstimārent*: relative causal clause, "because they thought" (Cap. XXXIX); *mīsērunt…quī ab rēge peterent*: relative clause of purpose (Cap. XXXIX).

222–223: '*nē inimīcissimum suum sēcum habēret, sibique dēderet*': indirect command with *petere* (Cap. XXVII, *verba postulandī*); the reflexive pronouns do not all refer to the subject of the main verb (*peterent*, l.221); *sēcum habēre* means "to keep to oneself," that is, for Prusias to keep the Romans' greatest enemy (*inimīcissimum suum*, Hannibal) to himself (*sēcum*, Prusias) but turn him over to them (*sibi*, the Romans). The switch of referents for reflexives in indirect speech is not uncommon, but it rarely impedes understanding.

224–226: *illud recūsāvit nē id ā sē fierī postulārent*: *recūsāre* ("object to") here takes an object clause (*nē* + the subjunctive); *illud*: i.e., the latter request; *quod adversus iūs hospitiī esset*: descriptive (potential) clause (Cap. XLII); "*ipsī, sī possent, comprehenderent*": condition in *ōrātiō oblīqua* (Cap. XLIII): direct statement would have been "*ipsī, sī potestis, comprehendite eum!*" The sequence is secondary; the protasis is subjunctive as a subordinate clause in *ōrātiō oblīqua* (Cap. XXXVI) and the protasis is subjunctive as a reported imperative, virtually an indirect command.

228: *datum erat mūnerī*: *mūnerī* is dative of purpose: "to give for the purpose of a gift/to give as a gift" (Caps. XXXVI, XL); *aedificārat = aedificāverat*.

230: *nē ūsū venīret*: "lest it should happen" (see section on idioms, above).

239: *aliēnō arbitriō*: "on someone else's decision."

241: *cōnsuērat = cōnsuēverat*: syncopated form (see grammar section above); *cōnsuēscere = cōnsuēvisse*: "get accustomed," like *nōscere* "get to know" (Cap. XXIV) have a present sense in the perfect tense and an imperfect sense in the pluperfect; *cōnsuēverat = solēbat*: "was accustomed."

243–244: *Quibus cōnsulibus interierit, nōn convenit*: for *nōn convenit*, see note above on line 113; *quibus…interierit*: indirect question.

Scīpiō et Hannibal [Ex T. Līviī librī XXXV Periochā]: 256–275

259: *Ephesī*: locative; Ephesus is near the coast of Asia Minor (see map in Cap. LIII of your text).

260–261: *sī fierī posset*: if it were possible (Cap. XXXVI); *eī…eximeret*: dative: "remove <u>from</u> <u>him</u>."

266:        *vīsere*: "to go to see," "to visit" (Cap. XXX).

267:        *Quaerentī*: sc. *Scīpiōnī* = *cum Scīpiō quaereret.*

269:        *loca capere*: "set up a position, select a place for camp"; *praesi-dia disponere*: "set up guard posts" (military terms).

L: QVINQVAGESIMVM: GRAECIA LIBERATA (Livy)[1]

[*Ex T. Līviī 'ab Urbe Conditā' librīs XXXI–XLV*]

I. Ørberg's Introduction

The victory over Carthage gave the Romans control of the Western Mediterranean. They now directed their attention to the East. In this chapter, you read extracts from Livy's account, supplemented by the *periochae*, of the conflict between Rome and the two great powers of the Eastern Mediterranean, *Macedonia* and *Syria*.

The Romans feared that king Philip (*Philippus*) V of Macedonia (221–179 BC), who had supported Hannibal in the Second Punic War, would conquer all the free states of Greece and the kingdom of *Pergamum* in Asia Minor. To prevent this, they declared war and sent an army to "liberate" Greece. After a few years' fighting, the Romans, under *Flāminīnus*, won a decisive victory over Philip (197 BC), and during the Isthmian Games at Corinth, the liberation of Greece was solemnly proclaimed. Only in 194, after conquering the insubordinate tyrant *Nabis* of Sparta, could Flamininus leave Greece with his army, and in Rome he celebrated a triumph lasting three days.

The next war was with king *Antiochus* III of Syria (223–187 BC), who ruled a large kingdom in the Eastern Mediterranean including most of Asia Minor. Antiochus invaded Greece, where he was supported by the Aetolians, but was defeated by the Romans at *Thermopylae* in 191. The Roman consul *Acilius* put an end to the war in Greece by capturing the heavily fortified city of *Hēraclēa* from the Aetolians. The Romans, commanded by *L. Cornēlius Scīpiō*, the brother of Scipio Africanus, carried the war over to Asia Minor. With the support of king *Eumenēs* of Pergamum, they defeated Antiochus in 190 and compelled him to give up Asia Minor west of Mount Taurus.

1.   For an explanation of the line number references convention, see p. xxvi.

After the death of king Philip, his son *Perseus* succeeded to the throne of Macedonia. The new king's aggressive policy brought about a new war with Rome, which lasted four years and ended with the final defeat of Perseus by *L. Aemilius Paulus* at the battle of Pydna in 168. Macedonia was now made a Roman province.

At the end of book 45 of his Roman history, the last that has been preserved, Livy tells of the events after the battle of Pydna: the arrival of the news in Rome, the capture of Perseus, and Aemilius Paulus's splendid triumph. A few days before and after this triumph, the victorious general lost his two youngest sons, but he bore this terrible blow with Roman virtue and gravity. In a public speech to the people, he expressed his gratitude that the gods had seen fit to let the change of fortune that must follow upon such a great success overtake his family and not Rome. Chapter 51 will take up the narrative of Roman history with Paulus' son who was adopted by Scipio Africanus (Publius Cornelius Scipio Aemelianus). The summary (*periocha*) of Book 46 shows Paulus as a man of great integrity:

> *L. Aemilius Paulus, quī Persen vīcerat, mortuus. Cuius tanta abstinentia fuit ut cum ex Hispāniā et ex Macedoniā immensās opēs rettulisset, vix ex auctiōne eius redactum sit, unde uxōrī eius dōs solverētur* (*abstinentia*: self-restraint; *auctio, ōnis*: an auction to sell his goods after his death; *redactum < redigere*: brought back; *dōs, dōtis*: dowry: this marriage portion would have been returned to his wife after Paulus' death).

Notā bene: This chaper covers about eighty years of Roman history, with excerpts from books 31 through 45 of Livy's *ab Urbe Conditā*. That's about 740 pages of Latin text in the Teubner Edition, here represented in 676 lines of Latin. Such a condensation of material gives a rather sweeping view of Roman history, highlighting a few events and eclipsing, by necessity, others.

II. Auxilia Legendī

Philippus [Ex librīs et periochā librōrum XXXI–XXXIV]: 1–97

13–14:   *in faucibus*: *fauces, -ium*: "narrow opening" or "mountain pass" (Cap. XLVIII.288); *fugātumque coēgit in rēgnum revertī*: i.e., *coēgit Philippum fugātum in rēgnum revertī* or *coēgit Philippum postquam ille fugātus est in rēgnum revertī*.

15:     *sociīs Aetōlīs*: in military terms, troops are used as an ablative of means instead of agent (*ab* + ablative).

18–19:   *cum Philippō…aciē victō dēbellāvit*: "he finished the war with Philip by defeating his army in battle at Cynoscephalae"; *aciēs, -eī* (f.): the front line of battle; here: "an army arranged for battle"; it can also mean the battle itself (cf. XLVIII.636).

22:   *signīs collātīs*: the *signa* ("banners" or "standards") of a Roman army symbolized the army itself and, as well as being of paramount importance, are part of many military idioms; *signa conferre* means "to engage in close battle."

25:   *in cōntiōne*: i.e., in front of the people.

27:   *brevī*: sc. *tempore*.

28–29:   *in vīllam pūblicam*: the *Vīlla Pūblica*, located in the *Campus Mārtius* (XXXVI.8–9); Livy 4.22 cites its construction for the use of the censors in 434 BC (*Eō annō* C. *Fūrius Paculus et M. Geganius Macerīnus cēnsōrēs vīllam pūblicam in campō Mārtiō probāvērunt, ibique prīmum cēnsus populī est āctus*).

489–491:   *cāsibus cognita populī Rōmānī clēmentia nōn modo spem tibi, sed prope certam fīdūciam salūtis praebet = clēmentia populī Rōmānī cognita cāsibus* (ablative of the source of the information: "known in") *multōrum rēgum populōrumque* (genitives with *cāsibus*) *praebet tibi nōn modo spem* (*salūtis*) *sed prope certam fīdūciam salūtis*.

492:      *Graecō sermōne…Latinē*: Paulus, like many elite Romans, spoke Greek in addition to Latin.

519–520:   *prīmum*: the list is continued by *hinc* (l.521), *tum* (l.522), and *inde* (l.523); *quā*: adverb, "where" (Cap. XXXVII); *prope*: modi-

fies *immēnsō*; *immēnsō spatiō*: ablative of description; *omnia…*
suae diciōnis fēcit: (Alexander) "put all under his authority."

the *-ăs* ending (instead of *-ēs*).

527:          *stetit*: subject is *Macedonum rēgnum*.

