**PRESS STATEMENT OF KIM YO JONG, DEPUTY  
DEPARTMENT DIRECTOR OF THE CENTRAL COMMITTEE OF  
THE WORKERS' PARTY OF KOREA**

*January 27, 2023*

The U.S., which has exposed the whole continent of Europe to the grave danger of war and caused big and small concerns, is now further crossing the red line.

It has made a "special contribution" to instigating the unstable world crisis to be continued by providing Ukraine with a large amount of military hardware. It recently made public that it would supply its MBT to Ukraine, only to make clearer its confrontation stand against Russia.

Lurking behind this is the U.S. sinister intention to realize its hegemonic aim by further expanding the proxy war for destroying Russia.

The world would be brighter, safer and calmer now, if it were not for the U.S.

The U.S. is the arch criminal which poses serious threat and challenge to the strategic security of Russia and pushes the regional situation to the present grave phase.

I express serious concern over the U.S. escalating the war situation by providing Ukraine with military hardware for ground offensive, and strongly denounce it.

The U.S. and other Western countries are wrecking the global peace and the regional security while handing military hardware running into astronomical sum of money over to Ukraine in total disregard of Russia's concern about security. Therefore, they have neither right nor justification to slander sovereign states' exercise of the right to self-defence.

The U.S. is mulling mobilizing the military potentials of its top-class stooges on the anti-Russian front, to say nothing of those of the Western countries.

The Ukrainian battlefield is by no means a desert in the Middle East where the U.S. MBTs went on the rampage 20 years ago.

I do not doubt that any military hardware the U.S. and the West boast of will be burnt into pieces in the face of the indomitable fighting spirit and might of the heroic Russian army and people.

No matter how desperately the imperialist allied forces may try, they will never weaken the heroic stamina of the Russian army and people with high patriotism, stubbornness and strong mental power.

We will always stand in the same trench with the service personnel and people of Russia who have turned out in the struggle to defend the dignity and honor of the state and the sovereignty and security of the country.

**PRESS STATEMENT OF KIM YO JONG, DEPUTY  
DEPARTMENT DIRECTOR OF THE CENTRAL COMMITTEE OF  
THE WORKERS' PARTY OF KOREA**

*February 19, 2023*

If all the countries truly worry about the situation on the Korean peninsula and wish for peace and stability, they should never tolerate the high-handed and arbitrary practices of the U.S. to turn the UNSC with heavy responsibility for the international peace and security into a tool for its heinous hostile policy toward the DPRK.

And they should not connive at the sinister attempts of the U.S. and its followers to make a sovereign state give up its legitimate rights to self-defence, but let them know that such acts are in vain.

This time, too, the opponents to the DPRK committed an undisguised infringement upon its sovereignty for no ground.

The U.S. and south Korea are openly showing their dangerous greed and attempt to gain the military upper hand and predominant position in the Korean Peninsula, crying out for extended deterrence and combined defence posture on the trite pretext for coping with any threat. This further endangers the situation every moment, destroying the stability of the region.

The U.S. would be well-advised to stop saying that it is not hostile toward the DPRK and the door to dialogue is open, hoodwinking the world, and to give up its foolish trick for earning the time through dialogue. And it should stop all the actions posing threats to the security of our state and refuse to tarnish the DPRK's dignity, always thinking twice for its own future security.

South Korea, too, had better think of the consequences to be entailed by its reckless acts.

We tell its fools that our ICBM will not be aimed at Seoul.

We still have no intention to stand face to face with them.

Upon authorization, I warn that we will watch every movement of the enemy and take corresponding and very powerful and overwhelming counteraction against its every move hostile to us.

**PRESS STATEMENT OF KIM YO JONG, DEPUTY  
DEPARTMENT DIRECTOR OF THE CENTRAL COMMITTEE OF  
THE WORKERS' PARTY OF KOREA**

*February 20, 2023*

As expected, the way the fools think and play in every occasion is incurring laughter of the world.

In fact, we are now watching the south Korean idiots making a show of themselves as a spectacle rather than a response.

And again, I feel an impulse to scoff at them.

As I watched yesterday alone, their speculation, guess, freewheeling assessment and so on were very disgusting.

I would like to make some cutting remarks about it.

