We've had another serious incident since an american shot the trial judge in our child sex trafficking case here. He and I both think this latest incident is tied to the fact we have reached out to your team. Who on your team knows we are talking to you, anyone assigned from NSA, CIA or US State Department? Please understand peoples lives here are in jeopardy.

We have had 4 armed attacks against us, my partner has shot and killed 2 and wounded 5 american agents to date, numerous white american agents following us in vans assigned to US Embassy. Jorge was attacked and lost his arm. The President of Mexico is keenly aware of our case against [REDACTED] and other US Officials. This case we have here is most certainly connected to yours, we have the proof. Our case will help bring a whole new dynamic to what you know and who is involved, Prince Phillip is small fry compared to what we have uncovered.

You may want to question the Ex US Ambassador to Mexico; Mr. Earl Anthony Wayne about his involvement with an underage girl when he attended and was arrested by the Federal Police. We believe that [REDACTED] and Epstein were involved organizing this party and it was held in Juarez, Mex in 2014 at a US Consulate controlled housing facility. Ask him how he knows [REDACTED]. He was sentenced in Mexico in 2017 to a life sentence for impregnating an 11 year old girl, her son's dna matches Waynes 100%, but he is allowing an ex-US Marine to stand in his place to serve his sentence in Mexico. That was an agreement worked out between our US State Dept and a judge in Mexico after a huge payoff. Mr. Anthony has an outstanding arrest warrant here in Mexico for avoiding sentencing. His cell number is [REDACTED]

I want confirm that the phone you will be using has been swept for malware and key loggers. After our call you'll understand why we are so concerned with secure comms here.