528–529:   *dē prōvinciīs referentibus*: the idiom *referre* (*ad senātum*) is
used about submitting an issue for the deliberation of the Sen-
ate (Cap. XLVIII).

530–531:   *dē sententiā lēgātōrum*: "in accordance with the judgment of the
legates"; *rēs componere*: "restore to their proper condition";
dōnec…composuissent: represents a future perfect indicative in
a subordinate clause in *ōrātiō oblīqua* in secondary sequence.

dative.

meaning "plunder, lay waste."

542:          *ūtī*: + ablative *initiō* (Cap. XXVII).

544–545:   Your text leaves out Paulus's command that statue bases in
front of the Temple of Apollo, begun by Perseus to support
statues of himself, be used to support statues of Paulus. A base
from one of these statues survives in the museum at Delphi.

545–546:   *ad spectāculum*: i.e., sightseeing; the *Eurīpus* is a strait between
the Greek mainland and the island of Euboea; *tantae īnsulae…*

merly"; *mīlle navium*: genitive with *statiōne*.

551:          Agamemnon is *rēx ille rēgum*, "that famous king of kings," be-

he used his daughter Iphigenia as a human sacrifice to propiti-
ate Artemis (Diana).

567–568:   *haud secus quam sī…immolātūrus esset*: "hardly otherwise than if" = "just as if"; the sense of futurity is achieved through the use of a future participle; imperfect subjunctive in a conditional clause of comparison in secondary sequence.

577–579:   *sermōne Graecō referēbat*: Octavius translated everything Paulus had said into Greek.

584–587:   *Nōmina deinde sunt recitāta…mors dēnūntiāta*: in a section omitted from your text, Livy explains that the people deported to Italy were all cronies of Perseus and thus represented a danger to Greek freedom; with this in mind, the next sentence (that Paulus gave laws as if to allies) does not seem so odd; *placēret*: see Cap. XLVI for the language of official decrees and resolutions.

591–594:   *artificum…multitūdō et āthlētārum et nōbilium equōrum*: *multitūdō* with all three genitives; *convēnit*: singular to agree with *multitūdō* but applies to both *multitūdō* and *lēgātiōnēs*; *omnis generis*: gentive of description (Cap. XIX).

597:          *ad quae*: i.e., *ad spectācula danda*; *prūdentia*: "skill"; Paulus wanted the Greeks to see how sophisticated he was at giving games (a skill at which Romans at that point had little practice: *rudēs*).

608:        *Secūtī…filiī duo Q. Māximus et P. Scīpiō*: Paulus originally had four sons; the two that followed their birth father's chariot had been given up in adoption to Quintus Fabius Maximus and P. Cornelius Scipio. They took the names of their adoptive families and added a form of the birth name as a further *cognōmen* (thus the *Aemiliānus* in both their names); see lines 670–671.

613:        *hostium*: i.e., the Romans, Perseus's enemies.

615–616:   *duōbus datīs in adoptiōnem* (the two in line 608); *quōs…sōlōs nōminis, sacrōrum familiaeque hērēdēs*: *hērēdēs* is predicative (whom he had as the sole heirs); the genitives give the content of the legacy (*nōminis, sacrōrum familiaeque*).

653:        *trāiciendā < trāicere < trans iacere*: "throw across": here, "transport" (contrast meaning in note on lines 81–88 above).

655:    *quod ultrā precārer*: descriptive relative clause with indefinite antecedent (as often).

660:    *meā tam īnsignī calamitāte*: ablative of cost; *dēfūnctam*: finished (its cycle of rolling downward) (*ex summō retrō volvī*) from being too much (*nimia*, l.651).

661–662:   *lūdibrium*: "mockery of" + genitive; *interpositus* (< *interponere*) + dative: *triumphus interpositus est duōbus fūneribus*: "set in between."

LI: VNVM ET QVINQVAGESIMVM: SCIPIO AEMILIANVS (Livy/Sallust)[1]

[*Ex T. Līviī ʾab Urbe Conditā̆ librōrum XLVIII–LXI Periochīs*]

I. ØRBERG'S INTRODUCTION

Book 45 of Livy's *ab Urbe Conditā* is the last to have survived. The hope of finding at least some of the remaining books has never been fulfilled. But instead of the full text, we have brief summaries, called the *Periochae*, of the content of the 142 books. In this chapter, we reproduce extracts from the *Periochae* of books 48–61, which deal with the period from the Third Punic War (149–146 BC) to the death of *Gāius Gracchus* (121).

Under the terms of the peace following the Second Punic War, Carthage was not allowed to build ships nor conduct wars (XLVIII.825–834). The Numidians were an inveterate problem for Carthage (XL.25–28). In a shrewd political move, Masinissa had befriended Rome during the Second Punic Wars (XLVIII.750–752). Following the Second Punic War, the Numidians made incursions into Carthaginian territory. Reports of Carthage mobilizing to defend itself and of supplies of timber (for the building of ships) angered the Romans.

The son of Aemilius Paulus, *P. Cornēlius Scīpiō Aemiliānus*, figures largely in this period of Roman history. He had been adopted by P. Cornelius Scipio, the son of Scipio Africanus, and in accordance with Roman custom, he was given the name of his adoptive father with the second cognomen *Aemiliānus* after his birth father. He was an outstanding general and statesman. When the Third Punic War broke out in 149, he served with distinction in Africa. In the following year, he was elected consul although under the normal age, and in 146 he conquered and destroyed Carthage. In the same year, the Romans destroyed the rich Greek city of Corinth, the center of the Achaean League (*Concilium Achāicum*) which had rebelled against Rome. Scipio's last exploit was the con-

quest of *Numantia*, the capital of the *Celtibērī* in Spain, in 133. This put an end to organized resistance to the Romans in Spain.

During the following years, internal conflicts emerged in Rome. There was popular discontent with the ruling class, the *nōbilitās* or *ōrdō senātōrius*, who had a monopoly of all public offices. This discontent was fostered by social problems resulting from the wars, which had dispossessed many Italian peasants of their land. *Tiberius* and *Gāius Gracchus* proposed agrarian reforms intended to provide land for the thousands of landless peasants who had come to Rome.

The Gracchi paid with their lives for their reform policy, but their work had a lasting effect on Roman politics. From then on the conservative senators, who called themselves *optimātēs*, "the best," struggled with a strong reformist party, known as *populārēs*.[2] At the end of the chapter you read an extract from the *Bellum Iugurthīnum* (see Cap. LII) by Sallust (*Sallustius*); the historian gives his opinion of the political conflicts in Rome and the reasons for them. While the summaries represent Livy taking a censorious tone about the activities of the Gracchi, the excerpt from Sallust clearly shows his sympathy for the reformers. The waning of Roman values is a recurrent theme in Latin literature. Sallust dates the onset of this decline to the removal of Rome's greatest enemies (especially Carthage):[3]

> *luxuriae enim peregrīnae orīgō ab exercitū Asiāticō invecta in urbem est. iī prīmum lēctōs aerātōs, uestem strāgulam pretiōsam, plagulās et alia textilia, et quae tum magnificae supellēctilīs habēbantur, monopodia et abacōs Rōmam advēxērunt. tunc psaltriae sambūcistriaeque et convīvālia alia lūdōrum oblectāmenta addita epulīs; epulae quoque ipsae et cūrā et sūmptū maiōre apparārī coeptae. tum coquus, vīlissimum antīquīs mancipium et aestimātiōne et ūsū, in pretiō esse, et quod ministerium fuerat, ars habērī coepta. vix tamen illa quae tum cōnspiciēbantur, sēmina erant futūrae luxuriae.*

Tiberius and Gaius Gracchus were closely connected with the family of the Scipios. Their mother, *Cornēlia*, was a daughter of Scipio Africanus, and their sister, *Semprōnia*, married Scipio Aemilianus. These family relations are shown in the genealogical table of the Scipio family on p. 294 of *RŌMA AETERNA*. The first ancestor is *Scīpiō Barbātus*, whose sarcophagus with a legible inscription is pictured at the beginning of the chapter.

---

2.   Although *populārēs* had been in use since Plautus, the word *optimātēs* was coined by Cicero, so makes its first recorded appearance at least fifty years after the Gracchi.

3.   Livy puts it earlier, when Gaius Manlius Vulso triumphed over the Asiatic Gauls (*ab Urbe Conditā* 39).

II. Auxilia Legendī

Bellum Pūnicum tertium: 1–118

1: *Gulussa, Masinissae fīlius*: for Masinissa, king of Numidia and friend of Rome during the Second Punic War, see XLVIII.750–751: *Et amīcitiā factā cum Masinissā, rēge Numidārum.* Gulussa continued the tradition of being *amīcus Rōmānus.*

plūrēs fuissent": future condition in *ōrātiō oblīqua* in second-ary sequence. In direct speech, the condition would have been: "*velōcius iī absūment frūmentī quod habent, sī plūrēs fuerint*"; *frūmentī quod*: partitive genitive; the antecedent of *quod* (i.e., *id*) is, as often, to be supplied by the reader.