A so-called senior researcher of a south Korean military institute appeared before the press to let loose rubbish that it took 9 hours and 22 minutes for us to conduct the missile launch after the written order on it, calculating only the time as if he had nothing to do, in a bid to undervalue the preparedness of the DPRK missile forces.

They present a variety of unusual analysis as if they are really stupid or persons of small caliber who make too much analysis.

I don't know if they would take some comfort from such farfetched defamation and assessment.

We did not make public the full text of the written order issued by our supreme leadership.

To make public one thing on this occasion, the written order on the missile launch issued on the day includes the contents that the surprise launch should be conducted at a favorable and appropriate moment in the afternoon after completely closing the area around the launching site and taking such safety steps as evacuation of personnel and other equipment in the morning.

Accordingly, our servicepersons took important military action at the most appropriate time, specified in the order--the time between 15:30 and 19:45 in consideration of visible distance under weather conditions and when seven scout planes of the enemy involved in air reconnaissance landed.

I think that the south Korean military would evidently explain, today or tomorrow and as they always used to, that they detected the sign of the north's missile launch in advance and were conducting intensive monitoring with intelligence assets.

And they will defend the fact that their scout planes didn't fly at the time by saying that they were monitoring with so-called special means and methods under "close cooperation between intelligence authorities of south Korea and the U.S." and that it is difficult to give detailed explanation for fear of possible exposure of military intelligence assets and for other reasons.

The concept of a surprise launch doesn't mean the time that it takes between the issuing of a launch order and the launching.

I cannot but mention the system of fuel ampoule.

Those, who have never made it themselves, went so absurd and stupid as to comment on other's technology at will after seeing some sci-tech data.

A so-called honorary researcher at a sci-tech policy institute made oft-repeated remarks again that the warhead's reentry appeared to be a failure judging from a photo posted by Japan.

Those absurd guys fail to distinguish a warhead from a detached second-stage projectile in the photo and seem ignorant about the reason why the distance between the two in the case of vertical launch naturally gets close.

As I explained the other day, if the warhead's reentry fails, we can't receive signals from the warhead till it has landed.

Such argument, made by those rookies who are lack of the said common sense and pretend to be experts, will not change in fact the crisis facing the U.S. and south Korea as they want and will cause confusion in getting a correct understanding of the dangerous situation, though it may bring some consolation to them.

We have possessed satisfactory technology and capability and, now will focus on increasing the quantity of their force.

They had better rack their brains to take measures to defend themselves, instead of doubting or worrying about other's technology.

We are well aware of the movement of U.S. forces' strategic strike means recently getting brisk around the Korean Peninsula.

We are carefully examining the influence it would exert on the security of our state, and we are going to make it an established fact, once again on this occasion, that we will take corresponding counteraction if it is judged to be any direct or indirect threat.

The frequency of using the Pacific as our firing range depends upon the U.S. forces' action character.

We affirm once again that there is no change in our will to make the worst maniacs escalating the tensions pay the price for their action.

**PRESS STATEMENT OF KIM YO JONG, DEPUTY  
DEPARTMENT DIRECTOR OF THE CENTRAL COMMITTEE OF  
THE WORKERS' PARTY OF KOREA**

*March 7, 2023*

One of south Korean puppet media on March 6 carried an unspecific report that the commander of the U.S. forces in the Indo-Pacific said something on February 24 to the effect that if we fired ICBMs into the Pacific, they would immediately shoot them down.

I don't know if he really made such improper words to speak for the stand of the U.S. military or if it was nothing but the puppet media's trite wordplay, but I clearly warn in advance irrespective of any reason whether it is true or not.

The Pacific Ocean does not belong to the dominium of the U.S. or Japan.

It is very interesting to see how the U.S., whose forces frequently conduct the test-launches of strategic weapons in the Pacific every year as if the ocean were its yard, will respond if a third country attempts to intercept them under the reason for counteraction.

Had he been mindful that a specific approach must be taken to cope with such a terrible situation, he could have realized how unmanageable, excessive and crazy remarks he made.

The commander of the U.S. forces in the Indo-Pacific reportedly described the "south Korea-U.S. map exercise for operating extended deterrence means" as effective and "very meaningful" as it gave a message to the DPRK and another country. We, too, have a message to send to the U.S.

It will be regarded as a clear declaration of war against the DPRK, in case such military response as interception takes place against our tests of strategic weapons that are conducted without being detrimental to the security of neighboring countries in the open waters and air which do not belong to the U.S. jurisdiction.

