4/2/2025 Been a couple years since I reviewed this-have been informed some links are broken, will fix them. Easiest way to get in contact is <u>PSLdocs@proton.me</u>, always available to chat, answer questions, discuss exit, accept stuff for this list, etc. As always, we believe that PSL's main goal is to destabilize American grassroots movements and act as controlled opposition; whether or not that is the intent of any individual PSL organizer or branch, it is their repeated overall result and the role they are most comfortable performing.

## Documentation of corruption, institutional bigotry, and high-control group (cult-like) behavior in the Party for Socialism and Liberation

This document compiles links to documentation of corrupt, harmful, and cult-like activity at the institutional level in the Party for Socialism and Liberation. The Party uses its centralized communication procedures to control the flow of information and systematically misinform its members of the facts surrounding external critiques and accusations. As a consequence, there is a custom among rank-and-file members of dismissing all such critiques as the activity of "online/ultra-leftists," "traitors," or potential federal agents. Among other purposes, this document allows PSL members full access to the evidence on which outside critiques of such things as rape and abuse apologism are based. Many of these documents were written by former members who had made significant sacrifices for the party and had a record of disciplined behavior—although such credentials or lack thereof do not themselves determine the validity of the critiques.

## PSL is a high-control group with an ineffective strategy