LII: ALTERVM ET QVINQVAGESIMVM: IVGVRTHA (Sallust)[1]

[*Ex C. Sallustiī Crispī 'Bellō Iugurthīnō'*]

I. Ørberg's Introduction

The Roman historian Sallust, *C. Sallustius Crispus* (86–ca. 34 BC), was on Caesar's side during the civil war between Caesar and Pompey. Caesar rewarded him by making him governor of *Numidia*. His knowledge of this province was useful to him in writing his *Bellum Iugurthīnum*, a description of the war that the Romans had to wage for six years (112–106) against the Numidian king Jugurtha (*Iugurtha*), the grandson of *Masinissa*. Cap. LII contains excerpts from this work.

If Jugurtha was able to become a dangerous adversary of Rome, it was largely due to the incompetence and corruption of Roman politicians. Time after time Jugurtha succeeded in bribing influential Romans to comply with his demands. In this way he became absolute ruler of Numidia; when finally the Romans declared war, he bribed the consul *Calpurnius Bēstia* to cease hostilities. The disclosure of such corruption within the Senate aroused a storm of indignation in the Roman people. Jugurtha was summoned to Rome under safe conduct to give evidence, but he bribed one of the tribunes to forbid him to speak.

The first Roman commander to oppose Jugurtha effectively was *Q. Metellus*; but before winning a final victory, he was succeeded by *C. Marius*. Marius was a *novus homō* in Roman politics, i.e., the first man in his family to obtain high public office. Marius put an end to the war in Numidia and with the help of his young staff officer *Lucius Cornēlius Sulla*, caught Jugurtha in a trap. The king was taken to Rome to adorn Marius's triumph.

An opponent of the aristocratic senatorial government, Sallust emphasizes the inefficiency of the ruling class and the achievements of Marius during the Jugurthine war.

II. Auxilia Legendī

4:    *obviam itum est*: impersonal passive + dative (for the idiom, see Cap. XXXIX).

5:    *huiusce modī*: *-ce* is a demonstrative particle adding further "pointing" to the demonstrative *huius*, genitive of description dependent on *reī*, itself dependent on *initium*.

10:    *Scīpiō Āfricānus*: Cf. XLVIII.266–267.

12:    *facinora*: *facinus* is often used in Latin to denote a crime, but it comes from *facere* and can just mean, as here, "deed, act."

13:    *Syphax*: XLVIII.764–774; L.453–457.

15:    *rēgī dōnō dedit*: double dative (Cap. XXXVI); object is *quāscumque…cēperat*.

21:    *ortus*: i.e., *nātus*.

24–26:   *Quī = et is* (Cap. XXXIX); *vīribus, faciē, ingeniō*: ablatives of respect (Cap. XXXIX); *multō māximē*: *multō* intensifies the adverb *māximē*; *nōn sē luxuī neque inertiae corrumpendum dedit*: Cap. XXXVI. Note the switch after l.26 from indicative to historical infinitives.

28:    *cum…anteīret…tamen…esse*: *cum* concessive (Cap. XXXVII) in a subordinate clause in indirect statement; *glōriā*: ablative of respect (Cap. XXXIX).

33:    *rēgnō suō glōriae fore*: double dative (Cap. XXXVI).

34–35:   *exāctā suā aetāte et parvīs līberīs*: ablative absolutes; *crescere*: increase in power and esteem.

39:    *ad hoc*: adverbial "moreover, in additon."

40–41:   *ex quibus, sī tālem virum dolīs interfēcisset, nē qua sēditiō aut bellum orīrētur, ānxius erat*: *interfēcisset* represents a future perfect indicative in the protasis reported condition in secondary sequence; the apodosis is a fear clause (*nē…orīrētur*) from *ānxius erat*.

42–43:   *neque per vim neque insidiīs*: Sallust likes such unparallel juxapostions (instead of *neque vī neque insidiīs* or *neque per vim neque per insidiās*).

64–66:   *accendēbant*: imperfect of repeated action; *sī…occidisset fore uti…potīrētur…esse*: indirect statement dependent on the gerund (abl.) of the frequentative *pollicitandō*; *potīrī*: usually with the ablative, here with the genitive; *occidisset*: represents future perfect indicative in protasis of a reported future condition, with the apodosis *fore uti*.

LIII: CAPITVLVM QVINQVAGESIMVM TERTIVM: MARIVS ET SVLLA[1]

[*Ex Eutropiī Breviāriō ab urbe conditā, V et VI*]

I. Ørberg's Introduction

This chapter contains the part of Eutropius's history which deals with the years 105–67 BC. In this period Rome continued to expand its power in the East, while at home it was weakened by internal dissension that finally ended in a bloody civil war. The great generals Marius, Sulla, and Pompey *(Pompēius)* saved Rome from external enemies. In the years 102 and 101 Marius checked and defeated the advancing Germanic tribes of the *Cimbrī* and *Teutonēs*. In 90 a number of Italic peoples, who had been allies of Rome, started a revolt in order to obtain Roman citizenship; in this "Social War" (*bellum sociāle,* from *socius,* "ally") Sulla distinguished himself. He was therefore chosen by the senate to command the Roman army that was sent to fight Rome's new enemy, king *Mithridātēs* of *Pontus,* who had subjugated most of Asia Minor and Greece. However, the Roman people wanted Marius to be sent against Mithradates, so Sulla had first to march on Rome to oust Marius and his supporters. Then he crossed to Greece, where he defeated Mithridates in several battles; but before he had won the final victory, he made peace with Mithridates and returned with his army to Rome. The popular party had seized power during his absence, but Sulla crushed his opponents and took cruel revenge on them.

In this civil war young Pompey fought on Sulla's side and won such spectacular victories in Sicily and Africa that Sulla granted him a triumph in spite of his young age. In 76 BC Pompey went to Spain, where he helped to crush the rebellion of *Sertōrius,* a supporter of Marius who had offered strong resistance for several years. Returning from Spain in 71 BC Pompey conducted mopping-up operations after the Servile War (*Bellum servīle*) against *Spartacus*, the glad-

iator who had incited a large number of slaves to open warfare against their Roman masters.

In the meantime Mithridates had started a new war against Rome by occupying Bithynia, whose late king had bequeathed his kingdom to the Romans. The Roman general *Lūcullus* drove Mithridates out of Bithynia and even invaded his own kingdom of Pontus, so that he had to seek refuge with king *Tigrānēs* of *Armenia,* his son-in-law. Lucullus marched into Armenia and defeated Tigranes, but a mutiny among the troops he had left in Pontus prevented him from following up his victories. Mithridates launched a new offensive and regained Pontus. Lucullus was then recalled and superseded by *M'. Acīlius Glabriō* in 67 BC.

In the same year Pompey was given the command of the war against the well-organized pirates who, in collusion with king Mithridates, made the whole Mediterranean unsafe and even threatened Rome's supply lines. Within a few months Pompey succeeded in ridding the seas of pirates.

In 66 BC, while Pompey was in *Cilicia* on the south coast of Asia Minor with his army, the tribune of the people, C. *Mānīlius,* proposed a law (*Lēx Mānīlia*) giving Pompey supreme command of the war against Mithridates. Among the speakers who pleaded for the law in the popular assembly were *C. Iūlius Caesar* and *M. Tullius Cicerō.*

This is the time when Cicero began to assert himself in Roman politics. The chapter ends with an extract from Cicero's work *Brūtus* or *dē clārīs ōrātōribus,* in which he tells us about his training as an orator, his relations with other famous orators of the time, and his election as praetor for 66 BC—the year he made his great speech for Pompey—and as consul for the year 63 BC.

374–375:   *mē*: object of *incitārent*.

377–378:   *rēs est mihi cum aliquō*: "I am concerned with": i.e., Cicero saw Hortensius as his principal rival.

383:    *Siciliēnsis annus*: "a year in Sicily."

384:    *prīnceps*: i.e., *prīnceps ōrātōr*.

386–387:   *quidquid esset*: with *illud*, a gesture of modesty in regard to his talent; subordinate clause in indirect discourse.

399–400:   *ut…omittam*: "leaving a lot unsaid" (Cap. LXIX notes 15–18).

402:    *nam*: explains the *incrēdibilī populī voluntāte* in l.401; *exquīsītius*: "extremely attentive to detail," with *genus*; *novitāte*: ablative of means.

LIV: QVINQVAGESIMVM QVARTVM: CN. POMPEIVS MAGNVS (Cicero)[1]

[*Ex M. Tuliī Cicerōnis ōrātiōne dē imperiō Cn. Pompēiī*]

I. Ørberg's Introduction

This chapter contains the main part of Cicero's speech *dē imperiō Cn. Pompēiī* (or *prō lēge Mānīliā*), the speech that Cicero delivered in support of the law that gave Pompey the command of the Roman army in the war against king Mithridates.

Cicero's short introduction, here omitted, aims to win over his audience, thus making them more receptive to what he has to say. Cicero proceeds to his argument, telling his audience exactly how he will proceed: the character of the war, the magnitude, and the appropriate general (*dē genere bellī…de magnitūdine…dē imperātōre dēligendō*, 17–19). The first section gives a survey of the military situation in the East after the recall of Lucullus. His argument points to the following ways that Rome's vital interests are at stake in the war:

1. The honor of the Roman people is involved, for Mithridates' murderous assault on Roman citizens must not remain unavenged.