We also remind them that our military code of conduct in such a situation has been set.

The demonstrative military moves and all sorts of rhetoric by the U.S. and south Korea, which go so extremely frantic as not to be overlooked, undoubtedly provide the DPRK with conditions for being forced to do something to cope with them.

As already clarified, we keep our eye on the restless military moves by the U.S. forces and the south Korean puppet military and are always on standby to take appropriate, quick and overwhelming action at any time according to our judgment.

The U.S. and south Korea had better refrain from making remarks and behavior any longer that aggravate the situation.

## **RECKLESS NUCLEAR DAYDREAM INVITES SELF-DESTRUCTION**

**Press Statement Published by the Korean Central News Agency**

*April 1, 2023*

The Ukrainian president's website recently carried an appeal calling for deploying U.S. nuclear weapons in territory of Ukraine or making nuclear weapons by itself.

It is reported that if more than 25 000 inhabitants sign the appeal within 90 days, the president will examine the proposed initiative and clarify the official stand on it.

This is a plausible veil of the public's expression of will, but it is not hard to guess that it is a product of the Zelenskiy authorities' sinister political plot.

It is a well-known fact that Zelenskiy clarified at the Munich Security Conference in February 2022 his stand to restore the position of the country's nuclear weapons state and officials of Ukraine openly revealed their nuclear ambition on several occasions.

The Ukrainian authorities, seized with the incurable megalomania that can defeat Russia, are incurring a nuclear disaster threatening their existence without any elementary consciousness of foresight and any ability to cope with its ensuing consequences.

Zelenskiy's talk about the introduction of U.S. nuclear weapons and the independent development of nuclear weapons is a manifestation of his very dangerous political ambition to prolong his remaining days at any cost by gambling with the destiny of his country and people.

It is the law of the world that if the authorities lack political sense and discretion, they will drive the country and nation into the abyss of ruin.

The Zelenskiy authorities, who always look up at their master and chant prayers of begging and solicitation, are not rivals of Russia, and if they are focused on nuclear daydream as now, they will be a more vivid target in Russia's nuclear sighting.

If the Zelenskiy authorities calculated that they can avoid the powerful fire of Russia only when they go under the U.S. nuclear umbrella, which had already been perforated, they are going to the wrong path, the last path.

Those stooges serving the U.S. as their master and blindly believing in its poor promise should clearly understand that awakening at an early date from the self-destructive nuclear ambition, little different from having a nuclear time bomb hung on their backs, is the best option for saving their lives.

**VICE DEPARTMENT DIRECTOR OF C.C., WPK KIM YO JONG  
CLARIFIES STAND THROUGH KOREAN CENTRAL NEWS  
AGENCY**

*April 28, 2023*

South Korean president Yoon Suk Yeol's recent visit to Washington was an occasion for us to have much clearer understanding about the root-cause and physical entity disturbing peace and security of the Korean Peninsula and the region.

After the summit on April 26, the chief executives of the U.S. and south Korea issued the so-called "Washington Declaration", specifying the ways to strengthen the "extended deterrence", thus stipulating their choice and will to act against the DPRK.

The "Washington Declaration" fabricated by the U.S. and south Korean authorities is a typical product of their extreme anti-DPRK hostile policy reflecting the most hostile and aggressive will of action. As such, it will only result in making peace and security of Northeast Asia and the world be exposed to more serious danger, and it is an act that can thus never be welcomed.

The formation of "Nuclear Consultative Group", the regular and continuous deployment of U.S. nuclear strategic assets, and the frequent military exercises made the regional politico-military situation unable to extricate itself from the currents of instability. This provides us with an environment in which we are compelled to take more decisive action in order to deal with the new security environment.

Another thing that we cannot let pass nor overlook is the fact that the chief executive of the enemy state officially and personally used the word "the end of regime" under the eyes of the world.

Would we simply regard it as the man's senility?

It may be taken as a nonsensical remark from the person in his dotage who is not at all capable of taking the responsibility for security and the future of the U.S., an old man with no future, as it is too much for him to serve out two-year remainder of his office term.

But when we consider that this expression was personally used by the president of the U.S., our most hostile adversary, it is threatening rhetoric for which he should be prepared for far too great an after-storm that will not be easy for us to deliver.

Obsessed with overconfidence in strength, he was too miscalculating and irresponsibly brave.

