I understand you, and I'm really sorry that I didn't it. But I always afraid when write you in skype that I distract you. Yesterday I really wanted to ask you in conversation about what can I learn more to be useful to you , I thought about it since trip in Paris. If you can give me one more chance, I promise that I improve. It is very important for me.

I will pay for your english school / I have asked [REDACTED] to bring another candidate to new york for a try out period. lets see what happens with her. I know you are smart. and I took a great deal of my own time, in order to try to explain to you . Each time you tell me you understand , but the next day, its the same. just the reasons change. I wish you well , and will revisit this, in the new year. If i come to paris, before then I promise to have you try there.

I think this would be an amazing app because it would be very useful for everyone involved. Getting rid of unnecessary flowers and presents that you don't want and have to return. This would also be very useful for you when you need to get your assistance presents.

I like useful gifts as how many diamonds does one need. Hence the lightbulbs and the chairs for the backyard. Remember you can't take it with you once you die. Having said that I'll show you the jewelry that I have in mind as well. Remember the wish list has to be a range of prices because we all can't be as fortunate as you.

In many ways [REDACTED] is more connected to " reality " than the brilliant scientists.  
I felt connected to her at the level of awareness

I have been obsessed now with the whole notion of all reality being a human construct !  
What is the real reality behind the constructs ?  
Punishment itself is a human creation  
As is the idea that there is a brain  
There is only experience and the knowing and then the constructs . The brain is not a physical object ( there are no objects ) It is an experience - a perceptual experience - a Perceptual process - in non local awareness - as is the " feeling " " I "  
This process includes - environment ( another process ) thoughts , emotions , sensations , images .  
There is nothing else! Just awareness and it's excitations - as process in awareness .  
We are fictional characters in a fictional playground .  
We need to have a project , a conversation around The Reality Project and Human Constructs  
We have been bamboozled by a superstition !

Science is part of the superstition  
I'm personally committed more than ever on experiencing reality devoid of constructs .  
Awareness and it's delicious sensations , generated in awareness , experienced in  
awareness , known in awareness and made out of awareness