2. Rome's Eastern allies, who are overrun or threatened to be overrun by the enemy, are eagerly hoping for Roman help.

3. The war has had serious consequences for the revenues of the Roman State, since it makes it impossibe to levy taxes (*vectīgālia*) in the richest of all the provinces of the Empire.

4. A large number of Roman citizens are threatened with economic ruin. Especially threatened are members of the equestrian order (*ōrdō equester*) including the *pūblicānī*, the provincial tax collectors.

In the following section (*dē magnitūdine bellī*), Cicero deals with the war situation in greater detail. He describes Lucullus' successful campaign and Mithridates'

headlong flight. In carefully chosen words, he alludes to the soldiers' failing discipline, which has provoked the new enemy offensive, and the defeat of the Roman army.

After evoking the seriousness of the situation, Cicero turns to the real issue: the appointment of a new commander in the war against Mithridates. He mentions the necessary qualifications of a great general and shows that Pompey possesses them all. This leads to an unreserved eulogy of Pompey's brilliant achievements in all the wars he has fought, especially in the recent war against the pirates. Cicero concludes that Pompey is the only one who can win the war, especially since he happens to be stationed with a strong army near the theater of war.

There is no doubt that Cicero's admiration for Pompey's military ability was genuine. And indeed Pompey proved to be the right man for the task. The Lex Manilia was passed, giving Pompey supreme command in the East; he defeated both Mithridates and Tigranes and extended Roman rule over vast new territories.

The Cicero text is followed by extracts from the extant summaries of books 100–102 of Livy. The subject is Pompey's great victories in the East, ending with the conquest of Jerusalem (*Hierosolyma*) in 63 BC. In the same year, Cicero, as consul, disclosed the conspiracy that Catiline (*Catilīna*) had organized in order to seize power in Rome. Catiline was forced to leave Rome, the leaders of the conspiracy were caught and executed, and the next year Catiline himself was killed in battle.

Finally, there is an extract from Eutropius about Caesar's wars of conquest in Gaul (which he has described himself in his *Commentāriī dē bellō Gallicō*) about Crassus's unsuccessful campaign against the Parthians (*Parthī*) and about the civil war between Caesar and Pompey. This civil war ended with Pompey's defeat in the battle of *Pharsālus* (48 BC) and his flight to Egypt, where he was killed.

II. Auxilia Legendī

Quirītēs! 1–19

3:       *Quirītēs*: Cicero's speech is not to the senate but to the people of Rome from the rostra in the forum.

4:       *alter relictus, alter lacessītus*: the rest of the sentence applies to each subject (i.e., *alter relictus…arbitrātur, alter lacessītus arbitrātur*).

6:       *Equitibus Rōmānīs*: dative; the knights were heavily invested in the collection of taxes in the East and thus in danger of personal

financial losses (in addition to the losses to the Roman treasury); *honestissimīs*: from the meaning of "morally probative" acquires the additional sense of "respectable."

7–15:   all in *ōrātiō oblīqua*, giving the reported contents of the letter; *vestrīs vectīgālibus*: dative with *fīnitimum*: i.e., "your revenues," meaning "the places from which you collect revenues"; *successerit*: perfect subjunctive in a subordinate clause in *ōrātiō oblīqua*; *parātum esse*: refers to Glabrio, accusative in indirect statement.

16:     *Causa quae sit vidētis*: you might expect *causam* (the object of *vidētis*) but here, as very commonly, the antecedent (*causa*) is attracted into the case of the pronoun (*quae*) that introduces the indirect question (*Quae sit causa?*).

Dē genere bellī: 20–178

21–23:   *eius bellī quod…dēbeat*: descriptive relative clause (Cap. XXXIX).

23–31:   *agere*, as you have already seen, has a wide range of meanings. *Agere* in the passive marks what is "at stake" or "in question": *in quō agitur populī Rōmānī glōria…agitur salūs sociōrum… aguntur certissima populī Rōmānī vectīgālia…aguntur bona multōrum cīvium…* The repetition of the same word at the beginning of a series of clauses is called *anaphora*, a frequent and effective rhetorical device; *cōnsulere* + dative: meaning, "consult the interests of," "take care of."

32:     *glōriae, laudis*: objective genitives with *appetentēs, avidī*.

36–38:   *quī…cūrāvit*: In 88 BC over 80,000 civilians (Roman citizens and Italian settlers) were killed at Mithradates's behest.

40–41:   *sed ab illō tempore annum iam tertium et vīcēsimum rēgnat*: *iam* is used with the accusative of duration of time (Cap. XIII) to show how long something has been going on (present, as here) or had been going on (imperfect).

45–46:   *ita…ut*: result (so too in lines 49–50).

46:     *insignia victōriae* (*insigne, -is*, n.): i.e., Sulla and Murena brought back the trappings of victory, but Mithrades was still in power, as the next sentence makes clear.

50–52:   *laus est tribuenda* [*ob id*] *quod ēgērunt, venia* [*est*] *danda* [*ob id*] *quod relīquērunt.*

56–64:   See "Reading Long Sentences" in the introduction to this book in which this complex period is made easier by separating out the subordinate clauses. Here is a rewritten simplification of the sentence:

> *Mithradātēs māximās classēs aedificāvit ōrnāvitque; exercitūsque permagnōs quibuscumque ex gentibus poterat comparāvit; simulavit sē Bosporānīs fīnitimīs suīs bellum īnferre. Deinde* (i.e., *posteā*) *usque in Hispāniam lēgātōs ac litterās mīsit ad eōs ducēs quibuscum tum bellum gerēbāmus.* [*Hoc fēcit*] *ut, cum duōbus in locīs disiūnctissimīs māximēque dīversīs ūnō cōnsiliō ā bīnīs hostium cōpiīs bellum terrā marīque gererētur, vōs ancipitī contentiōne districtī dē imperiō dīmicārētis.*

56–58:   *rem cōnferre ad/in aliquid = rē ūtī; quibuscumque…potuisset*: "from whatever peoples he had been able."

60:         *quibuscum = cum quibus.*

65–66:   *Sertōriānae atque Hispāniēnsis*: genitives referring to *partis.*

69:         *rēs gestae*: "accomplishments."

70–72:   *fēlīcitātī, virtūtī, culpae, fortūnae*: datives with *tribuenda esse.*

74:         *eī*: dative of disadvantage; *falsa*: also with *laus.*

76–77:   *vidēte quem vōbīs animum suscipiendum putētis*: literally: "consider (*vidēre*) what disposition (*animum*) you think must be adopted by you"; *quem…putētis*: indirect question.

81:         *quō…animō*: ablative of description.

82–83:   *Corinthum patrēs vestrī, tōtīus Graeciae lūmen, exstīnctum esse voluērunt = patrēs vestrī voluērunt Corinthum, tōtīus Graeciae lūmen, exstīnctum esse.*

86:         *Illī = patrēs vestrī* (also line 88).

90–93:   *Vidēte nē = cavēte nē*: Cf. line 27; *pulcherrimum fuit*: subject is the clause *tantam…trādere*; so too *id…posse* is the subject of *turpissimum sit.*

94:         *Quid?*: Cicero is very fond of an emphatic *quid* beginning a sentence. Here *quid quod* might be translated as "what about the

fact that," but sometimes the emphatic *quid* means something like "how" or "why," and sometimes it is almost untranslatable.

97: *tōtī Asiae*: dative with *imminent.*

101–104: *dēposcere*: with *audent*; *id*: refers to *dēposcere*; *cum praesertim vōs alium* [i.e., *M. Acīlium Glabriōnem*] *mīseritis*: *cum* causal.

105: *in quō summa sint omnia*: "on whom depends everything of critical importance" (lit., "all the most important things").

107: *tametsī*: "although"; *vēnerit*: subordinate clause in indirect statement.

111–112: *dignōs…quōrum…commendētis*: descriptive relative clause (Cap. XLII).

113–115: *hōc* = "for this reason"; *eius modī hominēs…mittimus ut*: result clause from *eius modī* ("men of the sort that the result is…").

117: *hunc*: i.e., Pompey (the *talis vir* of line 112); *audiēbant*: "kept hearing about."

124: *ūnā cum*: "along with."

126–128: *cum dē māximīs vestrīs vectīgālibus agātur*: impersonal *agī* + *dē*; cf. LIII.96, *iussit cum Sullā dē pāce agī*; *tanta*: i.e., so small (in comparison with Asia); *iīs…contentī*: satisfied with + ablative, i.e., the revenues are so small it's almost not worth keeping the other provinces safe from incursion.

132: *omnibus terrīs*: dative with *antecellat.*

133: *bellī ūtilitātem*: "what is useful for war."

136: *dētrīmentum accipitur*: "a loss is suffered."

139: *pecua < pecū*; one of several words for "farm animals."

141–142: *decuma = decima*, from *decimus, -a, -um* (i.e., a tenth part of the profits); as the marginalia in the text tell you, it equals *decima pars frūgum*, a tithe which forms the landowners' tax in the provinces; *scrīptūra, -ae*: a tax paid on public pastures (see marginalia: *mercēs prō pāstiōne in agrō pūblicō*).

145: *vectīgālia pēnsitant*: "pay taxes."