This time we reconfirmed the hostility of the rulers and military warmongers of Washington and Seoul towards our country, which cannot be interpreted otherwise and has become too obvious. This opportunity gave us a clear answer as to what we should do in the future and for what we should be fully prepared.

So serious is the development of the situation.

Yoon Suk Yeol, this time again, said that he will build the capability of overwhelming response including "south Korea's three-axis defence system" and adopt the punitive posture. He also made it clear that the "south Korea"-U.S. joint exercises and training will be more intensive.

It would be a bit hard to understand the mentality of such a fool that is so grateful for getting a nominal "declaration" as an "offering" from the U.S. and expresses "his absolute trust in the U.S. firm commitment to the extended deterrence". However, we will keep watching to what extent he will go testing his mettle, putting the security into crisis with his incompetence.

The pipe dream of the U.S. and south Korea will henceforth be faced with the entity of more powerful strength.

We are convinced once again of the fact that the enhancement of the nuclear war deterrent, especially the second mission of the nuclear war deterrent, should be brought to further perfection.

We know exactly what we are supposed to do.

The more the enemies are dead set on staging nuclear war exercises, and the more nuclear assets they deploy in the vicinity of the Korean peninsula, the stronger the exercise of our right to self-defence will become in direct proportion to them.

# **NO ONE CAN DENY THE DPRK'S SOVEREIGN RIGHT TO SATELLITE LAUNCH**

**Press Statement Published by the Korean Central News Agency**

*June 1, 2023*

The U.S. is openly revealing its inveterate hostility toward the DPRK over its military reconnaissance satellite launch belonging to its right to self-defence.

A spokesperson for the National Security Council of the White House on Wednesday clamored that all countries should denounce the DPRK's military satellite launch, saying there is a danger of unnecessarily escalating tension and destabilizing the regional security as it is an open violation of the UNSC's "resolution".

It is neither surprising nor new, but the U.S. is letting loose a hackneyed gibberish prompted by its brigandish and abnormal thinking.

Who is escalating the tension unnecessarily and destabilizing the regional security situation?

If the DPRK's satellite launch should be particularly censured, the U.S. and all other countries, which have already launched thousands of satellites, should be denounced. This is nothing but sophism of self-contradiction.

The far-fetched logic that only the DPRK should not be allowed to do so according to the UNSC's "resolution" which bans the use of ballistic rocket technology irrespective of its purpose, though other countries are doing so, is clearly a gangster-like and wrong one of seriously violating the DPRK's right to use space and illegally oppressing it.

It is pitiful that the U.S.-style gangster-like logic was stipulated in the UNSC's "resolution".

The U.S. is a group of gangsters who would claim that even if the DPRK launches a satellite in space orbit through balloon, it is illegal and threatening.

It is the "tragedy of the U.S." in the 21st century that it can never give a correct answer with a wrong formula and has not discarded misunderstanding of it.

The U.S. should cool its head heated with confrontation hysteria and clearly look into the UN Charter and the provisions of the space treaty once again before

groundlessly denying and pulling up a sovereign state over its satellite launch and its right to space development.

Even at this moment, the U.S. is absorbed in watching every movement of the DPRK with sharp eyes after flying a lot of reconnaissance satellites, high altitude unmanned reconnaissance planes and all other reconnaissance assets in the sky above the Korean Peninsula. It is just like a guilty party filing the suit first and illogical to pull up the DPRK over its military reconnaissance satellite launch.

The U.S. should no longer have illusion nor be overconfident itself.

No one vested the U.S. with the authority to take issue with the sovereign right of a specified state.

Taking this opportunity, we would like to once again clearly warn the U.S., which is trying to blind and deafen the eyes and ears of the international community with such honeyed dialogue ballad as "door of diplomacy" and "sincere negotiation".

We have no content of dialogue and do not feel the necessity of dialogue with the U.S. and its stooges that oft-repeat the "end of regime" and the "overthrow of system". We will continue our-style counteraction in a more offensive attitude so that they should not but realize that they will have nothing to benefit from the extension of the hostile policy toward the DPRK and how dangerous their pursuit of confrontation with the DPRK is.

We are ready to do whatever to defend our sovereign right and interests.

