People & Planet  
Over Profit!

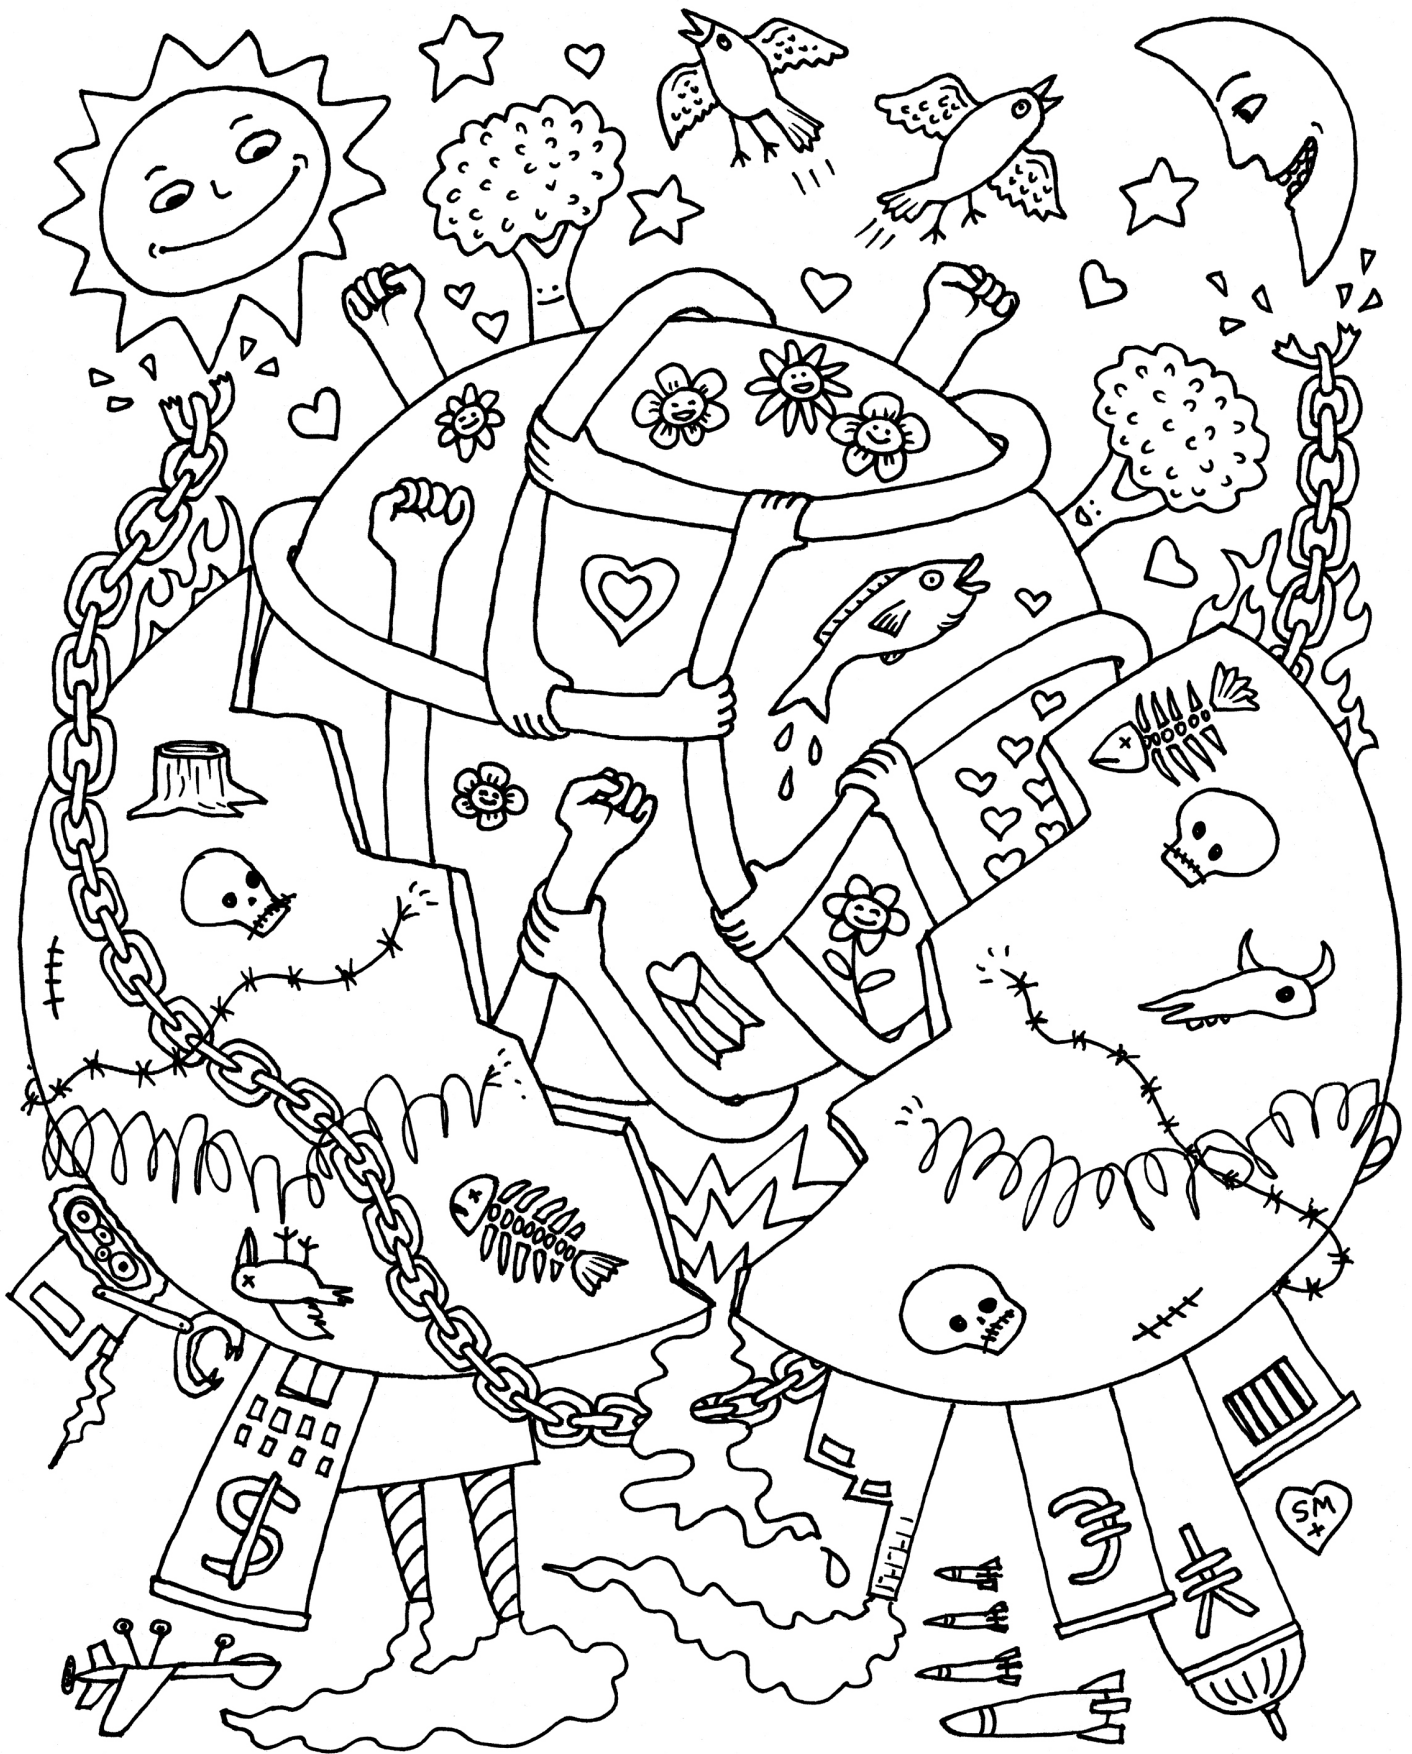

Experience the simple joy of coloring scenes of the exploited and oppressed rising up to overcome the omniscient capitalist/imperialist system.

These 18 positive images of working class-led, biocentric revolution are drawn with humor, affection and cuteness. Contemplating while coloring them can bring us together in hope during this miserable historical epoch, and encourage us in our common struggle for a sustainable way of life free of class divisions.

Recent feedback:

"Your work plants flowers in my soul, and inside every flower there is a tiny missile and on the side of the missile it says 'fuck capitalism,' and I throw those at multimillionaires's faces in my dreams."

~ Cristina Butrón