149: *salīnae, -ārum* (f. pl.): "salt-works."

149–150: *sē habēre*: "be in a certain condition or state" (e.g., *magnō perīculō*).

152:            *quī vōbīs frūctuī sunt*: double dative: dative of tendency (*frūctuī*) and dative of reference (*vōbīs*); see Cap. XXXVI.

153–154:   *eōs…calamitāte…formīdine līberātōs*: ablative of separation with *līberāre*.

155–159:   Reading help: main clause: *Ac nē illud quidem vōbīs neglegendum est* followed by explanatory relative clause (*quod… dīctūrus*) and a relative clause explaining the content of *illud* (*quod…pertinet*: *bona* here means "goods" in the material sense); *quōrum…habenda est ratiō*, as explained in the margins, "make an account, calculation for"; antecedent of *quōrum* is *cīvium Rōmānōrum*.

160:            *honestissimī*: see above on line 6 for *honestus*; *ōrnātssimī*: "adorned with all the good qualities."

161–162:   *quōrum ipsōrum* = the *pūblicānī*; *vōbīs cūrae esse*: another double dative (see line 152).

166–168:   *hominēs…, quibus vōs absentibus cōnsulere dēbētis*: cf. ll.29–31 above: *cōnsulere* + dative meaning "consult the interests of."

169:            *Est…hūmānitātis vestrae…sapientiae* (*vestrae*): genitives of characteristic (a form of partitive genitive): "it is part/characteristic of your sense of human dignity…wisdom."

171–172:   *multōrum…nōn posse*: indirect statement with *vidēre.*

175–178:   *num dubitandum vōbīs sit*: indirect question; *ad id bellum incumbere in quō…dēfendantur*: subordinate clause in the indirect statement, but the relative pronoun (*id* refers to bellum) can also lead to a descriptive subjunctive clause: "the kind of war in which…"

Dē magnitūdine bellī: 179–272

184:            *vōbīs*: dative of agent with gerundives.

185–206:   a very long period: Cicero begins with a purpose clause (*ut omnēs intellegant*) with a dependent indirect statement (*mē L. Lūcullō…impertīre laudis*) that itself contains a correlative clause of comparison (*tantum…quantum*); the main verb (*dīcō*) then ushers in a long list, in indirect statement, of what Lucullus has accomplished. The best way to approach such a long period is to read it several times: the first time, just get the structure, as outlined in the introduction ("Reading Long Sentences"). In order to do this, it's best to look for signals:

- *atque ut…intellegant*: tells you we have a *ut* +subjunctive clause (you'll have to wait for a bit to figure out what kind); *intellegant* leads you to expect *ōrātiō oblīqua*).

- *tantum…quantum*: comparative correlative clause ("as much as") in the subjunctive because the *quantum* clause is a subordinate clause in *ōrātiō oblīqua*.

- *dīcō*: now you know *atque ut* is a purpose clause ("I am telling you so that"), and you can expect another indirect statement giving the content of what Cicero wants to tell his audience.

192:        *quam* (i.e., *urbem*)…*līberāvit*: indicative in a subordinate clause in *ōrātiō oblīqua* emphasizes the fact of Lucullus's accomplishment; the indicative in l.200 (*erant*) comes in a parenthetical, explanatory clause.

206–207:   *laudis*: partitive genitive with *satis*; *atque ita*: also with *laudis*: "such praise that."

216–219:   i.e., *praedicant eam* (*Medeam*) *dissipāvisse membra frātris suī in iīs locīs quā parēns persequerētur sē* (*Medeam*).

227:        *diffīdentem rēbus suīs*: dative, "in despair about his circumstances."

231–233:   *numquam…putāvit*: i.e., with whom the Romans had no intention of interferring.

235–236:   *causā* + a preceding genitive of the gerund or gerundive (Cap. XXVI).

238:        *tametsī…tamen*: "although…nevertheless."

239:        *ūsus erat*: "had experienced" + ablative.

242:        *fuit enim illud extrēmum ut*: the upshot was that… (see note above on lines 175–178).

245:        *cōnfirmārat = cōnfirmāverat*.

247–249:   *fierī solēre…ut*: consecutive noun clause; *ferē*: "for the most part; *fortūnae alliciant opēs*; *eōrum*: *multōrum*.

251–252:   *tantum*: object of *efficere*; *tantum…quantum*.

254:        *eō*: ablative with *contentus* and refers to the *ut…attingeret*.

259:        *praeterīre*: the *praeterītiō*, or "passing over," is a common rhetorical feature in which a speaker calls attention to something

by saying he will not talk about it. Here Cicero spares the listeners a rehearsal of the defeat while still reminding them of the danger of the enemy; cf. *praetereō* (l.268).

263:          *aliquā ex parte*: "in some degree."

264–266:   *modum statuendum* (*esse*) + dative (*diūturnitātī*); *vetere exemplō*: "in accordance with long-standing precedent."

269:          *quantum…putētis*: subjunctive in an indirect question dependent on *coniectūrā perspicite*.

Dē imperātōre dēligendō: 273–536

274:          *quārē esset*: indirect question.

276:          *restat ut*: "it remains that" + consecutive noun clause.

278–280:   *utinam…habērētis*: unfulfilled wish in present time (Cap. XXXIX); *cōpiam tantam…ut*: result clause; *quemnam…praeficiendum* (*esse*) *putārētis*: indirect question.

282–285:   *ūnus*: alone; *quī…glōriam, memoriam virtūte superārit*: perfect subjunctive (*superāverit*) in a descriptive relative clause (*ūnus quī*) with an ablative of specification (*virtūte*), with the second object (*memoriam*) needing to be understood in terms of the first (*glōriam*): Pompey's military prowess (*virtūs*) has surpassed the glory not only of his contemporaries but also (that recorded in) the historical accounts of men of the past (*memoria antīquitātis*).

286–288:   Cicero takes up each of the four qualities in order; the section on the virtues of Pompey is by far the longest, divided itself into military valor (to line 373) and then a transition (ll.374–379) to a more encompassing definition of virtue.

- *scientia reī mīlitāris*: ll.289–307.
- *virtūs*: ll.308–455.
- *auctōritās*: ll.456–492.
- *fēlīcitās*: ll.493–519.

289–290:   *Quis igitur hōc homine scientior umquam aut fuit aut esse dēbuit?*: One of the several examples in this speech of a rhetorical question, a formal question asked to produce an effect and not to be answered. The obvious answer to the question is: *Nēmō!* But no answer is expected; the rhetorical question is

Cicero's way of saying that there never was a more knowledge-
able man than Pompey.

291:       *bellō…hostibus*: ablatives of attendant circumstances.

292–293:   *extrēma pueritia miles…fuit*: *extrēmus, -a, -um* can mean "end
           of"; *medius* (Cap. XXX), "middle of" and *prīmus* (e.g., *prīmā
           aestāte*, XXXVIII.3), "beginning of."

294–295:   *cum hoste…cum inimīcō*: Cicero is drawing a distinction be-
           tween an enemy of the state (*hostis*) and a personal enemy
           (*inimīcus*).

301–302:   *quod…genus…in quō…exercuerit*: descriptive relative clause
           (Cap. XXXIX).

305:       *gesta…confecta*: "waged…brought to an end."

306:       *in ūsū mīlitārī*: "in military skill" (acquired by practice).

309–310:   *quid est quod quisquam…possit*: this rhetorical question (see
           289–290) expects the negative "*nihil est quod…*" The verb of
           the relative clause (*quod…possit*) is in the subjunctive because
           it is a relative clause of tendency (see Cap. XXXIX), also some-
           times called a descriptive relative clause or a relative clause of
           characteristic.

312:       *vulgō*: the ablative of *vulgus* is equivalent to an adverb,
           "commonly."

316ff: *testis*: anaphora of the same word "witness" seven times in
           rapid succession at the beginning of a series of clauses (ll.316,
           318, 320, 321, 323, 325, 329), the seventh an encompassing
           plural (*testēs*).

319–320:   *multīs perīculīs*: ablative of separation with *explicāvit*; *terrōre,
           celeritāte*: ablatives of means.

321:       *eōrum ipsōrum*: i.e., *hostium*.

330–332:   *omnia dēnique maria, cum ūniversa, tum in singulīs ōrīs omnēs
           sinūs atque portūs*: i.e., both the seas taken as a whole and in
           each of the bays and ports individually.

336:       *hieme*: ablative of time when; *refertō…marī*: ablative of atten-
           dant circumstances.

338–340:   *quis umquam arbitrārētur…*: *arbitrārētur* is imperfect poten-
           tial subjunctive; the question is rhetorical: "who ever would

have thought?" Answer: no one. The questions that follow are indicative to emphasize their historical fact.

343:          *cuī praesidiō*: double dative.

346–350:   *Tantam…tam…ut…audiātis*: result clause.

353–354:   *obeundī negōtiī…cōnsequendī quaestūs*: gerundive genitives with *studiō*.

361–362:   *duābus Hispāniīs et Galliā Trānsalpīnā praesidiīs ac nāvibus cōnfīrmātā*: an adjective can modify the closer noun (*Galliā Trānsalpīnā*) but refer to both (*duābus Hispāniīs et Galliā Trānsalpīnā*).