Reading the psychology of the U.S. and its stooges that are so uneasy about the DPRK's military reconnaissance satellite issue, we confirmed once again that the enemies are most afraid of the DPRK's access to excellent reconnaissance and information means including reconnaissance satellite and, accordingly, we are aware that we should direct greater efforts to developing reconnaissance means.

It is certain that the DPRK's military reconnaissance satellite will soon start its mission on a space orbit.

We are well aware of the protracted nature of the confrontation with the U.S. and will make all efforts to bolster up war deterrent in an all-inclusive direction, being conscious of the long-term threats and challenges.

If the U.S. and its stooges continue to commit rash acts of infringing upon our sovereign right, we will never remain an onlooker to them.

**PRESS STATEMENT OF KIM YO JONG, DEPUTY DEPARTMENT  
DIRECTOR OF THE CENTRAL COMMITTEE OF THE  
WORKERS' PARTY OF KOREA**

*June 4, 2023*

The UNSC held a meeting to take up the DPRK's right to satellite launching as a single agenda item at the U.S. gangster-like request. As a result, it produced another shameful record of working as a political appendage of an individual country.

The UNSC have held more than 9 000 official meetings since its establishment, but this time it called a meeting to take issue with a sovereign state's right to space development quite different from aggression and war, major threats to the international peace and security. This should be regarded as an insult to and serious distortion of the spirit of the UN Charter and as a deliberate delinquency in the genuine mission of the organization.

It is today's universal reality that over 5 000 satellites with various aims and missions are now in their orbits around the Earth and even private companies are taking an active part in the space development.

This being a hard reality, the UNSC is continuously taking discriminative and rude action to take issue with only the launch of a satellite by the DPRK, a full-fledged member of the UN.

I am very displeased that the UNSC so often calls to account the DPRK's exercise of its rights as a sovereign state at the request of the U.S., and bitterly condemn and reject it as the most unfair and biased act of interfering in its internal affairs and violating its sovereignty.

To make the UNSC take up the DPRK's exercise of its legal rights as a sovereign state precisely means the undisguised disregard for and violation of the DPRK's sovereignty.

Without considering the changed security situation of the Korean Peninsula, the UNSC is trying to unilaterally deprive the DPRK of its sovereignty and rights to existence and development, blindly following the articles of the illegal and unfair anti-DPRK "sanctions resolutions" cooked up 10-odd years ago. This is a very dangerous act as it can cause serious imbalance of power in the region and the structural damage of the peace and stability.

If the UNSC thinks the unbalanced situation, in which one side suffers only and the other side bullies it collectively, will continue prevailing, the UNSC is just mistaken.

If the UNSC persists in its unfair and prejudiced anti-DPRK action, it should give a responsible answer to whether it is capable of defusing the ensuing serious instability of the situation and guaranteeing the security of the regional countries.

Some countries joining the U.S. racket of denouncing the DPRK are unconditionally dancing to the tune of the U.S. without any ground. Their acts are a sight to see

As for those countries, they have neither reason nor ground to stand up against the DPRK in the light of their security interests and there is no need for them to be concerned about the military reconnaissance satellite of the DPRK.

If those countries think that it is beneficial to them to be at the U.S. beck and call, I'd like to remind them that there is a way of exalting their national prestige and guaranteeing their security without standing on the U.S. side and there exist not a few independent countries applying the way.

I'd like to make it clear once again that the launch of a military reconnaissance satellite by the DPRK is a legal countermeasure to cope with the U.S. and its vassal forces' military threats that have already crossed the red line, and an exercise of the right to self defense aimed at safeguarding the sovereignty and territorial integrity.

More than 6 100 days have passed since the first anti-DPRK "sanctions resolution", a product of the hostile policy of the U.S. and its vassal forces towards the DPRK, was fabricated 17 years ago. During this period the DPRK has never recognized the illegal "sanctions resolutions" against it and it will remain unchanged in such stand - no matter that such "sanctions resolutions" continue to be cooked up.

Regardless of the instinctive reflex action of the UNSC against the DPRK's exercise of its sovereign right, the DPRK will continue to take proactive measures to exercise all the lawful rights of a sovereign state, including the one to military reconnaissance satellite launch.

Peace and security in the Korean Peninsula is guaranteed by the powerful self-defence capability of the DPRK, not by the resolution invented by the "political tool" of the U.S.

The DPRK will consistently make strong responses and do what it should do nonstop until the U.S. and its vassal forces feel bored and admit that they made a wrong choice.