368–369:   *partim ūnīus huius sē imperiō ac potestātī dēdidērunt*: the genitive depends on the datives *imperiō ac potestātī* but is thrown to the front of the clause to put the emphasis on Pompey. The skillful movement of words to an emphatic place in the sentence (often the very beginning or the end) is called *hyperbaton*.

372–373:   *Pompēius extrēmā hieme apparāvit, ineunte vēre suscēpit, mediā aestāte cōnfēcit*: see note on lines 292–293 above. Here *extrēmā* and *mediā* mean "end of" and "middle of." Cicero could have written "*prīmō vēre*" as a parallel to *extēmā hieme* and *mediā aestāte*. Instead, he varies the expression by using *ineunte vēre* using the ablative absolute with the present participle of *in-īre*.

380:          *quantā innocentiā*: ablative of description; so too the following ablatives.

384:          *cōnsīderēmus*: hortatory subjunctive (Cap. XXX); *summa enim sunt omnia*: i.e., in Pompey can be found the highest quality of all the virtues.

385:          *ex aliōrum contentiōne*: "in comparison with other generals": Cicero goes on to denigrate the behavior of other, unnamed *imperātōrēs*.

386–387:   *ūllō in numerō putāre*: to consider of any account/value; *ūllō*, used only in negative contexts, demonstrates that the question is rhetorical and expects a negative response (Cap. XIX); *vēneant atque vēnierint*, from *vēnīre* (Cap. XXXVI), not *venīre*.

393:          *pecūniam in quaestū relinquere*: "to loan money at interest."

396:          *ante*: adverb.

398:          *quōcumque ventum sit*: for the impersonal *ventum esse*, see Cap. XL.

401:          *recordāminī*: imperative.

402–405:   *plūrēs*: with *urbēs…an…cīvitātēs*: *armīs, hībernīs*: ablatives of means, both with genitives.

408–409:   *cētērīs*: dative with *excellere*.

408–411:   *tantum…ut nōn modo…sed nē…quidem…dīcātur*: result clause; *nocuisse* + dative (*cuiquam pācātō*).

413–415:   *sumptum facere in aliquem*: spend money on someone; *vīs*: force, violence; *nē cupientī…cuiquam*: i.e., even those who want to incur expense on the military's behalf are not allowed.

424:          *retardārunt = retardāverunt* (cf. below, *obtemperārint*, l.512 and *obsecundārint*, l.513).

430–432:   *omnēs…intuentur*.

433–434:   *hāc quondam continentiā*: ablative of description; *fuisse* and *quondam* both refer the listener to the past and liken Pompey to the great men of Roman history; *quod*: antecedent is '*crēdere fuisse hominēs Rōmānōs hāc quondam continentiā*'.

435:          *falsō*: adverb; *memoriae proditum*: "handed down as a record/memorial"(< *prodere*).

440:          *dē aliōrum iniūriīs*: i.e., about the wrongs done to others.

442:          *dignitāte, facilitāte*: ablatives of respect; *principibus, īnfimīs*: datives with *excellit* and *par*, respectively.

443–444:   *dīcendī gravitāte et cōpiā*: Pompey spoke with fluency (*cōpia*) serious authority (*gravitās*); ablatives of respect (as is *cōnsiliō*); *in quō ipsō*: i.e., in the oratorical art.

445:          *hōc ipsō ex locō*: addressing the people from the rostra in the forum.

446–448:   *fidem*: with *sānctissimam*; *hūmānitāte tantā est*: ablative of description; *difficile dīctū* (Caps. XXII, XXXIX).

451:          *quisquam dubitābit quīn*: for *quīn* clauses with *dubitāre*, see Caps. XXIX, XLII; the rhetorical question supplies the necessary negative; cf. l.457: *nēminī dubium est quīn*.

452:          *nostrae memoriae*: partitive gentive with *bella*.

457–458:　　　*plūrimum posse*: "to have the greatest ability."

461–462:　　　*ut* depends on *tantīs rēbus* (result clause).

458–463:　　　The subject of *pertinēre* is *quid hostēs, quid sociī dē imperātōribus nostrīs exīstiment* (subjunctive in an indirect question with *quis ignōrat*); the result clause (*in tantīs rēbus*) *ut aut metuant aut contemnant, aut ōderint aut ament* separates the subject (*hominēs*) of the indirect statement dependent on *sciāmus* from its predicate (*commovērī*).

467:　　　　　*quō*: adverb.

470:　　　　　*sibi*: i.e., *populō Rōmānō*; *omnium gentium*: genitive with *commūne*.

472–475:　　　*ut…cōnfirmem*: suggests that Cicero has much more he could say; *quantum…in bellō*: indirect question; *sūmantur*: hortatory subjunctive.

478–479:　　　*spē ac nōmine*: ablatives of cause; *quantam…potuisset*: comparative clause.

479–486:　　　Reading help: ablative absolute followed by relative clause (*acceptā…admonuī*), followed by *cum* circumstantial (*cum…habēret*) and a past contrafactual condition (*āmīsissētis…nisi fortūna…attulisset*); *dīvīnitus*: "by divine providence."

489–492:　　　*quī…perfēcerit, quī…dēfenderit*: relative causal clauses (Cap. XXXIX).

493–494:　　　*praestāre dē sē ipsō*: offer surety for on one's own behalf.

499–500:　　　as in lines 361–362, *commissōs* refers to both *imperia mandāta* and *exercitūs* but agrees only with the closer noun, *exercitūs*.

500–503:　　　*quibusdam summīs virīs*: dative with *adiūncta*.

528–530:   *sī…esset…erat dēligendus atque mittendus*: like modal verbs (e.g., *posse, dēbēre*, etc., Cap. XLVI) in contrafactual conditions future participles and gerundives with a past tense of *esse* are regularly in the indicative, not subjunctive.

532:           *ab iīs quī habent*: i.e., other generals who have armies under their control.

Finis Mithridatis [Ex T. Liviī librōrum C–CIII Periochīs]: 537–569

The juxtaposition of the summaries (*periochae*) of Livy's work with the Cicero you've just read underscore Cicero's rhetorical periods. The summaries are just that: synopses of information, while Cicero's points are meant to be listened to, not read, and he conveys his message as much by the construction of his sentences as by the content.

552:           *parum*: "too little, not sufficiently."

554–555:   *Hierosolyma*: Jerusalem.

558–559:   *dē caede…incendiīs…rē pūblicā*.

556–564:   *Catilīna*: You can learn more about Lucius Sergius Catilina and his conspiracy against Rome from both Sallust (who wrote a history of the event and an excerpt of whose history of the war against Jugurtha you read in Cap. LI) and Cicero, who published four speeches against Catiline (*In Catilīnam* I–IV).

Finis Pompēiī [Ex Eutropiī Breviāriī librō VI]: 570–617

575:           *vicendō*: ablative of means with *prōcessit*: see Cap. XXVI.

582–583:   *contrā ōmen et auspicia*: the pre-battle signs showing the gods' approval or disapproval of a proposed action; *duce*: in apposition to *Surēnā*.

601–602:   *prīmō proeliō*: see note above on lines 372–373.

608:           *subāctūrae si…dūcerentur*: as the margin note tells you, *subāctūrae* (agreeing with *Rōmānae cōpiae*) here is equivalent to *quae subigere potuissent*, that is, equivalent to the apodosis of a contrafactual condition: the troops would have been able to conquer the whole world were they being led against barbarians. For the imperfect (*dūcerentur*) and a future participle (*subāctūrae*) see above note on lines 528–530 and Cap. XLVI.

LV: QVINQVAGESIMVM QVINTVM: DE RE PVBLICA (Cicero)[1]

[*Ex M. Tullii Cicerōnis dē rē pūblicā librīs*]

I. Ørberg's Introduction

After suppressing the Catilinarian conspiracy, Cicero regarded himself as the savior of the Roman people. Nevertheless, his expectation of a brilliant political career as the leader who was to unite all good forces in defense of the established order was deeply disappointed. The optimates, fearing Catiline, had ensured Cicero's election as consul. But in the following years, Cicero was pushed into the background, as Pompey came to an understanding with the leaders of the democratic party, Caesar and Crassus (the First Triumvirate, 60 BC, LIV.555–556). When the tribune *P. Clōdius*, Cicero's bitter opponent, had him exiled in the spring of 58, Pompey and Caesar acquiesced. When, after eighteen months in exile, he returned to Rome (in 57), Cicero largely retired from public life and devoted himself to literary work. During the years 54–52, he wrote the *dē Rē Pūblicā*, a treatise on political science. The last two chapters of *Rōma Aeterna* contain extracts from this work.

Dē Rē Pūblicā is a dialogue in six books modeled on the *Republic* of Plato (who is mentioned by the participants more frequently than appears in our excerpt). Apart from the conclusion, *Somnium Scīpiōnis*, the work was lost until December 1819, when Angelo Mai, the head of the Vatican Library, discovered a manuscript from ca. AD 400 containing most of books I and II and fragments of books III–V. The manuscript was discovered in a palimpsest (*palimpsestus*, from Greek, meaning 're-scraped'): often the costly pages of a book were reused by painting over an older text (in this case, Cicero's *dē Rē Pūblicā*) to make room for a new one. *Dē Rē Pūblicā* was discovered underneath Augustine's commentary on the Psalms. Page 386 shows the text (with

Augustine's text removed); as you can see, the scribes wrote in narrow columns in captial letters without word breaks or punctuation.

In Cap. LV, you read extracts from books I and II of *dē Rē Pūblicā*. It is a dialogue between *Scīpiō Aemiliānus* and some of his friends who arrive at his country house in 129 BC during the *fēriae Latīnae*, a three-day religious holiday (that commemorated the alliance of the Latins with the Romans: Varro, *de linguā Latīnā*, 6.25). Immediately after this holiday, Scipio was found dead in his bed (see Cap. LI.251–253). It was widely held that he had been murdered at the instigation of his brother-in-law *C. Gracchus*, whose reform efforts he had opposed. This turbulent political situation is the background for Cicero's dialogue.

After a preliminary discussion about astronomy, Scipio's learned friend *C. Laelius* raises the question of how to unite the conflicting parties in Rome. He asks Scipio to set out his ideas about the best form of government. Government, according to Cicero, is the exercise and application of virtue; knowledge of virtue is not enough. This exercise and application is government: *Nec vērō habēre virtūtem satis est, quasi artem aliquam, nisi ūtāre* (= *ūtāris*). *Etsi ars quidem, cum eā nōn ūtāre, scientia tamen ipsa tenērī potest, virtūs in ūsū suī tota posita est. Ūsus autem eius est maximus cīvitātis gubernātiō* (*dē Rē Pūblicā* I.2).

Our text begins with Scipio's definition of '*rēs pūblica*' and goes on to discuss the three forms of government: *rēgnum*, *cīvitās optimātium*, and *cīvitās populāris* (Cicero's translation of the Greek terms *monarchía*, *aristocratía*, and *dēmocratía*). As serious objections can be raised to each of the forms, he advocates a combination of the three. The essence of the Roman republic derives from this combination.

In book II, Scipio describes the development of Rome from earliest times. This selection includes his account of the first two kings, Romulus and Numa, and his presentation of Tarquinius Superbus as an illustration of the degeneration of monarchy into tyranny.

The discussion continues for two days (books III–VI). Recovered fragments and references in later authors show that they discussed the qualities of the ideal statesman (*rēctor reī pūblicae*) and the honors and rewards that await him. Scipio then relates a strange dream he had twenty years before. The dialogue ends with this dream, the *Somnium Scīpiōnis* (see Cap. LVI).

150:      *solitum*: modifies *tē*; the historian Polybius (ca. 200–118 BC, cf. 189:      *rĕgī*: from *rĕgĕre*, not *rēx*, *rēgis*.

191:      *sī teneat*: protasis of ideal condition (Caps. XXXIII, XLI).

225: *quā* (*auctōritāte*); *carēre*: see note above on line 203; *diūtius*: comparative adverb: "for too long a time"; *līberī*: "free people."

226–229: *prīma*: neuter plural: the three unmixed constitutions (ll.182–185); the rest of the sentence gives a summary of the flaws discussed in the omitted passage (see ll.215–216).

233–236: *nōta sunt omnibus quaesīta autem ā nōbīs iam diū*: i.e., they have subjected the general opinion to detailed inquiry: *nūllam* (*rem pūblicam*) *omnium rērum pūblicārum…conferendam esse.*

285:          *auspicātō*: one word ablative absolute < *auspicārī*, "after taking the auspices," part of Romulus's thinking (i.e., if the auspices were good); easier word order: *prīmum cōgitāvisse urbem condere et firmāre rem pūblicam dīcitur.*

XXXI).

348:     *āream*: Plato's building ground was his *Republic*.

LVI: QVINQVAGESIMVM SEXTVM: SOMNIVM SCIPIONIS (Cicero/Horace)[1]

[*Ex M. Tullii Cicerōnis dē rē pūblicā librō VI*
et
Ex Q. Horātiī Flaccī 'Carminum' librō I, carmen XXII ad Fuscum]

I. Ørberg's Introduction

The *Somnium Scīpiōnis* has been preserved in full because it was separately transcribed and annotated by the Neo-Platonist Macrobius in the fifth century AD. Even in antiquity, it was considered a free-standing narrative in addition to being a part of *dē Rē Pūblicā*.

Scipio tells about his visit to king Masinissa of Numidia during the Third Punic War. The ninety-year-old king entertained his Roman visitor with stories about his famous grandfather, Scipio Africanus the Elder (*Māior*), whom he remembered from the Second Punic War. After this conversation, Scipio dreamed that his grandfather appeared before him among the heavenly stars and spoke to him about the great deeds he was to perform for his country and about the reward awaiting him in heaven. Scipio's dead father, Aemilius Paulus (Cap. L.608ff.), also stepped forward and spoke admonitory words to his son. The grandfather went on to describe the structure of the universe—the immovable earth surrounded by eight revolving spheres—and the music of the spheres, which the human ear cannot perceive. He pointed out the five zones of the globe, only two of which are habitable. He put forward evidence for the immortality of the soul (taken from Plato's *Phaedrus*) and concluded with an exhortation to use one's immortal soul in the service of one's country.

The *Somnium Scipiōnis* should not be taken as "the ancient view" but *one* ancient view. It is heavily influenced by Stoicism.

As an appendix, the Cicero text is followed by an Ode, i.e., a lyric poem, by Horace (*Q. Horātius Flaccus*, 65–8 BC). The poem begins with a Stoic sentiment

---

1.   For an explanation of the line number references convention, see p. xxvi.

that coordinates well with Cicero's text. It also demonstrates the kind of rhetorical argument often found in Horace's poetry: the first two stanzas make a claim, the middle two give an illustrative example, and the final two the poet's broad application of the lesson to be learned. Guiltlessness is a safeguard against all dangers, the poet solemnly declares. He illustrates (not very solemnly) this maxim with an incident that happened while he was strolling in the woods and singing about his beloved *Lalagē*: a formidable wolf turned away and fled! The poem concludes that he will always love and sing about Lalage wherever he may travel.

The addressee, Aristius Fuscus, was Horace's close friend. As the addressee, he appears here and in Epistles 1, letter 10. He also plays a role in Satire 1.9 (as the man who refuses to help Horace get away from the unwanted attentions of a man in the forum) and in Satire 1.10 (as a respected reader of Horace's poetry). If Horace's poetry is any guide, the two friends shared a sense of humor and, although this ode was set to music as a hymn in the early nineteenth century and solemnly sung, there is little solemn about it.

Horace's models are the Greek lyric poets Alcaeus (*Alkaios*) and Pindar (*Pindaros*). The meter in the present poem is called *Sapphic* after the Greek poetess *Sapphō*. In the Grammatica Latina section, there is an explanation of the meter and the division of the poem into four-line stanzas (*strophae*).

122–123:   *septem*: sc. *cursūs*; *contrāriō mōtū…atque*: a movement different than (the movement of) the sky.

126:       *horribilis terrīs*: because Mars is the god of war.

138:       *nūtū*: *nūtus* is a downward movement, usually of the head, a nod, but also, as here, the force of gravity.

Cantus sphaerārum: 140–170

The description of the music of the spheres is difficult and has inspired much scholarly argument. The notes below aim at elucidating the Latin not the dynamics of the vision.

144–148:   *Hic*: sc. *sonus*; *prō ratā parte*: "proportionally"; *coniūnctus*: "composed"; *intervāllīs*: understand (from the next clause) the pushing onward (*impulsū*) and movement (*mōtū*) of the

heavenly bodies (*orbium*)—these cause the irregular but harmonized pauses (musical intervals) that occur in the constant motion of the heavens; *acūta*: "sharp or high-pitched"; *gravibus*: "heavy or low-pitched"; *concentus, -ūs*: "harmony."

149:          *nātūra fert ut*: *verba postulandī*: "nature requires that" (Cap. XXVII); *extrēma*: as the context makes clear, this refers to the outer edges as judged from the middle, not just the outer rim.

156–158:   *eadem vīs est duōrum*: the rotation of the moon and the *caelum* move at different speeds but with the same power or energy; *septem…quī numerus rērum omnium ferē nōdus est*: for seven as one of the perfect numbers, see lines 49–52.

159:          *nervīs*: strings on a musical instrument; *cantibus*: *cantus, -ūs* is properly the music made by voice or instrument.

162:          *obsurduērunt*: "have grown deaf."

164:          *Catadūpa, -ōrum*: a famous waterfall (cataract) on the Nile.

166–168:   *hic*: the sound of the music of the spheres; *tōtīus mundī*: genitive with *conversiōne*; *sonitus*: "the sound (made by)" + ablative, *incitātissimā conversiōne*.

169–170:   *nequītis*: < *nequeō, nequīre,* plural because although he is talking to Scipio, he refers to all living people; *aciēs* is often used of acuity of vision.

Angustiae terrārum: 171–231

178–181:   *quam celebritātem…quam…glōriam*: interrogative adjectives; *expetendam*: "that ought to be sought," i.e., worthwhile; *habitārī, habitātur*: impersonal; *ubi habitātur* with *in ipsīs quasi maculīs*; *vāstās sōlitūdinēs interiectās* (*esse*) with *vidēs*.

187–188:   *quibusdam…cingulīs*: ablative of means dependent on and enclosing *redimītam* (< *redimīre*: "encircle") and *circumdatam* ("wrapped around"), which refer to *terram*.

189–190:   *verticibus ipsīs*: ablative with *subnīxōs* ("propped up by, supported by"); *ex utrāque parte*: "on both sides" (i.e., poles of the earth); *pruīnā*: "frost."

193:          *nihil ad vestrum genus*: a common idiom sc. (as in margins), *pertinet*.

194:      *aquilō, -ōnis* (m.): "the north wind"; *cerne*: imperative of *cernere*, "perceive"; *quam*: interrogative adverb introducing indirect question (so too in line 199: *quam sit parvus vidēs*).

197–198:   *marī quod 'Atlanticum', quod 'Magnum', quem 'Ōceanum'*: Atlanticum and Magnum are both adjectives, while Oceanus is a proper name (masculine gender), and the gender of the relative (*antecedent marī*) has been attracted into the gender of Oceanus.

200–201:   *cuiusquam nostrum nōmen*: "the name of any of us": *cuiusquam* (< *quisquam*, used in negative contexts) is genitive with *nōmen* and *nostrum* is partitive genitive with *cuiusquam* (Caps. XXIX, XL).

203–204:   *in reliquīs* (*orientis <u>aut</u> obeuntis sōlis*) *ultimīs <u>aut</u>* (*aquilōnis austrī<u>ve</u>*) *partibus*: *reliquīs, ultimīs* refer to all *partibus*, while the partitive gentives, east (*orientis…sōlis*) or west (*obeuntis sōlis*), north or south (*aquilōnis austrīve*) enumerate them; *Quibus*: i.e., the furthest regions of the world.

208–210:   *sī cupiat…prodere*; *prōlēs*: "offspring" (XLVI.851); *nostrum*: see note above on lines 200–201.

211:      *tempore certō*: "at fixed times."

214:      *quid…interest* + accusative and infinitive: "what difference does it make that…"

215–216:   *nūllus*: sc. *sermo*; *certē meliōrēs*: according to the persistent Roman belief that their ancestors were more virtuous than their contemporaries.

217–218:   *nōmen nostrum*: adjective, not genitive of pronoun; *memoriam cōnsequī*, "achieve the memory (of)"; *ūnīus annī*: i.e., of a year measured by the completion of all stellar rotations.

225:      *dēficere sōl*: an eclipse of the sun; a second eclipse (l.228) will signal the end of a complete year.

230:      *habētō*: future imperative, "consider the year complete."

Dē glōriā aeternā et animō immortālī: 232–298

233–234:   *dēspērāveris*: perfect subjunctive in the protasis of a future-less-vivid condition; the sense of the condition: if you should lose hope of eternal life here, what value is the tiny bit of glory that you attain on earth? (i.e., "none"); *magnīs et praestantibus*

virīs: dative of possession with *omnia sunt*; *quantī*: genitive of value (Cap. XXIX).

236: *partem exiguam*: i.e., *vīcēsimam partem* (ll.230–231).

237–239: *sī volēs…dēderis…posueris*: indicatives in a future-more-vivid condition.

241: *quid…loquantur*: indirect question; *ipsī videant*: jussive, "let them see to it" (i.e., that's their concern, not yours).

247: *bene meritīs dē patriā*: *meritīs* is dative with *aditum patet*; the expression is idiomatic: to those who have "earned well" (proved deserving) from the point of view of someone else (*dē* + the ablative).

248–249: *vestīgiīs*: dative with *ingressus* (cf. our "followed in your footsteps"); *decorī vestrō*: dative with intransitive *dēfuī*.

251: *ēnītere*: imperative.

253: *mēns cuiusque is est quisque*: "the mind (heart, soul) of each person is that person"; *mēns* is that hegemonic principle of life (in the *Tusculan Disputations* 3.5, Cicero says *mēns cui regnum totīus animī ā nātūrā tribūtum est*).

254–258: *tam…quam*.

258–260: *ut…sic*: "as…so": Points of Style, Cap. XIX; *mundum…mortālem*: object of *movet*.

261: *movētur*: "is in motion, moves itself," not "is moved" (which implies an external propulsion); see line 265: *quod sē ipsum movet*.

266: *cēterīs*: dative with *hic fōns, hoc prīncipium*.

269–270: *nec enim esset id prīncipium quod gignerētur aliunde*: contra-factual (*quod* "whatever" instead of *sī*): "whatever arises/comes into being from another source (other than itself) could not be this beginnning/first principle/originator."

271–272: *prīncipium exstīnctum*: the participle (as often) implies a condition: "if the beginning has been deprived of life."

275–277: *vel concidat…cōnsistat necesse est nec…nancīscātur*: see grammar section above on *necesse est* + the subjunctive; both subjects go with all verbs: *omne caelum omnisque nātūra concidat et cōnsistat nec vim ūllam nancīscātur*; *quā moveātur*: generic/descriptive consecutive clause (see below l.280).

279–280:   *quod…moveātur*: subordinate clause in indirect statement; *quis est quī…neget*: descriptive relative clause (Caps. XXXIX, XLII).

292–293:   *dēdidērunt*: < *dēdere* + accusative and dative, "surrender" (Cap. XLI); *eārum = voluptātibus*.

294:   *libīdinum*: genitive with *impulsū*; *oboedientium* agrees with *libīdinum*; *voluptātibus* is dative with *oboedientium*.

295:   *corporibus*: ablative of separation with *ēlāpsī*.

296–297:   *multīs…saeculīs*: ablative of time within which.

Integer Vītae: 299–325

300–301:   *carminum*: genitive plural of *carmen*, "lyric poem"; *Fuscum*: see introduction to this chapter above.

302:   *integer vītae scelerisque pūrus*: epexegetical genitives (see grammar section).

303–304:   *eget*: *egēre* (Cap. XXXVII), like *carēre*, with ablatives of separation *iaculīs, arcū, gravidā phaeretrā*; *Maurus, -a, -um*: the *Maurī* live in *Maurētānia*; cf. Cap. LII.

306:   *Syrtēs*: Syrtis (Greek Σύρτις) means "sandbank"; Syrtis Māior and Syrtis Minor are gulfs in the area of the Mediterranean Sea around Africa (see margins).

307:   *factūrus*: with *integer, pūrus*; *iter facere*: "journey."

308:   *Caucasus*: mountain range between Black Sea and Caspian Sea in Asia; cf. above, line 201 and margin; *quae loca = loca quae*; *fābulōsus*: "storied"; i.e., about which people tell a lot of stories.

309:   *lambit*: like the *lupa* of XLI.230–231: *Quōs lupa nūtrit…,/et lambit linguā corpora bīna suā*.

310:   *namque*: introduces the exemplum that "proves" Horace's assertion in lines 1–8 of the poem; *silvā…in Sabīnā*: Horace owned a farm and villa in the Sabine hills.

311:   *Lalagēn*: A girl's name, Lalagē, from the Greek Λαλαγή, related to the Greek verb "lalein" (λαλεῖν), which means "chatter, prattle."

312:   *cūrīs…expedītīs*: *expedīre* means "to unshackle the feet, to free"; it is used of light-armed soldiers who are free of heavy burdens (in this case, anxieties, *cūrae*) and thus able to travel quickly.

313:         *inermem*: *sine armīs,* modifies *mē* (l.9).

314:         *portentum* (Cap. XLVI): "monster."

315:         *Dauniās*: only here in Latin; Daunus a legendary king of Apu-
            lia (in the *Aeneid*, Turnus's father); subject of *alit*.

            with Horace); *leōnum*: objective genitive with *nūtrix*; *ārida

            tive of place where.

"Jeanne Marie Neumann's *A Companion to* Roma Aeterna provides students, instructors, and homeschoolers with a treasure trove of learning that will enable them to fully benefit from Ørberg's absurdly underused *Roma Aeterna*."

—James Dobreff, Department of Classics and Religious Studies, University of Massachusetts Boston

A sequel to her widely used *A Companion to* Familia Romana (now in its second edition), Jeanne Marie Neumann's *A Companion to* Roma Aeterna offers a running commentary, in English, of the Latin grammar covered in Hans H. Ørberg's *Roma Aeterna*, and includes the complete text of the Ørberg ancillaries *Grammatica Latina* and *Latin–English Vocabulary II*. It also serves as a substitute for Ørberg's *Instructions*, on which it is based.

Though designed especially for those approaching *Roma Aeterna* at an accelerated pace, this volume will be useful to anyone seeking an explicit exposition of that volume's implicitly presented grammar. In addition to many revisions of the text, *A Companion to* Roma Aeterna also includes new units on cultural context, tied to the narrative content of the chapter.

Jeanne Marie Neumann is Professor of Classics at Davidson College, where she has taught Latin, Greek, and Classical Civilization since 1994, and was awarded the College's most distinguished teaching award in 2005. She has conducted numerous seminars and workshops for Latin teachers at all levels of instruction, and has received national recognition for her educational outreach.
